Packaging Contents

The following items are included in your package. If you find anything missing, contact your system administrator.

- IP Phone
- Handset
- Stand
- Power Adapter (Optional)
- Handset Cord
- Ethernet Cable (1.5m CAT5E UTP Cable)
- Quick Start Guide

Note: The models displayed on the phone differ from each other. The packaging content “IP Phone” listed above takes a SIP-T19P E2 IP phone as an example. We recommend that you use the accessories provided or approved by Yealink. The use of unapproved third-party accessories may result in reduced performance.

Assembling the Phone

1. Attach and detach the stand, as shown below:
   a) Attach the stand:

   ![Diagram](image)

   Desk Mount Method

   ![Diagram](image)

   Wall Mount Method

Note: The hookswitch tab has a lip which allows the handset to stay on-hook when the IP phone is mounted vertically.
2. Connect the handset and optional headset, as shown below:

Note: The headset should be purchased separately.

3. Connect the network and power, as shown below:

You have two options for network and power connections. Your system administrator will advise you which one to use.

Note: The IP phone should be used with Yealink original power adapter (5V/600mA) only. The use of the third-party power adapter may cause the damage to the phone. If you are connecting a PC to your phone, we recommend that you use the Ethernet cable provided by Yealink. If inline power (PoE) is provided, you don’t need to connect the power adapter. Make sure the hub/switch is PoE-compliant. PoE is only applicable to the SIP-T19P E2 IP phone.
Startup

After the IP phone is connected to the network and supplied with power, it automatically begins the initialization process. After startup, the phone is ready for use. You can configure the phone via web user interface or phone user interface.

Configuring Your Phone

Configuring via web user interface

Accessing the web user interface:

1. Press the [ ] key when the phone is idle to obtain the IP address of the phone.
2. Open a web browser on your computer, enter the IP address into the address bar (e.g., "http://192.168.0.10" or "192.168.0.10"), and then press the Enter.
3. Enter the user name (default: admin) and password (default: admin) in the login page and click Confirm.

Network Settings: Click on Network -> Basic -> IPv4 Config

You can configure the network settings in the following ways:

DHCP: By default, the phone attempts to contact a DHCP server in your network to obtain its valid network settings, e.g., IP address, subnet mask, gateway address and DNS address.

Static IP Address: If the phone cannot contact a DHCP server for any reason, you need to configure the IP address, subnet mask, gateway address, primary DNS address and secondary DNS address for the phone manually.

Note: The IP phone also supports IPv6, but IPv6 is disabled by default. The wrong network settings may result in inaccessibility of the phone and may have an impact on the network performance. Contact your system administrator for more information.

Account Settings: Click on Account -> Register

Parameters of the account:

Register Status: It shows the register status of the current account.
Line Active: You can select Enabled/Disabled to enable/disable the account.
Label: It is shown on the LCD screen to identify the account.
Display Name: It is shown as Caller ID when placing a call.
Register Name: It is an authenticated ID for authentication provided by ITSP (required).
User Name: It is provided by ITSP for registration (required).
Password: It is provided by ITSP for registration (required).
Server Host: It is provided by ITSP for registration (required).

Register status icons on the LCD screen:

Registered  Registering  Register Failed

Note: Check with your system administrator if any error appears during the registration process or a specific configuration is required for your registration.

Configuring via phone user interface

Network Settings:

Press the Menu soft key when the phone is idle, select Settings -> Advanced Settings (default password: admin) -> Network -> WAN Port/VLAN/Web Server/802.1x/VPN/LLDP/CDP/NAT to configure the network.

4. Press the Save soft key to accept the change.
About us

Founded in 2001, Yealink, a leading provider of VoIP Phone and IP communication solutions, has been focusing on VoIP products characterized by reliable quality, easy deployment and affordable price for more than a decade. Today, customers from over 140 countries rely on Yealink as the backbone of global collaboration to extend the value of network communications.

More about Yealink

Since 2001, Yealink has continued to develop state-of-the-art, hi-tech VoIP communication terminals that include IP video phones, IP phones and USB phones. With a worldwide market in more than 140 countries, the company has also established a first-class international service network.

Our priorities are quality, functionality, ease-of-use, customer support and competitive pricing. To provide new solutions for the future in this fast-evolving sector, Yealink’s large, talented and highly-experienced VoIP R&D team is totally committed to the pursuit of excellence.

To date, we have passed more than 80 interoperability tests and meet certification requirements set by leading VoIP system and platforms. Yealink works in close partnership with T-Mobile, Telefonica, Portugal Telecom and other leading telecommunication service providers.
