5. New Features Description

1. Added the feature of Multi-tier Management.

Description: The service layers allow multi-tier management from distributor, sub-distributor, reseller or service provider and end user. Each tier of channel account (for distributor/ sub-distributor/reseller/SP) can manage the devices of end user and sub-channel accounts owned by them in the system.

2. Supported Yealink USB Device CP900 and CP700.

Description: You can perform remote diagnostics on Yealink USB devices CP900 and CP700 via Yealink Device Management Platform that you can generate the log files and save the log generated in the past 7 days.

Yealink Management Cloud Service Release Notes of Version 3.3.0.0

1. Introduction

- Firmware Version:
Yealink Management Cloud Service: 3.2.0.6 upgrades to 3.3.0.0
- Applicable Models: Yealink Management Cloud Service
- Release Date: Jul 23rd, 2019.

2. New Features

1. Compatible with Yealink MVC500, MVC800, SIP-T55A (Teams) and CP960 (Zoom).
2. Added the feature that you can manage Yealink MVC series via YMCS. In the platform, you can check the detailed information and connection status of MVC devices and the associated devices. Meanwhile, you can also perform remote deployment and management for the MVC devices, such as reboot and reset to factory.
3. Added the feature of Role Management that you can assign the function permission and data permission to a specific sub-administrator account.
4. Added the feature that you can use the standard REST API that we open the API interface for obtaining device information, configure & deploy devices in batch, remote control and diagnosis, etc. that is convenient for the enterprise to dock with the specific platforms.

3. Optimization

1. Optimized the feature that user can create multiple SIP account with the same user name for SCA.
2. Optimized the feature of Account Management that the server address can contain the underscore.
3. Optimized the feature that in the Global Parameter Settings, the Autop URL can contain the symbol "\$".

4. Bug Fixes

None
