

Yealink VC Dual-camera Box VCB20

Yealink VC Dual-camera Box VCB20 is designed for connecting the codec to two cameras, which increases extensibility to middle and medium-sized meeting room. During the deployment, only two DVI cables and one power adapter is needed for connecting all the codec, the VCB20 and the VCC20 together. Moreover, if you want to extend the distance between the codec and the camera, using Yealink VC Camera Extension Adapter VCA70 is undoubtedly an attractive and simple way to satisfy your needs. Being an excellent camera solution for your meeting room, VCB20 supports up to 20 cameras preset, all the image parameters can be configured independently and you can easily choose the desired image by just one click.
