

T46S-Skype for Business[®] Edition

Quick Start Guide (V9.42)

Packaging Contents

The following items are included in your package. If you find anything missing, contact your system administrator.

Skype for Business Phone

Handset

Handset Cord

Quick Start Guide

Ethernet Cable
(2m CAT5E FTP Cable)

Power Adapter
(Optional)

Stand

Wall Mount Bracket
(Optional)

Note: We recommend that you use the accessories provided or approved by Yealink. The use of unapproved third-party accessories may result in reduced performance.

Assembling the Phone

1. Attach the stand, as shown below:

Desk Mount Method

Note: You can also mount the phone to a wall. For more information on how to attach the wall mount bracket, refer to Yealink Wall Mount Quick Installation Guide.

2. Connect the handset and optional headset, as shown below:

Wireless Headset Adapter EHS36

Note: The headset or wireless headset adapter EHS36 should be purchased separately. The EXT port can also be used to connect the expansion module EXP40. For more information on how to use the EHS36 and EXP40, refer to Yealink_EHS36_User_Guide and Yealink_EXP40-Skype_for_Business_Edition_Quick_Start_Guide.

3. Connect optional USB devices:

You can connect a Bluetooth USB dongle BT40, USB headset or USB flash drive (to record calls) to the USB port.

Note: The optional USB devices should be purchased separately.
For more information on how to use the BT40, refer to Yealink Bluetooth USB Dongle BT40 User Guide.

4. Connect the network and power, as shown below:

You have two options for network and power connections. Your system administrator will advise you which one to use.

Note: The Skype for Business phone should be used with Yealink original power adapter (5V/2A) only. The use of the third-party power adapter may cause the damage to the phone. If you are connecting a PC to your phone, we recommend that you use the Ethernet cable provided by Yealink.
If inline power (PoE) is provided, you don't need to connect the power adapter. Make sure the hub/switch is PoE-compliant.

Startup

After the Skype for Business phone is connected to the network and supplied with power, it automatically begins the initialization process. After startup, the sign-in screen appears on the LED screen.

Sign into or Sign Out of Your Skype for Business Account

You can sign into or sign out of your Skype for Business account on the phone.

To sign into your Skype for Business account:

1. Press the **Sign In** soft key.
2. Select a desired sign-in method.
3. Follow the onscreen prompts.

To sign out of your Skype for Business account:

1. Press the **Status** soft key when the phone is idle.
2. Press  or  to select **Sign Out**.

Phone Lock

If the Skype for Business server is configured to forcibly lock the phone, user can use phone lock feature to lock the phone to prevent it from unauthorized use.

The Skype for Business phone will prompt the user to create a lock PIN at the initial sign-in.

To set a lock PIN:

1. Enter the lock PIN in the **New PIN** field.
2. Press the **Next** soft key, and then enter the lock PIN again in the **Confirm PIN** field.
3. Press the **Save** soft key.

After you create a lock PIN, you can use it to unlock your phone.

To unlock the phone:

1. Press the **Unlock** soft key.
2. Enter the lock PIN.
3. Press the **Unlock** soft key or  to unlock the phone.

Update Your Presence Status

Your presence information is a quick way for other people to see your availability status. You can change it manually if you want to.

To update your presence status:

1. Press the **Status** soft key when the phone is idle.
2. Press  or  to select the desired status.

You can select **Reset Status** to change your status to **Available**.

Directory

The phone directory includes local directory and Skype for Business directory.

To add a local contact:

1. Press **Directory->Local Directory**.
2. Select the desired group, and then press the **Enter** soft key.
3. Press the **Add** soft key to add a contact.
4. Enter a unique contact name in the **Name** field and other information in the corresponding fields.
5. Press the **Save** soft key to accept the change.

To search for the local contacts:

1. Press **Directory->Local Directory->Search**.

2. Enter a few continuous characters of the contact name or continuous numbers of the contact number to search the local contact.

The phone automatically displays search results.

To search for the Skype for Business contact:

1. Press **Directory**->**Search**.
 2. Enter a few continuous characters of the contact name or continuous numbers of the contact number to search the Skype for Business contact.
- The phone automatically displays search results.

To add a Skype for Business contact:

1. Press  or  to highlight the desired contact after you search for the local contacts or Skype for Business contacts.
2. Press the **Option** soft key, and then press  or  to select **Add to SFB** from the prompt list.
3. Select the desired group, and then press the **OK** soft key.

To add a contact to the Favorites group:

When you add contacts to the **Favorites** group, those favorites display on the idle screen too. By default, local favorites are displayed before the Skype for Business favorites. Local favorites are indicated by the icon . Skype for Business favorites are indicated by the presence status icon.

To view a contact's information:

1. Press the **Directory** soft key.
 2. Select the desired group, and then press the **Enter** soft key.
 3. For local contacts: press the **Option** soft key, and then press  or  to select **Detail**.
For Skype for Business contacts: press the **Detail** soft key.
- The detailed information of the contact appears on the LCD screen.

To call contacts from the directory:

1. Press the **Directory** soft key.
2. Select the desired group, and then press the **Enter** soft key.
3. Select the desired contact, and then press the **Call** soft key.

3. Press the **Call** soft key to dial out.
4. After the party answers the call, press  or **Transfer** soft key to complete the transfer.

Using Better Together over Ethernet (BToE)

Better Together over Ethernet (BToE) enables you to place, hold, and answer calls on your phone and Skype for Business client on your computer. You can download the Yealink BToE Connector application from the Yealink Website and install the application on your computer.

Before you can begin using BToE, you must pair your phone with your computer.

To activate BToE:

1. Do one of the following:
 - Connect an Ethernet cable from your computer to the PC port on your phone.
 - Enter the phone IP address into the BToE application manually and click **OK**.If you are not signed into Skype for Business on your phone, a dialog box is displayed on your computer asking for your Skype for Business login credentials.
2. If the dialog box does not display on your computer, press the **Sign In** soft key on your phone and select **Sign in via PC**.
3. Enter your login credentials in the dialog box.

The same user account is signed into your phone and your Skype for Business client, so that the BToE is activated.

To place BToE calls, do one of the following:

- Hover your cursor over the avatar of the contact, and then click  in the Skype for Business client.
- Select a contact or enter the phone number, and then press the **Call** soft key on your phone.

To answer BToE calls, do one of the following:

- Click  in the Skype for Business client.
- Press the **Answer** soft key on your phone.

To hold BToE calls, do one of the following:

- Click , and then click  in the Skype for Business client.
- Press the **Hold** soft key or press  on your phone.

To resume a call, do one of the following:

- Click , and then click  in the Skype for Business client.
- Press the **Resume** soft key or press  on your phone.

To change the audio device during a call in the Skype for Business client:

1. Click , and then click  to change the audio device.
