No parts of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, photocopying, recording, or otherwise, for any purpose, without the express written permission of Yealink(Xiamen) Network Technology CO., LTD. Under the law, reproducing includes translating into another language or format.

When this publication is made available on media, Yealink(Xiamen) Network Technology CO., LTD. gives its consent to downloading and printing copies of the content provided in this file only for private use but not for redistribution. No parts of this publication may be subject to alteration, modification or commercial use. Yealink(Xiamen) Network Technology CO., LTD. will not be liable for any damages arising from use of an illegally modified or altered publication.

## Warranty

THE SPECIFICATIONS AND INFORMATION REGARDING THE PRODUCTS IN THIS GUIDE ARE SUBJECT TO CHANGE WITHOUT NOTICE. ALL STATEMENTS, INFORMATION, AND RECOMMENDATIONS IN THIS GUIDE ARE BELIEVED TO BE ACCURATE AND PRESENTED WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED. USERS MUST TAKE FULL RESPONSIBILITY FOR THEIR APPLICATION OF PRODUCTS.

YEALINK(XIAMEN) NETWORK TECHNOLOGY CO., LTD. MAKES NO WARRANTY OF ANY KIND WITH REGARD TO THIS GUIDE, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Yealink(Xiamen) Network Technology CO., LTD. shall not be liable for errors contained herein nor for incidental or consequential damages in connection with the furnishing, performance, or use of this guide.

## Declaration of Conformity

Hereby, Yealink(Xiamen) Network Technology CO., LTD. declares that this phone is in conformity with the essential requirements and other relevant provisions of the CE, FCC.

You can find the CE and FCC information from the label on the back of the IP phone.

Statements of compliance can be obtained by contacting [support@yealink.com](mailto:support@yealink.com).

## CE Mark Warning

This device is marked with the CE mark in compliance with EC Directives 2014/35/EU and 2014/30/EU.

### **Part 15 FCC Rules**

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and

2. this device must accept any interference received, including interference that may cause undesired operation.

## Industry Canada (IC)

This Class [B] digital apparatus complies with Canadian ICES-003 Rules.

## Class B Digital Device or Peripheral

Note: This device is tested and complies with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experience radio/TV technician for help.

## WEEE Warning

To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of WEEE as unsorted municipal waste and have to collect such WEEE separately.

## Customer Feedback

We are striving to improve our documentation quality and we appreciate your feedback. Email your opinions and comments to [DocsFeedback@yealink.com](mailto:DocsFeedback@yealink.com).

## GNU GPL INFORMATION

Yealink SIP-T23P/G IP phone firmware contains third-party software under the GNU General Public License (GPL).

Yealink uses software under the specific terms of the GPL. Please refer to the GPL for the exact terms and conditions of the license.

The original GPL license, source code of components licensed under GPL and used in Yealink products can be downloaded online:

<http://www.yealink.com/GPLOpenSource.aspx?BaseInfoCatId=293&NewsCatId=293&CatId=293>.

# About This Guide

Thank you for choosing the SIP-T23P/SIP-T23G (hereinafter referred to as SIP-T23P/G) IP phone, exquisitely designed to provide business telephony features, such as Call Hold, Call Transfer, Busy Lamp Field, Multicast Paging and Conference over an IP network. The difference between the SIP-T23P and SIP-T23G IP phones is that only SIP-T23G supports Gigabit network interface.

This guide provides everything you need to quickly use your new phone. First, verify with your system administrator that the IP network is ready for phone configuration. Also be sure to read the Packaging Contents and Regulatory Notices sections in this guide before you set up and use the SIP-T23P/G IP phone.

**Note**

Network Directory and Network Call Log features are hidden for IP phones in neutral firmware, which are designed for the BroadWorks environment. Please contact your system administrator for more information.

## In This Guide

Topics provided in this guide include:

- Chapter 1 [Overview](#)
- Chapter 2 [Getting Started](#)
- Chapter 3 [Customizing Your Phone](#)
- Chapter 4 [Basic Call Features](#)
- Chapter 5 [Advanced Phone Features](#)

## Summary of Changes

This section describes the changes to this guide for each release and guide version.

### Changes for Release 81, Guide Version 81.20

None

### Changes for Release 81, Guide Version 81.15

The contents in the following section are removed to [Frequently Asked Questions on Yealink IP Phones](#):

- Troubleshooting

The following sections are new:

- [Power Saving](#) on page 35
- [BLF Ring Type](#) on page 49

Major updates have occurred to the following section:

- [Incoming Intercom Calls](#) on page 147

## Changes for Release 81, Guide Version 81.10

The following section is new:

- [Key Tone](#) on page 48

Major updates have occurred to the following sections:

- [Basic Network Settings](#) on page 30
- [Language](#) on page 39
- [Phone Lock](#) on page 43
- [Volume](#) on page 46
- [DSS Keys](#) on page 69
- [Dial Plan](#) on page 81
- [Call Mute](#) on page 100
- [Do Not Disturb \(DND\)](#) on page 102
- [Call Transfer](#) on page 115
- [Call Park](#) on page 123
- [Busy Lamp Field \(BLF\)](#) on page 135
- [Intercom](#) on page 146
- [Multicast Paging](#) on page 149

## Changes for Release 80, Guide Version 80.95

The following section is new:

- [Entering Data and Editing Fields](#) on page 32

Major updates have occurred to the following sections:

- [Icon Instructions](#) on page 15
- [Optional Accessories](#) on page 24
- [Phone Installation](#) on page 25
- [Appendix](#) on page 185

## Changes for Release 80, Guide Version 80.60

The following sections are new:

- [Shared Call Appearance \(SCA\)](#) on page 158
- [Bridged Line Appearance \(BLA\)](#) on page 171

Major updates have occurred to the following sections:

- [Icon Instructions](#) on page 15
- [LED Instructions](#) on page 17
- [Web User Interface](#) on page 19
- [Call Forward](#) on page 107

## Changes for Release 80, Guide Version 80.20

The following sections are new:

- [Optional Accessories](#) on page 24
- [Short Message Service \(SMS\)](#) on page 176

Major updates have occurred to the following sections:

- [Web User Interface](#) on page 19
- [Time & Date](#) on page 40
- [ReCall](#) on page 100
- [Anonymous Call Rejection](#) on page 132
- [Intercom](#) on page 146
- [Multicast Paging](#) on page 149

## Overview

This chapter provides the overview of the SIP-T23P/G IP phone. Topics include:

- [Hardware Component Instructions](#)
- [Icon Instructions](#)
- [LED Instructions](#)
- [User Interfaces](#)
- [Documentations](#)

If you require additional information or assistance with your new phone, contact your system administrator.

## Hardware Component Instructions

The main hardware components of the SIP-T23P/G IP phone are the LCD screen and the keypad.

Hardware component instructions of the SIP-T23P/G IP phone are:

	Item	Description
①	LCD Screen	Shows information about calls, messages, soft keys, time, date and other relevant data: <ul style="list-style-type: none"> <li>• Default account</li> <li>• Call information—caller ID, call duration</li> <li>• Icons (for example, )</li> <li>• Missed call text or second incoming caller information</li> <li>• Prompt text (for example, "Saving config file!")</li> <li>• Time and date</li> </ul>
②	Power Indicator LED	Indicates phone power status and phone status. <ul style="list-style-type: none"> <li>• Receives an incoming call—Fast flashing</li> <li>• Receives a voice mail or text message—Slowly flashing</li> </ul>
③	Line Keys	Use these keys to activate up to three accounts and assign various features.
④	Soft Keys	Label automatically to identify their context-sensitive features.
⑤		Scroll through the displayed information.
		Confirms actions or answers incoming calls.
		Cancels actions, rejects incoming calls, mutes or un-mutes calls.
⑥	MESSAGE Key	Indicates and accesses voice mails.
⑦	HEADSET Key	Toggles the headset mode.
⑧	TRAN Key	Transfers a call to another party.
⑨	RD Key	Redials a previously dialed number.
⑩	Speakerphone Key	Toggles the hands-free speakerphone mode.
⑪	Volume Key	Adjusts the volume of the handset, headset, speaker or ringer.
⑫	Keypad	Provides the digits, letters and special characters in context-sensitive applications.
⑬	Speaker	Provides hands-free (speakerphone) audio output.
⑭	Hookswitch	<ul style="list-style-type: none"> <li>• Picking up the handset from the handset cradle, the hookswitch bounces and the phone connects to the line.</li> <li>• Laying the handset down on the handset cradle, the phone disconnects from the line.</li> </ul>
⑮	Hookswitch Tab	Secures the handset in the handset cradle when the IP phone is mounted vertically. For more information on how to adjust the hookswitch tab, refer to <a href="#">Yealink Wall Mount Quick Installation Guide for Yealink IP Phones</a> .

## Icon Instructions

### Feature Status Icons

Icons appearing on the status bar are described in the following table:

Icons	Description
	Network is unavailable
	Hands-free speakerphone mode
	Handset mode
	Headset mode
	Voice Mail
	Text Message
	Auto Answer
	Do Not Disturb (DND)
	Ringer volume is 0
	Phone Lock
	Keep Mute
	Missed Calls
	Call Forward

### Line Key Icons

**Icon indicator** (associated with line)

Icons	Description
	The private line registers successfully

Icons	Description
	Register failed
	Registering
	The shared/bridged line registers successfully
	DND is enabled on this line
	Call forward is enabled on this line

**Icon indicator** (associated with ACD)

Icon	Description
	The ACD state is available
 and x	The ACD state is unavailable
	The ACD state is Wrap up
	Logged out of the ACD system

## Other Icons

**Icon indicator** (associated with call recording)

Icons	Description
	Recording box is full
	A call cannot be recorded
	Recording starts successfully
	Recording cannot be started
	Recording cannot be stopped

**Icon indicator** (associated with call history)

Icons	Description
	Received Calls
	Placed Calls
	Missed Calls
	Forwarded Calls

**Icon indicator** (associated with contact)

Icons	Description
	The contact icon

## LED Instructions

### Power Indicator LED

LED Status	Description
Solid red	The phone is initializing.
Fast flashing red (300ms)	The phone is ringing.
Slowly flashing red (1s)	The phone receives a voice mail or text message.
Off	The phone is powered off. The phone is idle. The phone is busy. The call is placed on hold or is held. The call is muted.

### Line key LED

LED Status	Description
Solid green	The line is seized. The line is in conversation.
Fast flashing green	The line receives an incoming call.
Slowly flashing green	The call is placed on hold.
Off	The line is inactive.

**Line key LED** (configured as a BLF key or BLF List key)

LED Status	Description
Solid green	The monitored user is idle.
Fast flashing red (200ms)	The monitored user receives an incoming call.
Solid red	The monitored user is busy. The monitored user's conversation is placed on hold (This LED status requires server support).
Slowly flashing red (1s)	The call is parked against the monitored user's phone number.
Off	The monitored user does not exist.

**Line key LED** (associated with a shared line)

The local SCA phone indicates the phone is involved in an SCA call, while the monitoring SCA phone indicates the phone is not involved in the SCA call.

LED Status	Description
Off	The shared line is idle.
Fast flashing green	The shared line receives an incoming call.
Solid green (for local SCA phone) Solid red (for monitoring SCA phone)	The shared line is in conversation. The shared line is dialing. The shared line is seized. The shared line conversation is barged in by the other shared line party.
Slowly flashing green (for local SCA phone) Slowly flashing red (for monitoring SCA phone)	The shared line conversation is placed on public hold.
Slowly flashing green (for local SCA phone) Solid red (for monitoring SCA phone)	The shared line conversation is placed on private hold. For a multi-party call, all the shared line parties participating in this call place the shared line conversation on hold.

**Line key LED** (associated with a bridged line)

The local BLA phone indicates the phone is involved in a BLA call, while the monitoring BLA phone indicates the phone is not involved in the BLA call.

LED Status	Description
Off	The bridged line is idle.
Fast flashing green	The bridged line receives an incoming call.

LED Status	Description
Solid green (for local BLA phone)	The bridged line is in conversation.
Solid red (for monitoring BLA phone)	The bridged line is dialing. The bridged line is seized.
Slowly flashing green (for local BLA phone)	The bridged line conversation is placed on hold.
Slowly flashing red (for monitoring BLA phone)	

**Note**

The above introduces the default LED status. The statuses of the power indicator LED and BLF key LED are configurable via web user interface. You can also customize the BLF key LED status and BLF key behavior. For more information, contact your system administrator.

## User Interfaces

Two ways to customize configurations of your SIP-T23P/G IP phone:

- The user interface on the IP phone.
- The user interface in a web browser on your PC.

The hardware components keypad and LCD screen constitute the phone user interface, which allows the user to execute all call operation tasks and basic configuration changes directly on the phone. In addition, you can use the web user interface to access all configuration settings. In many cases, either the phone user interface and/or the web user interface interchangeably. However, in some cases, it is only possible to use one or the other interface to operate the phone and change settings.

### Phone User Interface

You can customize your phone by pressing the **Menu** soft key to access the phone user interface. The Advanced Settings option is only accessible to the administrator, and the default administrator password is "admin" (case-sensitive). For more information on customizing your phone with the available options from the phone user interface, refer to [Customizing Your Phone](#) on page 35.

**Note**

For a better understanding of the menu structure, please refer to [Appendix B – Menu Structure](#) on page 187.

### Web User Interface

In addition to the phone user interface, you can also customize your phone via web user

interface. In order to access the web user interface, you need to know the IP address of your new phone. To obtain the IP address, press the OK key on the phone when the phone is idle. Enter the IP address (e.g., <http://192.168.0.10> or 192.168.0.10 for IPv4; [http://\[2005:1:1:1:215:65ff:fe64:6e0a\]](http://[2005:1:1:1:215:65ff:fe64:6e0a]) or [2005:1:1:1:215:65ff:fe64:6e0a] for IPv6) in the address bar of a web browser on your PC. The default administrator user name and password are both "admin" (case-sensitive).

**Note**

The access of Advanced settings page of the Account or Network web page may be restricted by the web explorer (e.g., Chrome, Firebox) if you have installed "Adblock Plus plugin".

The options you can use to customize the IP phone via phone user interface and/or via web user interface are listed in the following table:

Options	Phone User Interface	Web User Interface
<b>Status</b>	✓	✓
--IPv4		
--MAC Address		
--Firmware		
--Network		
--Phone		
--Accounts		
<b>Basic Phone Settings</b>	✓	✓

--SIP Server 1/2	✓	
--Register Port	x	
--Outbound Status	✓	
--Outbound Proxy1/2	✓	
--Fallback Interval	✓	
--NAT Status	✓	

**Note**

The table above lists most of the feature options. Please refer to the relevant sections for more information.

## Documentations

The following table shows documentations available for the SIP-T23P/G IP phone.

Name	Contents	Where found	Language
Quick Start Guide	Basic call features and phone customizations	In the package	English
		On the website	English/Chinese
User Guide	Phone/Web user interface settings Basic call features and advanced phone features	On the website	English/Chinese

**Note**

You can also download the latest documentations online:  
<http://support.yealink.com/documentFront/forwardToDocumentDetailPage?documentId=33> and  
<http://support.yealink.com/documentFront/forwardToDocumentDetailPage?documentId=18>.

# Getting Started

This chapter provides basic installation instructions and information for obtaining the best performance with the SIP-T23P/G IP phone. Topics include:

- [Packaging Contents](#)
- [Phone Installation](#)
- [Phone Initialization](#)
- [Phone Status](#)
- [Basic Network Settings](#)
- [Registration](#)
- [Idle Screen](#)
- [Entering Data and Editing Fields](#)

If you require additional information or assistance with your new phone, contact your system administrator.

## Packaging Contents

The following components are included in your SIP-T23P/G IP phone package:

- **SIP-T23P/G IP Phone**

- **Phone Stand**

- **Handset & Handset Cord**

- **Ethernet Cable**

- **Quick Start Guide**

Check the list before installation. If you find anything missing, contact your system administrator.

## Optional Accessories

The following items are optional accessories for your SIP-T23P/G IP phone. You need to purchase them separately if required.

- **Power Adapter (5.5mm DC plug)**

- **Headset**

**Note**

We recommend that you use the accessories provided or approved by Yealink. The use of unapproved third-party accessories may result in reduced performance.

## Phone Installation

If your phone is already installed, proceed to [Phone Initialization](#) on page 28.

This section introduces how to install the phone:

- 1) Attach the stand
- 2) Connect the handset and optional headset
- 3) Connect the network and power

### 1) Attach the stand

#### Note

The hookswitch tab has a lip which allows the handset to stay on-hook when the IP phone is mounted vertically.

### 2) Connect the handset and optional headset

### 3) Connect the network and power

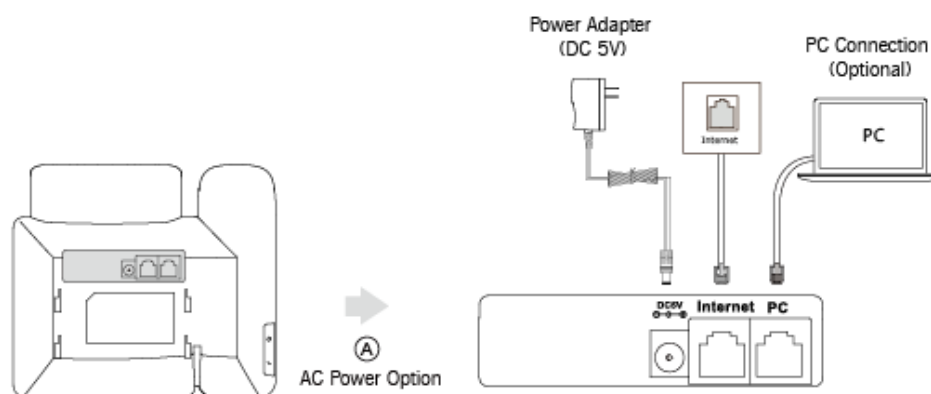

You have two options for power and network connections. Your system administrator will advise you which one to use.

- AC power
- Power over Ethernet (PoE)

## AC Power

### To connect the AC power:

1. Connect the DC plug on the power adapter to the DC5V port on the phone and connect the other end of the power adapter into an electrical power outlet.
2. Connect the included or a standard Ethernet cable between the Internet port on the phone and the one on the wall or switch/hub device port.

### Note

The IP phone should be used with Yealink original power adapter (5V/600mA) only. The use of the third-party power adapter may cause the damage to the phone.

## Power over Ethernet

With the included or a regular Ethernet cable, the SIP-T23P/G IP phone can be powered from a PoE-compliant switch or hub.

### To connect the PoE for the SIP-T23P/G IP phone:

1. Connect the Ethernet cable between the Internet port on the phone and an available port on the in-line power switch/hub.

### Note

If in-line power is provided, you don't need to connect the phone to the power adapter. Make sure the switch/hub is PoE-compliant.

The phone can also share the network with another network device such as a PC (personal computer). This is an optional connection.

**Important!** Do not remove power from the phone while it is updating firmware and configurations.

## Phone Initialization

After your phone is powered on, the system boots up and performs the following steps:

### Automatic Phone Initialization

The phone finishes the initialization by loading the saved configuration. The LCD screen displays "Welcome Initializing...please wait" during this process.

### DHCP (Dynamic Host Configuration Protocol)

The phone attempts to contact a DHCP server in your network to obtain valid IPv4 network settings (e.g., IP address, subnet mask, default gateway address and DNS address) by default.

### Note

If your network does not use DHCP, proceed to [Basic Network Settings](#) on page 30.

## Phone Status

You can view phone status via phone user interface or web user interface.

Available information of phone status includes:

- Network status (IPv4 status or IPv6 status, IP mode and MAC address).
  - IPv4 uses a 32-bit address.
  - IPv6 is an updated version of the current Internet Protocol to meet the increased demands for unique IP addresses, using a 128-bit address.
- Phone status (product name, hardware version, firmware version, product ID, MAC address and device certificate status).
- Account status (register status of SIP accounts).

### To view the phone status via phone user interface:

1. Press , or press **Menu->Status**.
2. Press  or  to scroll through the list and view the specific information.

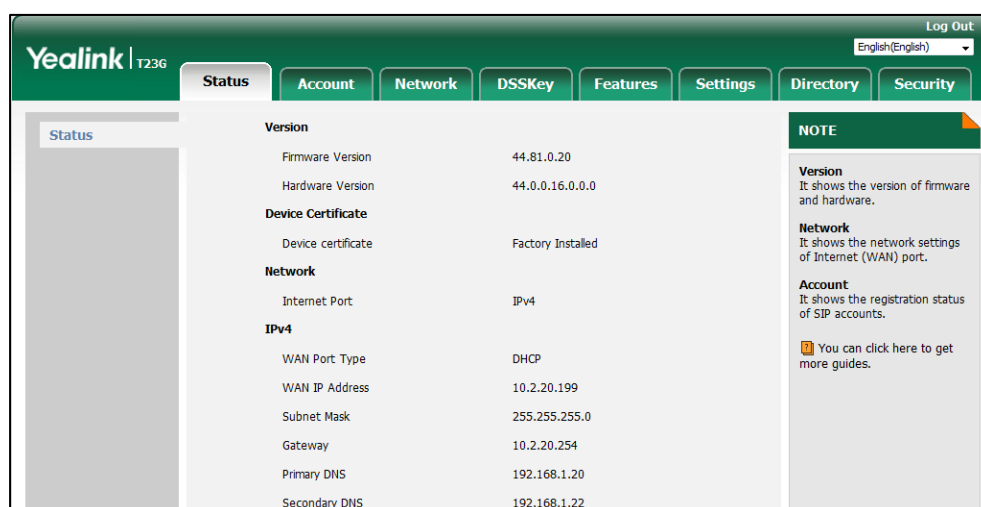

### To view the phone status via web user interface:

1. Open a web browser of your computer.
2. Enter the IP address in the browser's address bar, and then press the **Enter** key.  
(e.g., "http://192.168.0.10" for IPv4 or "http://[2005:1:1:1:215:65ff:fe64:6e0a]" for IPv6).
3. Enter the user name (admin) and password (admin) in the login page.

4. Click **Confirm** to login.

The phone status is displayed on the first page of the web user interface.

**Note** If IP mode of the phone is configured as **IPv4 & IPv6**, you can enter either of them in the browser's address bar to view the phone status. IPv6 is not available on all servers. Contact your system administrator for more information.

## Basic Network Settings

If your phone cannot contact a DHCP server for any reason, you need to configure network settings manually. The IP phone can support either or both IPv4 and IPv6 addresses.

**To configure the IP mode via phone user interface:**

1. Press **Menu->Settings->Advanced Settings** (default password: admin) -> **Network->WAN Port**.
2. Press **◀** or **▶** to select **IPv4**, **IPv6** or **IPv4 & IPv6** from the **IP Mode** field.

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

You can configure a static IPv4 address for the IP phone. Before configuring it, make sure that the IP mode is configured as **IPv4** or **IPv4 & IPv6**.

**To configure a static IPv4 address via phone user interface:**

1. Press **Menu->Settings->Advanced Settings** (default password: admin)  
->**Network->WAN Port**.
2. Press  to select the **IPv4** and then press the **Enter** soft key.
3. Press  to select **Static IPv4 Client** and then press the **Enter** soft key.
4. Enter the desired value in the **IP Address**, **Subnet Mask**, **Default Gateway**, **Pri.DNS** and **Sec.DNS** field respectively.

5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

You can configure a static IPv6 address for the IP phone. Before configuring it, make sure that the IP mode is configured as **IPv6** or **IPv4 & IPv6**.

**To configure a static IPv6 address via phone user interface:**

1. Press **Menu->Settings->Advanced Settings** (default password: admin)  
->**Network->WAN Port**.
2. Press  to select **IPv6** and then press the **Enter** soft key.
3. Press  to select **Static IPv6 Client** and then press the **Enter** soft key.
4. Enter the desired value in the **IP Address**, **IPv6 IP Prefix**, **Default Gateway**, **Pri.DNS** and **Sec.DNS** field respectively.

5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

**Note**

The wrong network settings may result in inaccessibility of your phone and may also have an impact on your network performance. For more information on these parameters, contact your system administrator.

# Registration

Generally, your phone will be deployed with multiple other phones. In this case, your system administrator will configure the phone parameters beforehand, so that after you start up your phone, the phone will be registered and ready for use. The SIP-T23P/G IP phone supports up to 3 accounts. If your phone is not registered, you may have to register it. For more information on how to register your phone, refer to [Account Management](#) on page 79.

# Idle Screen

If the phone has successfully started up, the idle LCD screen will be displayed as below.

The idle screen displays the label of default account, time and date, and four soft keys.

**Note**

You can configure the phone not to display the label of default account, contact your system administrator for more information.

# Entering Data and Editing Fields

You can enter data and edit fields using the phone keypad.

Keypad on the phone provides different characters (or numbers) when using the **2aB**, **abc**, **Abc**, **ABC** or **123** input mode. You can change the following input modes to enter data and edit fields on your phone. When your phone keypad matches the input mode, you can press the keypad repeatedly to view the character (or number) options and stop to select. When the character (or number) you want to enter displays in the field, wait one second, and enter the next character (or number).

The following table lists the input modes and character (or number) options for the keypad:

<b>Input Mode</b> <b>Keypad</b>	<b>2aB</b>	<b>abc</b>	<b>Abc</b> (initials in capitals)	<b>ABC</b>	<b>123</b>
	1				1
	2abcABC	abc2äæååå åãç	abc2äæååå åãç	ABC2ÄÆÅ ÀÁÃÇ	2

Input Mode Keypad	2aB	abc	Abc (initials in capitals)	ABC	123
	3defDEF	def3èéèëð	def3èéèëð	DEF3ÈÉÊËÐ	3
	4ghiGHI	ghi4ìíî	ghi4ìíî	GHI4ÌÍÎ	4
	5jklJKL	jkl5£	jkl5£	JKL5£	5
	6mnoMNO	mno6öøòó ôõñ	mno6öøòó ôõñ	MNO6ÖØÒÓ ÔÕÑ	6
	7pqrsPQRS	pqrs7ßS	pqrs7ßS	PQRS7S	7
	8tuvTUV	tuv8ùúûü	tuv8ùúûü	TUV8ÙÚÛÜ Û	8
	9wxyzWXY Z	wxyz9ýþ	wxyz9ýþ	WXYZ9ÝÞ	9
	0	space	space	space	0
	*, '?! \-()@/: _+&%=<> £ \$¥¤□{}~ ^_`~\$#~	*, '?! \-()@/: _+&%=<> £ \$¥¤□{}~ ^_`~\$#~	*, '?! \-()@/: _+&%=<> £ \$¥¤□{}~ ^_`~\$#~	*, '?! \-()@/: _+&%=<> £ \$¥¤□{}~ ^_`~\$#~	*, '?! \-()@/: _+&%=<> £ \$¥¤□{}~ ^_`~\$#~
	#	#	#	#	#

**To enter or edit data:**

Do one of the following:

If you want to	Then you can
Enter only digits (1), uppercase (A) characters, lowercase (a) characters, or alphanumeric (2aB) characters.	<p>Press a keypad key one or more times (depending what input mode you're in) to enter the characters that is displayed on the keypad key.</p> <p>You can press the <b>abc</b> soft key one or more times to switch among uppercase (<b>ABC</b> soft key), numeric (<b>123</b> soft key), alphanumeric (<b>2aB</b> soft key), uppercase and lowercase (<b>Abc</b> soft key) and lowercase (<b>abc</b> soft key) input modes.</p> <p>For example, if the input mode is <b>ABC</b>:</p> <ul style="list-style-type: none"> <li>- To enter "A", press  once.</li> </ul>

If you want to	Then you can
	<ul style="list-style-type: none"> <li>- To enter "B", press  twice quickly.</li> <li>- To enter "C", press  three times quickly.</li> <li>- To enter "ZÄËÄÅÄÃÇ", press  more than three times quickly.</li> </ul> <p><b>Note:</b> When you are in the uppercase (<b>ABC</b> soft key), uppercase and lowercase (<b>Abc</b> soft key) or lowercase (<b>abc</b> soft key) input mode,  is not available.</p>
Enter special characters.	<p>Press the keypad key  or , or press .</p> <p><b>For  Key:</b></p> <ul style="list-style-type: none"> <li>- If it is in the uppercase (<b>ABC</b> soft key), uppercase and lowercase (<b>Abc</b> soft key) or lowercase (<b>abc</b> soft key) input mode, it will provide the space character.</li> <li>- If it is in the numeric (<b>123</b> soft key) or alphanumeric (<b>2aB</b> soft key) input mode, it will only provide the digit <b>0</b>.</li> </ul> <p><b>For  key:</b></p> <ul style="list-style-type: none"> <li>- It only provides the pound character #.</li> </ul> <p><b>For  key:</b></p> <ul style="list-style-type: none"> <li>- If it is in the uppercase (<b>ABC</b> soft key), lowercase (<b>abc</b> soft key), uppercase and lowercase (<b>Abc</b> soft key) or alphanumeric (<b>2aB</b> soft key) input mode, it will provide the following special characters:  <b>*.,?!\"-()@/,:;+&amp;%=&lt;&gt; £ \$¥ ¢ [] {} ~ ^ ¡ ¢ § # "  .</b></li> <li>- If it is in the numeric (<b>123</b> soft key) input mode, it will provide the following special characters: <b>.*:/@[]</b>.</li> </ul>
Delete text you entered.	<p>Press  or  to position the cursor to the right of the text you want to delete, and then press the <b>Delete</b> soft key to delete one character at a time.</p>

# Customizing Your Phone

---

You can customize your SIP-T23P/G IP phone by personally configuring certain settings, for example, contrast, language and time & date. You can add contacts to the phone's local directory manually or from call history. You can also personalize different ring tones for different callers.

This chapter provides basic operating instructions for customizing your phone. Topics include:

- [General Settings](#)
- [Audio Settings](#)
- [Contact Management](#)
- [Call History Management](#)
- [Search Source List in Dialing](#)
- [System Customizations](#)

If you require additional information or assistance with your new phone, contact your system administrator.

## General Settings

### Power Saving

The power saving feature is used to turn off the backlight to conserve energy. The IP phone enters power-saving mode after it has been idle for a certain period of time.

**The IP phone will exit power-saving mode if a phone event occurs:**

- Press any key.
- Pick up the handset.
- Hang up the handset.
- There is an incoming call.
- A new prompt (e.g., missed call, new voice mail or forwarded call).
- The status of BLF key changes.

If the screen saver is enabled on your phone, power-saving mode will still occur.

You can configure the following power-saving settings:

- Office Hour
- Idle Timeout (minutes)

**Note** Power saving is configurable via web user interface only.

## Enabling the Power Saving via Web User Interface

The office hour and idle timeout (minutes) settings work only if the power saving feature is enabled.

**To enable the power saving feature via web user interface:**

1. Click on **Settings->Power Saving**.
2. Select **Enabled** from the pull-down list of **Power Saving**.

The screenshot shows the Yealink T236 web interface. The 'Settings' tab is selected, and the 'Power Saving' option is highlighted in the left sidebar. The 'Power Saving' dropdown menu is set to 'Enabled'. Below this, the 'Office Hour' section displays a table for configuring office hours for each day of the week. The 'Idle TimeOut (minutes)' section includes input fields for 'Office Hour Idle TimeOut' (360), 'Off Hour Idle TimeOut' (10), and 'User Input Extension Idle TimeOut' (10). A 'Confirm' button is located at the bottom of the settings area.

Day	Start Time	End Time
Monday	07	19
Tuesday	07	19
Wednesday	07	19
Thursday	07	19
Friday	07	19
Saturday	07	07
Sunday	07	07

3. Click **Confirm** to accept the change.

## Configuring the Office Hour via Web User Interface

Office Hour specifies the starting time and ending time in the office each day.

**To configure the office hour via web user interface:**

1. Click on **Settings->Power Saving**.
2. Select a desired day of the week.

3. Enter the starting time and ending time respectively in the desired day field.

The screenshot shows the Yealink T236 web interface. The 'Settings' tab is selected, and the 'Power Saving' section is active. The 'Office Hour' section is highlighted with a red box, showing a table for days of the week with start and end time dropdowns. Below it are fields for 'Idle TimeOut (minutes)' for Office Hour, Off Hour, and User Input Extension. A 'Confirm' button is visible at the bottom.

Day	Start Time	End Time
Monday	07	19
Tuesday	07	19
Wednesday	07	19
Thursday	07	19
Friday	07	19
Saturday	07	07
Sunday	07	07

**Idle TimeOut (minutes)**

Office Hour Idle TimeOut: 360

Off Hour Idle TimeOut: 10

User Input Extension Idle TimeOut: 10

Buttons: Confirm, Cancel

4. Click **Confirm** to accept the change.

## Configuring the Idle Timeout via Web User Interface

Idle Timeout specifies the period of time before the IP phone enters power-saving mode. The following three types of idle timeout you can configure:

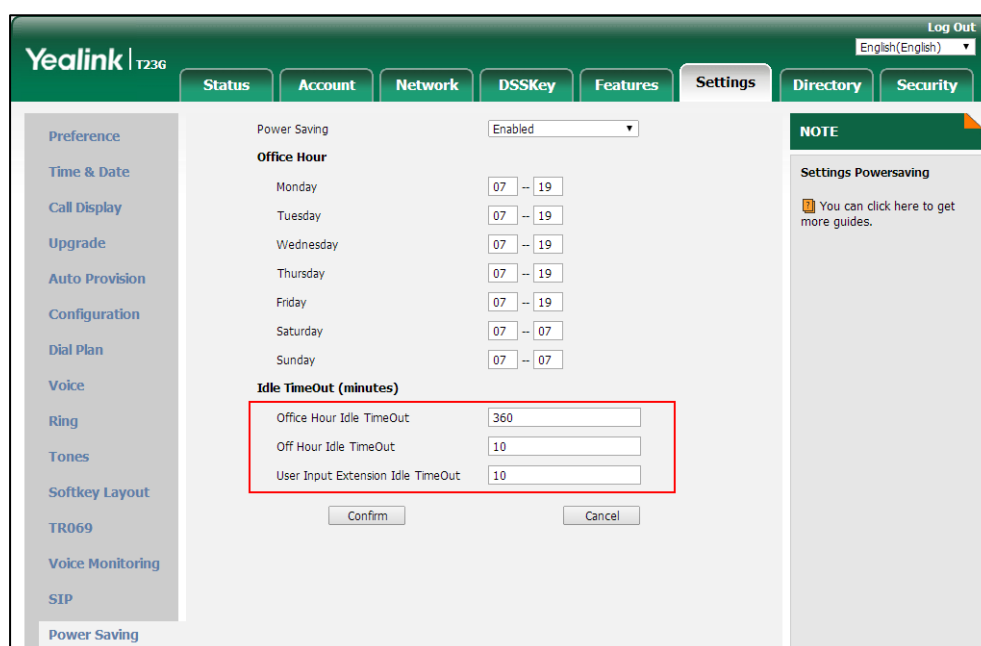

- **Office Hours Idle TimeOut:** Configures the idle timeout for office hours.
- **Off Hours Idle TimeOut:** Configures the idle timeout for non-office hours.
- **User Input Extension Idle TimeOut:** Configures idle timeout that applies after you use the IP phone (for example, press a key on the phone or pick up/hang up the handset).

By default, the Office Hours Idle Timeout is much longer than the Off Hours Idle Timeout. If you use the IP phone, the idle timeout that applies (User Input Extension Idle TimeOut or Office Hours/Off Hours Idle TimeOut) is the timeout with the highest value. If the phone has an incoming call or new message, the User Input Extension Idle TimeOut is ignored.

### To configure the idle timeout via web user interface:

1. Click on **Settings->Power Saving**.
2. Enter the desired value in the **Office Hours Idle TimeOut** field.  
The default value is 960, you can set to 1-960.
3. Enter the desired value in the **Off Hours Idle TimeOut** field.  
The default value is 10, you can set to 1-10.
4. Enter the desired value in the **User Input Extension Idle TimeOut** field.

The default value is 10, you can set to 1-30.

- Click **Confirm** to accept the change.

## Backlight

You can configure the backlight to adjust the brightness of the LCD screen. Backlight status on the LCD screen can be configured from the following options:

- Always On:** Backlight is on permanently.
- Always Off:** Backlight is off permanently.
- 15s, 30s, 1min, 2min, 5min, 10min or 30min:** Backlight is turned off when the phone is inactive after the designated time (in seconds).

**To configure the backlight via phone user interface:**

- Press **Menu->Settings->Basic Settings->Display->Backlight**.
- Press or , or the **Switch** soft key to select the desired time from the **Backlight Time** field.

- Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Backlight is configurable via web user interface at the path **Settings->Preference**.

## Contrast

You can configure the LCD screen contrast to a comfortable level. The intensity of contrast ranges from 1 to 10 and the highest intensity is 10.

### To configure the contrast via phone user interface:

1. Press **Menu->Settings->Basic Settings->Display->Contrast**.
2. Press ◀ or ▶, or the **Switch** soft key to increase or decrease the intensity of contrast.  
The default contrast level is "6".

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Contrast is configurable via web user interface at the path **Settings->Preference**.

## Language

The default language of the phone user interface is English. If the language of your web browser is not supported by the phone, the web user interface will use English by default. You can change the language for the phone user interface and the web user interface respectively.

### To change the language for the phone user interface:

1. Press **Menu->Settings->Basic Settings->Language**.
2. Press ▲ or ▼ to select the desired language.

3. Press the **Save** soft key to accept the change.

Text displayed on the phone user interface will change to the selected language.

**To change the language for the web user interface:**

1. Select the desired language from the pull-down list at the top-right corner of web user interface.

Text displayed on the web user interface will change to the selected language.

## Time & Date

The time and date are displayed on the LCD screen when the phone is idle. You can configure the phone to obtain the time and date from the SNTP server automatically, or configure the time and date manually. If the phone cannot obtain the time and date from the Simple Network Time Protocol (SNTP) server, contact your system administrator for more information.

**To configure the SNTP settings via phone user interface:**

1. Press **Menu**->**Settings**->**Basic Settings**->**Time & Date**->**SNTP Settings**.
2. Press or , or the **Switch** soft key to select the time zone that applies to your area from the **Time Zone** field.

The default time zone is "+8".

3. Enter the domain name or IP address of SNTP server in the **NTP Server1** and **NTP Server2** field respectively.
4. Press or , or the **Switch** soft key to select the desired value from the **Daylight Saving** field.
5. Press or , or the **Switch** soft key to select the desired time zone name from the **Location** field.

This field appears only if **Daylight Saving** field is selected **Automatic**.

The default time zone name is "China(Beijing)".

6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

**Note**

Please refer to [Appendix A - Time Zones](#) for the list of available time zones on the IP phone.

**To configure the time and date manually via phone user interface:**

1. Press **Menu->Settings->Basic Settings->Time & Date->Manual Settings**.
2. Enter the specific date in the **Date(YMD)** field.
3. Enter the specific time in the **Time(HMS)** field.

Manual Settings

1. Date(YMD): 15-05-16

2. Time(HMS): 10:39:08

Back Save

4. Press the **Save** soft key to accept the change.  
The date and time displayed on the LCD screen will change accordingly.

**To configure the time and date format via phone user interface:**

1. Press **Menu->Settings->Basic Settings->Time & Date->Time & Date Format**.
2. Press or , or the **Switch** soft key to select the desired time format (**12 Hour** or **24 Hour**) from the **Time Format** field.

Time & Date Format

1. Time Format:

24 Hour

Back Switch Save

3. Press or , or the **Switch** soft key to select the desired date format from the **Date Format** field.
4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

There are 7 available date formats. For example, for the date format "WWW DD MMM", "WWW" represents the abbreviation of the weekday, "DD" represents the two-digit day, and "MMM" represents the first three letters of the month.

The date formats available:

Date Format	Example (2016-09-02)
WWW MMM DD	Fri, Sep 02
DD-MMM-YY	02-Sep-16

Date Format	Example (2016-09-02)
YYYY-MM-DD	2016-09-02
DD/MM/YYYY	02/09/2016
MM/DD/YY	09/02/16
DD MMM YYYY	02 Sep, 2016
WWW DD MMM	Fri, 02 Sep

Time and date are configurable via web user interface at the path **Settings->Time & Date**.

#### Note

You can also customize the date format. Contact your system administrator for more information.

## Administrator Password

The Advanced Settings option is only accessible to the administrator. The default administrator password is "admin". For security reasons, you should change the default administrator password as soon as possible.

**To change the administrator password via phone user interface:**

1. Press **Menu->Settings->Advanced Settings** (default password: admin) -> **Change Password**.
2. Enter the current password in the **Old PWD** field.

3. Enter the new password in the **New PWD** field.
4. Re-enter the new password in the **Confirm PWD** field.
5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Administrator password is configurable via web user interface at the path **Security->Password**.

## Key As Send

You can set the "#" key or "\*" key to perform as a send key while dialing.

**To configure key as send via phone user interface:**

1. Press **Menu->Features->Key As Send**.

2. Press  or , or the **Switch** soft key to select # or \* from the **Key As Send** field, or select **Disabled** to disable this feature.

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Key as send is configurable via web user interface at the path **Features->General Information**.

## Phone Lock

You can lock your phone temporarily when you are not using it. This feature helps to protect your phone from unauthorized use.

Phone lock consists of the following:

- Menu Key:** The **Menu** soft key is locked. You cannot access the menu of the phone until unlocked.
- Function Keys:** The function keys are locked. You cannot use the MESSAGE, RD, TRAN, OK, X, navigation keys and soft keys until unlocked.
- All Keys:** All keys are locked except the Volume key, digit keys, # key, \* key and Speakerphone key. You are only allowed to dial emergency numbers, reject incoming calls by pressing the X key or the **Reject** soft key, answer incoming calls by lifting the handset, pressing the Speakerphone key, the HEADSET key, the OK key, or the **Answer** soft key, mute an active call by pressing the X key, and end the call by hanging up the handset, pressing the Speakerphone key or the **EndCall** soft key.

### Note

The emergency number setting, if desired, must be set before lock activation. For more information, refer to [Emergency Number](#) on page 87.

### To activate the phone lock via phone user interface:

1. Press **Menu->Settings->Basic Settings->Phone Lock**.
2. Enter the desired PIN (default PIN: 123) in the **Unlock PIN** field, and then press the **OK** soft key.

- Press  or , or the **Switch** soft key to select **Enabled** from the **Lock Enable** field.

- Press  or , or the **Switch** soft key to select the desired type from the **Lock Type** field.

- (Optional.) Enter the desired interval of automatic phone lock in the **Lock Time Out** field.  
The default timeout is 0. It means the phone will not be automatically locked. You need to long press  to lock it immediately when the phone is idle.  
If it is set to other values except 0 (e.g., 5), the phone will be locked when the phone is inactive in idle screen for the designated time (in seconds).
- Press the **Save** soft key to accept the change.

When the phone is locked, the LCD screen prompts "Phone locked." and displays the icon .

#### To change the phone unlock PIN via phone user interface:

- Press **Menu->Settings->Basic Settings->Change PIN**.
- Enter the desired value in the **Old PIN**, **New PIN** and **Confirm PIN** field respectively.

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

**Note**

The unlock PIN length must be within 15 digits.

**To unlock the phone via phone user interface:**

1. Press any locked key, enter the "Phone Lock" screen.

2. Enter the desired PIN in the **Unlock PIN** field.
3. Press the **OK** soft key to unlock the phone.

The icon  disappears from the LCD screen.

You can long press  or wait for a period of time (if configured) to lock the phone again.

**Note**

You can also unlock the phone by administrator password. When you enter the administrator password to unlock the phone, the phone will turn to the Change PIN screen.

**To deactivate the phone lock via phone user interface:**

1. Press **Menu->Settings->Basic Settings->Phone Lock**.
2. Enter the desired PIN (default PIN: 123) in the **Unlock PIN** field, and then press the **OK** soft key.
3. Press  or , or the **Switch** soft key to select **Disabled** from the **Lock Enable** field.

4. Press the **Save** soft key to accept the change.

Phone lock is configurable via web user interface at the path **Features->Phone Lock**.

## Audio Settings

### Volume

You can press the Volume key to adjust the ringer volume when the phone is idle or ringing. You can also press the Volume key to adjust the receiver volume of currently engaged audio devices (handset, speakerphone or headset) when the phone is in use.

#### To adjust the ringer volume:

When the phone is idle:

1. Press  to adjust the ringer volume.

When the phone is ringing:

1. Press  to adjust the ringer volume.

You can also press  to adjust the ringer volume when selecting a ring tone. For more information, refer to [Ring Tones](#) on page 47.

#### Note

If ringer volume is adjusted to minimum, the icon  will appear on the LCD screen.

#### To adjust the volume when the phone is during a call:

1. Press  to adjust the volume of currently engaged audio device (handset, speakerphone or headset).

## Ring Tones

Ring tones are used to indicate incoming calls. You can select different ring tones to distinguish different accounts registered on your phone, or to distinguish your phone from your neighbor's.

**To select a ring tone for the phone via phone user interface:**

1. Press **Menu->Settings->Basic Settings->Sound->Ring Tones->Common**.
2. Press  or  to select the desired ring tone.
3. (Optional.) Press  to adjust the ringer volume.

4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

A ring tone for the phone is configurable via web user interface at the path **Settings->Preference->Ring Type**.

**To select a ring tone for the account via phone user interface:**

1. Press **Menu->Settings->Basic Settings->Sound->Ring Tones**.
2. Press  or  to select the desired account and then press the **Enter** soft key.

3. Press  or  to select the desired ring tone.

If **Common** is selected, this account will use the ring tone selected for the phone.

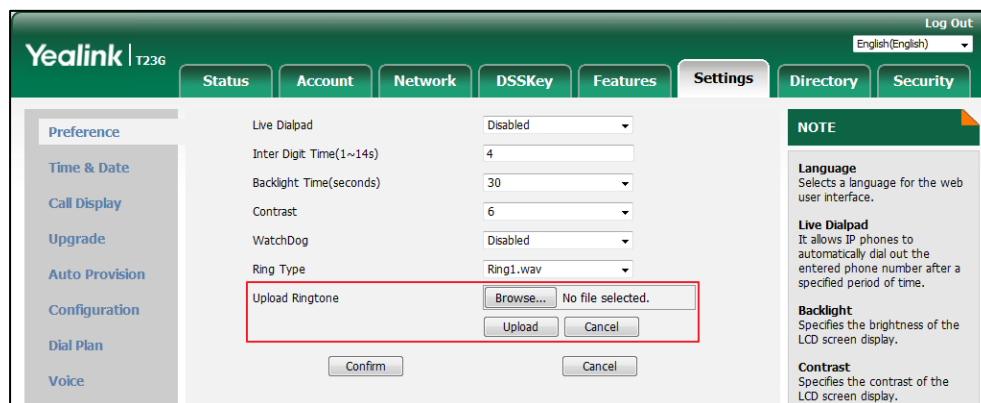

4. (Optional.) Press  to adjust the ringer volume.
5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

A ring tone for the account is configurable via web user interface at the path

**Account->Basic->Ring Type.**

**To upload a custom ring tone for your phone via web user interface:**

1. Click on **Settings->Preference**.
2. In the **Upload Ringtone** field, click **Browse** to locate a ring tone (the file format must be \*.wav) file from your local system.

3. Click **Upload** to upload the file.

The custom ring tone appears in the pull-down list of **Ring Type**.

You can only delete the custom ring tone by clicking **Del** when selecting the desired custom ring tone in the **Ring Type** field.

### Note

The priority of ring tone for an incoming call on the phone is as follows:  
Contact ring tone (refer to [Adding Contacts](#)) > Group ring tone (refer to [Adding Groups](#)) > Account ring tone > Phone ring tone.

Both single custom ring tone file and total custom ring tone files must be within 100KB.

Uploading custom ring tones for your phone is configurable via web user interface only.

## Key Tone

If you enable key tone, the phone will produce a sound when you press the keypad.

**To configure key tone via phone user interface:**

1. Press **Menu->Settings->Basic Settings->Sound->Key Tone**.
2. Press **Left Arrow** or **Right Arrow**, or the **Switch** soft key to select **Enabled** or **Disabled** from the **Key Tone** field.

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Key tone is configurable via web user interface at the path **Features->Audio**.

## BLF Ring Type

You can specify a desired ring tone to play for BLF pickup on the phone. This allows the monitoring phone to play a specific ring tone when the monitored line receives an incoming call. To use this feature, you need to enable audio alert and visual alert features in advance. For more information, refer to [Configuring Visual and Audio Alert for BLF pickup](#) on page 136.

**To configure BLF ring type via phone user interface:**

1. Press **Menu->Settings->Basic Settings->Sound->BLF Ring Type**.
2. Press  or  to select the desired ring tone.

3. (Optional.) Press  to adjust the ringer volume.
4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

BLF ring type is configurable via web user interface at the path **Features->Call Pickup**.

## Contact Management

This section provides the operating instructions for managing contacts. Topics include:

- [Directory](#)
- [Local Directory](#)
- [Blacklist](#)
- [Remote Phone Book](#)

### Directory

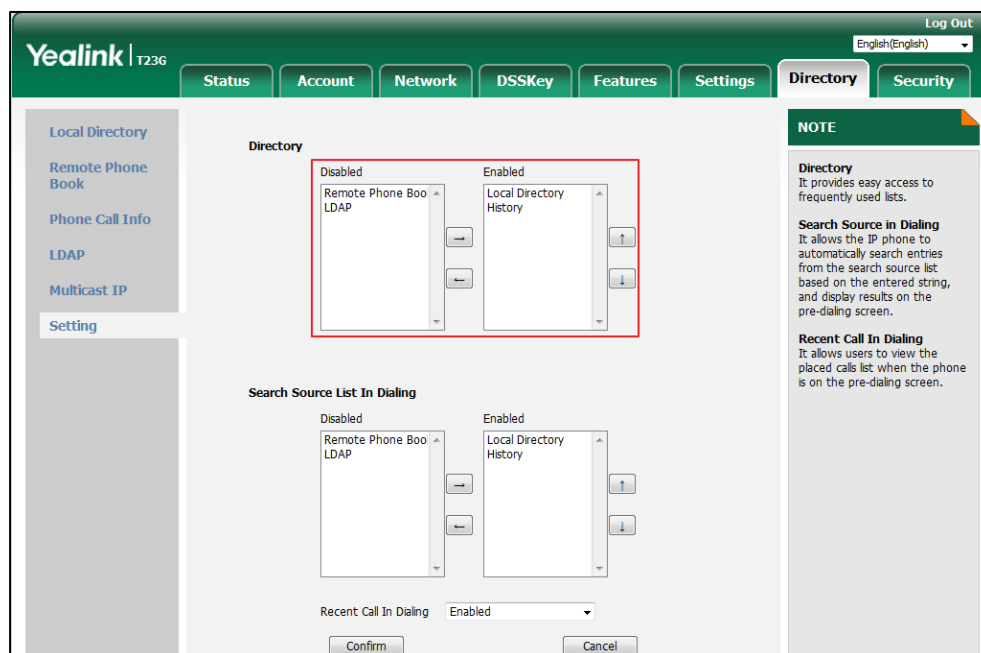

Directory provides easy access to frequently used lists. The lists may contain Local Directory, History, Remote Phone Book and LDAP. You can configure the list(s) to access for the **Dir** soft key.

**To configure the list(s) to access for the Dir soft key via web user interface:**

1. Click on **Directory->Setting**.

2. In the **Directory** block, select the desired list from the **Disabled** column and then click .
- The selected list appears in the **Enabled** column.
3. Repeat the step 2 to add more lists to the **Enabled** column.
4. To remove a list from the **Enabled** column, select the desired list and then click .
5. To adjust the display order of enabled lists, select the desired list and then click  or .

The LCD screen displays the list(s) in the adjusted order.

6. Click **Confirm** to accept the change.

#### Note

The list(s) to access for **Dir** soft key is configurable via web user interface only.

#### To check the directory via phone user interface:

1. Press the **Dir** soft key when the phone is idle.

The LCD screen displays the enabled list(s) in the directory.

If there is only one list in the directory, press the **Dir** soft key to enter this list directly.

#### Note

If the remote phone book and LDAP are not configured in advance, you cannot see remote phone book and LDAP lists on the phone user interface. For more information on remote phone book, refer to [Remote Phone Book](#) on page 61. For more information on LDAP, contact your system administrator.

## Local Directory

The built-in phone directory can store the names and phone numbers of your contacts. You can store up to 1000 contacts and 48 groups in your phone's local directory. You can add new groups and contacts, edit, delete or search for a contact, or simply dial a contact number from the local directory.

#### Note

Local directory can be backed up on the provisioning server. For more information, contact your system administrator.

## Adding Groups

**To add a group to the local directory:**

1. Press the **Dir** soft key.

The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.

If Local Directory is removed from the directory (refer to [Directory](#) on page 49), press **Menu->Directory->Local Directory** to enter the local directory.

2. Press the **AddGr** soft key.
3. Enter the desired group name in the **Name** field.
4. Press  or , or the **Switch** soft key to select the desired group ring tone from the **Ring** field.

If **Auto** is selected, this group will use the ring tone according to the priority: Contact ring tone (refer to [Adding Contacts](#)) > Account ring tone (refer to [Ring Tones](#)) > Phone ring tone (refer to [Ring Tones](#)). If a specific ring tone is selected, this group will use the ring tone according to the priority: Contact ring tone (refer to [Adding Contacts](#)) > Group ring tone.

5. Press the **Add** soft key to accept the change or the **Back** soft key to cancel.

You can also edit or delete any newly added contact groups.

## Editing Groups

**To edit a group in the local directory:**

1. Press the **Dir** soft key.

The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.

If Local Directory is removed from the directory (refer to [Directory](#) on page 49), press **Menu->Directory->Local Directory** to enter the local directory.

2. Select the desired contact group.
3. Press the **Option** soft key, and then select **Detail**.

4. Press  or  to scroll through the group information and then edit.

5. Press the **Save** soft key to accept change or the **Back** soft key to cancel.

## Deleting Groups

**To delete a group from the local directory:**

1. Press the **Dir** soft key.

The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.

If Local Directory is removed from the directory (refer to [Directory](#) on page 49), press

**Menu->Directory->Local Directory** to enter the local directory.

2. Select the desired contact group.
3. Press the **Option** soft key, and then select **Delete**.

The LCD screen prompts the following warning:

4. Press the **OK** soft key to confirm the deletion or the **Cancel** soft key to cancel.

You can also delete all groups by pressing the **Option** soft key and then select **Delete All**.

## Adding Contacts

You can add contacts to the local directory in the following ways:

- Manually
- From call history
- From a remote phone book

### Adding Contacts Manually

**To add a contact to the local directory manually:**

1. Press the **Dir** soft key.

The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.

If Local Directory is removed from the directory (refer to [Directory](#) on page 49), press **Menu->Directory->Local Directory** to enter the local directory.

2. Select the desired contact group and then press the **Enter** soft key.  
If the contact you want to add doesn't belong to any group, select **All Contacts** and then press the **Enter** soft key.
3. Press the **Add** soft key.
4. Enter the name and the office, mobile or other numbers in the corresponding fields.

5. Press ◀ or ▶, or the **Switch** soft key to select the desired account from the **Account** field.  
If **Auto** is selected, the phone will use the default account when placing calls to the contact from the local directory.
6. Press ◀ or ▶, or the **Switch** soft key to select the desired ring tone from the **Ring** field.  
If **Auto** is selected, this contact will use the ring tone according to the priority: Group ring tone (refer to [Adding Groups](#)) > Account ring tone (refer to [Ring Tones](#)) > Phone ring tone (refer to [Ring Tones](#)).
7. Press ◀ or ▶, or the **Switch** soft key to select the desired group from the **Group** field.
8. Press the **Add** soft key to accept the change or the **Back** soft key to cancel.

#### Note

If the contact has existed in the directory, the LCD screen will prompt "Contact name existed!".

## Adding Contacts from Call History

To add a contact to the local directory from the call history:

1. Press the **History** soft key.
2. Press  $\uparrow$  or  $\downarrow$  to highlight the desired entry.
3. Press the **Option** soft key, and then select **Add to Contact**.

4. Press the **OK** soft key, and then edit the contact name.
5. Press the **Save** soft key to accept the change.

The entry is successfully saved to the local directory.

## Adding Contacts from Remote Phone Book

To add a contact to the local directory from remote phone book:

1. Press **Menu->Directory->Remote Phone Book**.

If Remote Phone Book is added to the directory (refer to [Directory](#) on page 49), press **Dir->Remote Phone Book** to enter the remote phone book.

2. Select the desired remote group and then press the **Enter** soft key.
3. Press  $\uparrow$  or  $\downarrow$  to highlight the desired entry.
4. Press the **Option** soft key, and then select **Add to Contact**.
5. Press the **Save** soft key to save the contact in the local directory.

If the contact has already existed in the local directory, the LCD screen will prompt "Overwrite the original contact?". Press the **OK** soft key to overwrite the original contact in local directory or the **Cancel** soft key to cancel.

For more information on remote phone book operating, refer to [Remote Phone Book](#) on page 61.

## Editing Contacts

To edit a contact in the local directory:

1. Press the **Dir** soft key.

The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.

If Local Directory is removed from the directory (refer to [Directory](#) on page 49), press **Menu->Directory->Local Directory** to enter the local directory.

2. Select the desired contact group and then press the **Enter** soft key.  
If the contact is not in any group, select **All Contacts** and then press the **Enter** soft key.
3. Press  $\uparrow$  or  $\downarrow$  to highlight the desired contact.
4. Press the **Option** soft key, and then select **Detail**.
5. Press  $\uparrow$  or  $\downarrow$  to highlight the contact information and then edit.

6. Press the **Save** soft key to accept change or the **Back** soft key to cancel.

## Deleting Contacts

**To delete a contact from the local directory:**

1. Press the **Dir** soft key.  
The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.  
If Local Directory is removed from the directory (refer to [Directory](#) on page 49), press **Menu->Directory->Local Directory** to enter the local directory.
2. Select the desired contact group and then press the **Enter** soft key.  
If the contact is not in any group, select **All Contacts** and then press the **Enter** soft key.
3. Press  $\uparrow$  or  $\downarrow$  to highlight the desired contact.
4. Press the **Option** soft key, and then select **Delete**.

The LCD screen prompts the following warning:

5. Press the **OK** soft key to confirm the deletion or the **Cancel** soft key to cancel.

You can also delete all contacts by pressing the **Option** soft key, and then select **Delete All**.

## Placing Calls to Contacts

**To place a call to a contact from the local directory:**

1. Press the **Dir** soft key.

The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.

If Local Directory is removed from the directory (refer to [Directory](#) on page 49), press **Menu->Directory->Local Directory** to enter the local directory.

2. Select the desired contact group and then press the **Enter** soft key.  
If the contact is not in any group, select **All Contacts** and then press the **Enter** soft key.
3. Press **▲** or **▼** to highlight the desired contact.
4. Do one of the following:
  - If only one number of the contact is stored in the local directory, press the **Send** soft key to dial out the number.
  - If multiple numbers of the contact are stored in the local directory, press the **Send** soft key to display a list of numbers.  
Press **▲** or **▼** to highlight the desired number.  
Press the **Send** soft key to dial out the number.

## Searching for Contacts

**To search for a contact in the local directory:**

1. Press the **Dir** soft key.

The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.

If Local Directory is removed from the directory (refer to [Directory](#) on page 49), press **Menu->Directory->Local Directory** to enter the local directory.

2. Press the **Search** soft key.
3. Enter a few continuous characters of the contact name or continuous numbers of the contact number (office, mobile or other number) using the keypad.

The contacts whose name or phone number matches the characters entered will appear on the LCD screen. You can dial from the result list.

## Importing/Exporting Contact Lists

You can manage your phone's local directory via phone user interface or web user interface. But you can only import or export the contact list via web user interface.

### To import an XML file of contact list via web user interface:

1. Click on **Directory->Local Directory**.
2. Click **Browse** to locate a contact list file (the file format must be \*.xml) from your local system.

- Click **Import XML** to import the contact list.

The screenshot shows the Yealink T236 web interface. The top navigation bar includes 'Status', 'Account', 'Network', 'Dsskey', 'Features', 'Settings', 'Directory', and 'Security'. The 'Directory' tab is active, showing the 'Local Directory' section. A table lists contacts with columns for Index, Name, Office Number, Mobile Number, and Other Number. Below the table are buttons for 'Page 1', 'Prev', 'Next', 'Hang Up', 'Delete All', 'Delete', 'Move To', and 'All Contac'. The 'Group Setting' section includes fields for Name, Office Number, Mobile Number, and Other Number, along with 'Ring Tone' and 'Group' dropdowns. The 'Import Local Directory File' section contains two 'Browse...' buttons, 'Import XML', 'Export XML', 'Import CSV', and 'Export CSV' buttons. The 'Import XML' button is highlighted with a red box. A 'NOTE' section on the right explains the local directory functionality.

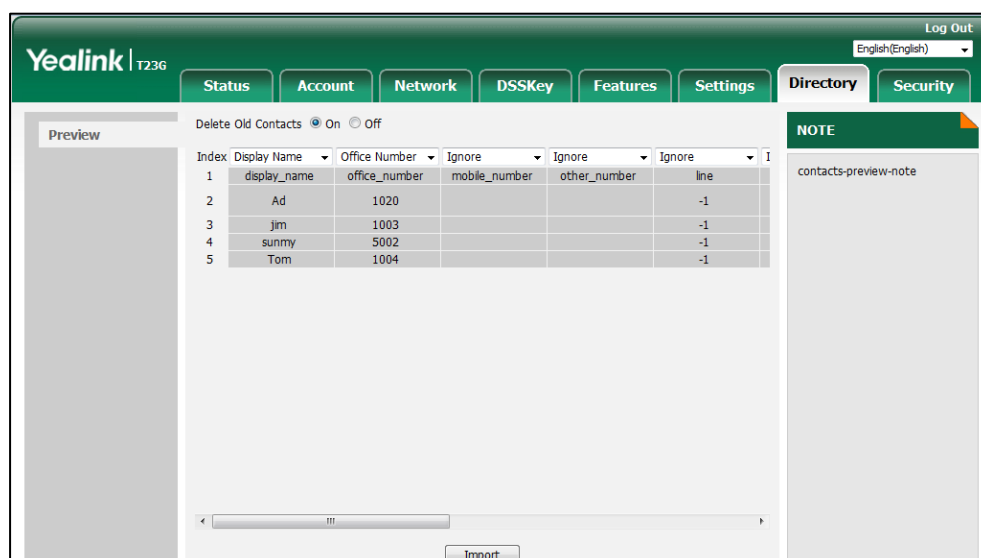

The web user interface prompts "The original contact will be covered, continue?".

- Click **OK** to complete importing the contact list.

#### To import a CSV file of contact list via web user interface:

- Click on **Directory** -> **Local Directory**.
- Click **Browse** to locate a contact list file (file format must be \*.csv) from your local system.
- (Optional.) Check the **Show Title** checkbox.  
It will prevent importing the title of the contact information which is located in the first line of the CSV file.
- Click **Import CSV** to import the contact list.
- (Optional.) Mark the **On** radio box in the **Delete Old Contacts** field.  
It will delete all existing contacts while importing the contact list.
- Select the contact information you want to import into the local directory from the pull-down list of **Index**.

At least one item should be selected to be imported into the local directory.

7. Click **Import** to complete importing the contact list.

**To export a contact list via web user interface:**

1. Click on **Directory->Local Directory**.
2. Click **Export XML** (or **Export CSV**).
3. Click **Save** to save the contact list to your local system.

**Note** Importing/exporting contact lists is available via web user interface only.

## Blacklist

The built-in phone directory can store names and phone numbers for a blacklist. You can store up to 30 contacts, add, edit, delete or search for a contact in the blacklist directory, and even call a contact from the blacklist directory. Incoming calls from blacklist directory contacts will be rejected automatically.

**To add a contact to the blacklist directory manually:**

1. Press **Menu->Directory->Blacklist**.
2. Press the **Add** soft key.
3. Enter the name and the office, mobile or other numbers in the corresponding fields.

4. Press  or , or the **Switch** soft key to select the desired account from the **Account** field.

If **Auto** is selected, the phone will use the default account when placing calls to the contact from the blacklist directory.

5. Press the **Add** soft key to accept the change or the **Back** soft key to cancel.

**To add a contact to the blacklist directory from the local directory:**

1. Press the **Dir** soft key.

The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.

If Local Directory is removed from the directory (refer to [Directory](#) on page 49), press **Menu->Directory->Local Directory** to enter the local directory.

2. Select the desired contact group and then press the **Enter** soft key.

If the contact is not in any group, select **All Contacts** and then press the **Enter** soft key.

3. Press  or  to highlight the desired contact.
4. Press the **Option** soft key and then select **Add to Blacklist**.

The LCD screen prompts the following warning:

5. Press the **OK** soft key to accept the change.

For operating instructions on editing, deleting, placing calls to and/or searching for contacts in the blacklist directory, refer to the operating instructions of [Editing Contacts](#) on page 55, [Deleting Contacts](#) on page 56, [Placing Calls to Contacts](#) on page 57 and/or [Searching for Contacts](#) on page 57.

## Remote Phone Book

You can add new contacts to the local directory, search for a contact, or simply dial a contact number from the remote phone book.

You can configure your new phone to access up to 5 remote phone books. For the access URL of

the remote phone book, contact your system administrator.

For operating instructions on placing calls to and/or searching for contacts in the remote phone book, refer to the operating instructions of [Placing Calls to Contacts](#) on page 57 and/or [Searching for Contacts](#) on page 57.

## Configuring an Access URL

**To configure an access URL for a remote phone book via web user interface:**

1. Click on **Directory->Remote Phone Book**.
2. Enter the access URL in the **Remote URL** field.
3. Enter the name in the **Display Name** field.

4. Click **Confirm** to accept the change.

### Note

An access URL for a remote phone book is configurable via web user interface only.

## Accessing the Remote Phone Book

**To access your remote phone book via phone user interface:**

1. Press **Menu->Directory->Remote Phone Book**.

If Remote Phone Book is added to the directory (refer to [Directory](#) on page 49), press **Dir->Remote Phone Book** to enter the remote phone book.

2. Press or to select the desired remote group, and then press the **Enter** soft key.

The phone then connects to the remote phone book and proceeds to load it. The contacts in the remote phone book are displayed on the LCD screen.

3. Press the **Back** soft key to back to the previous screen.

## Incoming/Outgoing Call Lookup

You can enable the phone to present the caller/callee identity stored in the remote phone book when receiving/placing a call.

**To configure incoming/outgoing call lookup and update time interval via web user interface:**

1. Click on **Directory**->**Remote Phone Book**.
2. Select **Enabled** from the pull-down list of **Incoming/Outgoing Call Lookup**.
3. Enter the desired refresh period in the **Update Time Interval(Seconds)** field.

The default value is 21600.

The screenshot shows the Yealink T23G web interface. The 'Directory' tab is selected, and the 'Remote Phone Book' sub-tab is active. A table lists remote phone books with columns for Index, Remote URL, and Display Name. Below the table, the 'Incoming/Outgoing Call Lookup' is set to 'Enabled' and the 'Update Time Interval(Seconds)' is set to '21600'. A red box highlights these two settings. A 'NOTE' section on the right explains the Remote Phone Book feature.

4. Click **Confirm** to accept the change.

## Call History Management

The SIP-T23P/G IP phone maintains call history lists of Placed Calls, Received Calls, Missed Calls and Forwarded Calls. Each call history list supports up to 100 entries. You can view call history, place a call, add a contact or delete an entry from the call history list.

History record feature is enabled by default. If you don't want to save the call history, you can disable the feature.

## Viewing History Records

**To view the call history:**

1. Press the **History** soft key.  
The LCD screen displays all call records.
2. Press or to switch among **All Calls**, **Missed Calls**, **Placed Calls**, **Received Calls** and **Forwarded Calls**.
3. Press or to select the desired entry.
4. Press the **Option** soft key, and then select **Detail**.

The detailed information of the entry appears on the LCD screen.

## Placing a Call from History Records

**To place a call from the call history list:**

1. Press the **History** soft key.
2. Press  or  to switch among **All Calls**, **Missed Calls**, **Placed Calls**, **Received Calls** and **Forwarded Calls**.
3. Press  or  to select the desired entry.
4. Press the **Send** soft key.

## Adding a Contact to the Local Directory/Blacklist

**To add a contact to the local directory (or blacklist directory) from the call history list:**

1. Press the **History** soft key.
2. Press  or  to switch among **All Calls**, **Missed Calls**, **Placed Calls**, **Received Calls** and **Forwarded Calls**.
3. Press  or  to select the desired entry.
4. Press the **Option** soft key, and then select **Add to Contact** (or **Add to Blacklist**).
5. Enter the desired values in the corresponding fields.
6. Press the **Save** soft key.

For more information on local directory and/or blacklist, refer to [Local Directory](#) on page 51 and/or [Blacklist](#) on page 60.

## Deleting History Records

**To delete an entry from the call history list:**

1. Press the **History** soft key.
2. Press  or  to switch among **All Calls**, **Missed Calls**, **Placed Calls**, **Received Calls** and **Forwarded Calls**.
3. Press  or  to select the desired entry.
4. Press the **Delete** soft key.

**To delete all entries from the call history list:**

1. Press the **History** soft key.
2. Press  or  to switch among **All Calls**, **Missed Calls**, **Placed Calls**, **Received Calls** and **Forwarded Calls**.
3. Press the **Option** soft key, and then select **Delete All**.
4. Press the **OK** soft key.

The LCD screen prompts "Delete all the call records?".

5. Press the **OK** soft key to confirm the deletion or the **Cancel** soft key to cancel.

## Disabling History Record

**To disable history record via phone user interface:**

1. Press **Menu->Features->History Setting**.
2. Press  or , or the **Switch** soft key to select **Disabled** from the **History Record** field.

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

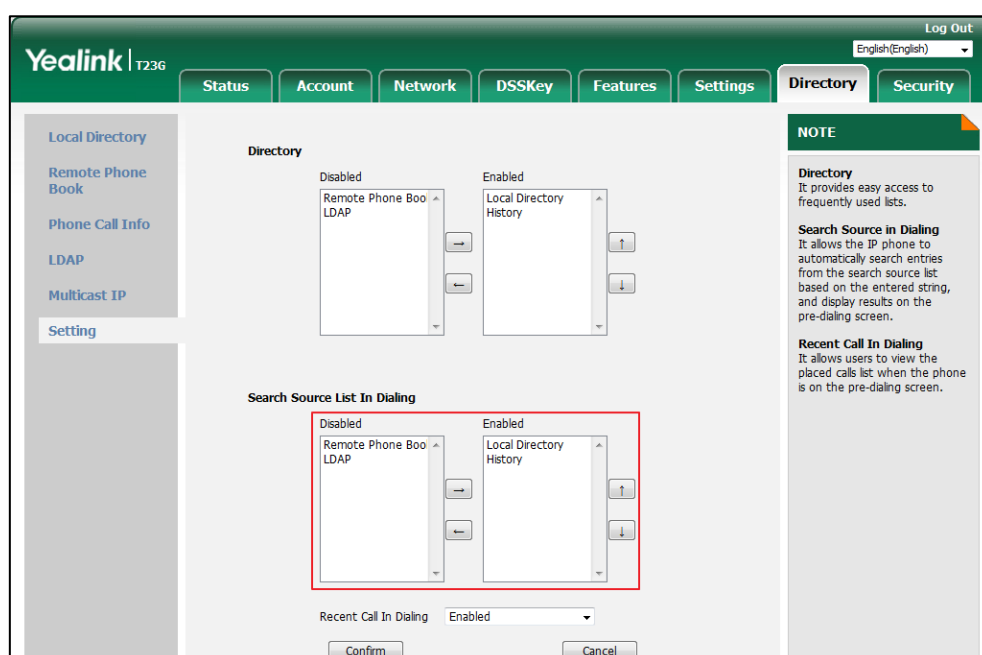

## Search Source List in Dialing

You can search for a contact from the desired lists when the phone is on the dialing screen. The lists can be Local Directory, History, Remote Phone Book and LDAP.

**To configure search source list in dialing via web user interface:**

1. Click on **Directory->Setting**.
2. In the **Search Source List In Dialing** block, select the desired list from the **Disabled** column and then click  .  
The selected list appears in the **Enabled** column.
3. Repeat the step 2 to add more lists to the **Enabled** column.
4. To remove a list from the **Enabled** column, select the desired list and then click  .
5. To adjust the display order of search results, select the desired list and then click  or  .

The LCD screen will display search results in the adjusted order.

- Click **Confirm** to accept the change.

#### Note

Search source list in dialing is configurable via web user interface only.

#### To search for a contact in the enabled search source lists:

- Pick up the handset, press the Speakerphone key or press the line key.
- Enter a few continuous characters of the entry's name or continuous numbers of the entry's phone number (office, mobile or other number) using the keypad.

The entries in the enabled search source lists whose name or phone number matches the characters entered will appear on the LCD screen. You can press or to scroll to the desired entry, and then place a call to the entry.

## System Customizations

### Logo Customization

You can upload your custom logo which will be shown on the idle screen.

**To upload a custom logo via web user interface:**

1. Click on **Features->General Information**.
2. Select **Custom logo** from the pull-down list of **Use Logo**.
3. Click **Browse** to locate the logo file from your local system.

The screenshot shows the Yealink T23G web interface. The 'Features' tab is selected, and the 'General Information' sub-tab is active. In the 'General Information' section, the 'Use Logo' dropdown is set to 'Custom logo'. Below it, the 'Upload Logo' section shows a 'Browse...' button and the text 'No file selected.'. A red box highlights the 'Use Logo' dropdown and the 'Upload Logo' section. The 'Upload' button is visible at the bottom of the section. The 'Confirm' and 'Cancel' buttons are at the bottom of the page.

4. Click **Upload** to upload the file.

#### Note

**Delete** item will appear after you upload a custom logo, you can click **Delete** to delete the custom logo.

The logo file format must be \*.dob, contact your system administrator for more information.

Logo customization is configurable via web user interface only.

### Headset Use

If you want to use a headset, physically connect your headset and activate the headset mode for use. For more information on physically connecting a headset, refer to [Phone Installation](#) on page 25.

#### Note

To use headset, make sure the headset mode is enabled. Contact your system administrator for more information.

## Headset Mode Activation/Deactivation

### To activate the headset mode:

1. Press  on the phone.  
The headset icon  appears on the idle screen.  
Press the line key or the **Answer** soft key to answer an incoming call. The call will be connected to your headset automatically.  
Enter the desired number and then press the **Send** soft key, the phone will then place a call using the headset automatically. For more information on using the headset to place a call, refer to [Placing Calls](#) on page 92.

### To deactivate the headset mode:

1. Press  again on the phone.  
The headset icon  disappears from the idle screen.

## Headset Prior

You can use headset in priority when headset prior feature is enabled. This feature is especially useful for permanent or full-time headset users.

### To enable headset prior via web user interface:

1. Click on **Features->General Information**.
2. Select **Enabled** from the pull-down list of **Headset Prior**.

The screenshot shows the Yealink T23G web interface. The 'Features' tab is selected, and the 'General Information' sub-tab is active. In the 'General Information' section, the 'Headset Prior' dropdown menu is highlighted with a red box and is set to 'Enabled'. Other settings visible include 'Call Waiting' (Enabled), 'Call Waiting On Code' (empty), 'Allow Mute' (Enabled), 'Dual Headset' (Enabled), 'Auto Answer Delay(1~4s)' (1), 'Enable Auto Answer Tone' (Enabled), 'DTMF Replace Tran' (Disabled), 'Accept SIP Trust Server Only' (Disabled), 'Display Method on Dialing' (User Name), and 'Auto Linekeys' (Disabled). A 'NOTE' section on the right provides details about 'Call Waiting', 'Auto Redial', 'Key As Send', 'Hotline', and 'Call Completion'.

3. Click **Confirm** to accept the change.

### To use headset prior feature, you should activate the headset mode in advance:

1. Physically connect the headset.

2. Press  to activate the headset mode.

**Note**

If headset prior is enabled, the headset mode will not be deactivated until you press the **HEADSET** key again.

If headset prior is disabled, the headset mode can be deactivated by pressing the Speakerphone key or the **HEADSET** key.

Headset prior is configurable via web user interface only.

## Dual Headset

You can use two headsets when enabling dual headset. To use this feature, you must physically connect headsets to the headset jack and handset jack respectively. Once the phone connects to a call, the headset connected to the headset jack will have full-duplex capabilities, while the one connected to the handset jack will only be able to listen.

**To enable dual headset via web user interface:**

1. Click on **Features->General Information**.
2. Select **Enabled** from the pull-down list of **Dual Headset**.

The screenshot shows the Yealink T236 web interface. The 'Features' tab is selected, and the 'General Information' sub-tab is active. A list of settings is displayed, including 'Call Waiting', 'Call Waiting On Code', 'Allow Mute', 'Dual Headset', 'Auto Answer Delay(1~4s)', 'Enable Auto Answer Tone', 'Headset Prior', 'DTMF Replace Tran', 'Accept SIP Trust Server Only', 'Display Method on Dialing', and 'Auto Linekeys'. The 'Dual Headset' setting is highlighted with a red rectangular box and is currently set to 'Enabled'. To the right of the settings list, there is a 'NOTE' section with descriptions for 'Call Waiting', 'Auto Redial', 'Key As Send', 'Hotline', and 'Call Completion'. At the bottom of the settings list, there are 'Confirm' and 'Cancel' buttons.

3. Click **Confirm** to accept the change.

**Note**

Dual headset is configurable via web user interface only.

## DSS Keys

There are two types of DSS keys: Line Keys and Programmable Keys. The details will be introduced in the following. The SIP-T23P/G IP phone supports 3 line keys and 11 programmable keys.

## Line Keys

You can assign predefined functionalities to line keys. You can also define a label for a line key feature which will appear on the LCD screen. Line keys allow you to quickly access features such as recall and voice mail. The line key LEDs will indicate the monitored status when the line keys are assigned with particular features, such as BLF. The default key type of each line key is Line.

### To assign functionality to a line key via phone user interface:

1. Press **Menu->Features->DSS Keys**.
2. Select the desired DSS key, and then press the **Enter** soft key.
3. Select the desired key type from the **Type** field.
4. (Optional.) Select the desired key event type from the **Key Type** field.
5. (Optional.) Select the desired line from the **Account ID** field.
6. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
7. (Optional.) Enter the corresponding value in the **Value** field.
8. (Optional.) Enter the corresponding value in the **Extension** field.
9. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Line key is configurable via web user interface at the path **Dsskey->Line Key**.

### Note

When the phone is idle, you can also long press the line key to configure it directly on the phone.

Line key features are explained in the following subchapters in detail:

- Line
- Speed Dial
- Voice Mail
- Direct Pickup
- Group Pickup
- Call Park
- DTMF
- Prefix
- Local Group
- XML Group
- XML Browser
- LDAP
- Conference
- Forward
- Transfer

- Hold
- DND
- SMS
- Group Listening
- Zero Touch
- URL
- Phone Lock
- Retrieve Park
- Directory

For the features not listed above, refer to [Basic Call Features](#) on page 91 and [Advanced Phone Features](#) on page 135. For more information, contact your system administrator.

### Line

You can use this key feature to accept incoming calls, place active calls on hold or resume a held call. It performs in the same way as a hard line key.

#### Dependencies: *Type (Line)*

**Account ID** (the account this feature will be applied to)

**Label** (key label displayed on the LCD screen)

**Usage:** When the phone receives an incoming call, the **Line** key LED flashes green:

1. Press the **Line** key to accept the incoming call.
2. Press the **Line** key to place a new call and the active call is placed on hold.
3. Press the **Line** key again to resume the held call.

### Speed Dial

You can use this key feature to speed up dialing the numbers frequently used or hard to remember.

#### Dependencies: *Type (Speed Dial)*

**Account ID** (the account this feature will be applied to)

**Label** (key label displayed on the LCD screen)

**Value** (the number you want to dial out)

**Usage:** Press the **Speed Dial** key to dial out the number specified in the **Value** field, using the account selected from the **Account ID** field.

### Voice Mail

You can use this key feature to quickly connect voice mail. For more information, refer to [Voice Mail](#) on page 178.

#### Dependencies: *Type (Key Event)*

**Key Type** (Voice Mail)

**Account ID** (the account this feature will be applied to)

**Label** (key label displayed on the LCD screen)

**Value** (the voice mail access code)

**Usage:** Press the **Voice Mail** key to dial out the voice mail access code. Then follow the voice prompt to listen to the voice mails.

### **Direct Pickup**

You can use this key feature to answer someone else's incoming call on the phone.

**Dependencies:** *Type (Key Event)*

**Key Type** (*DPickup*)

**Account ID** (the account this feature will be applied to)

**Label** (key label displayed on the LCD screen)

**Value** (the directed call pickup code followed by the target phone number)

**Usage:** Press the **Direct Pickup** key on your phone when the target phone number receives an incoming call. The call is then answered on your phone.

### **Group Pickup**

You can use this key feature to answer incoming calls in a group that is associated with their own group.

**Dependencies:** *Type (Key Event)*

**Key Type** (*GPickup*)

**Account ID** (the account this feature will be applied to)

**Label** (key label displayed on the LCD screen)

**Value** (the group call pickup code)

**Usage:** Press the **Group Pickup** key on your phone when a phone number in the group receives an incoming call. The call is answered on your phone.

### **Call Park**

You can use this key feature to park a call.

**Dependencies:** *Type (Key Event)*

**Key Type** (*Call Park*)

**Account ID** (the account this feature will be applied to)

**Label** (key label displayed on the LCD screen)

**Value** (the call park code)

**Usage:** Press the **Call Park** key on your phone to park a call.

### **DTMF**

You can use this key feature to send the specification of arbitrary key sequences via DTMF.

**Dependencies:** *Type (Key Event)*

**Key Type (DTMF)****Label** (key label displayed on the LCD screen)**Value** (DTMF sequence)

**Usage:** Press the **DTMF** key during an active call to send the key sequence specified in the **Value** field.

**Note**

DTMF sequence can only contain "0-9", "\*", "#" and "A-E".

**Prefix**

You can use this key feature to add a specified prefix number before the dialed number.

**Dependencies:** *Type (Key Event)*

**Key Type (Prefix)****Label** (key label displayed on the LCD screen)**Value** (the prefix number)

**Usage:** Press the **Prefix** key when the phone is idle, the phone will then enter the dialing screen and display the prefix number that you specified in the **Value** field. You can enter the remaining digits and then dial out.

**Local Group**

You can use this key feature to quickly access a contact group in the local directory. For more information, refer to [Local Directory](#) on page 51.

**Dependencies:** *Type (Key Event)*

**Key Type (Local Group)****Local Group** (the contact group name you want to access)**Label** (key label displayed on the LCD screen)

**Usage:** Press the **Local Group** key to access the contact group specified in the **Local Group** field.

**XML Group**

You can use this key feature to quickly access a remote group in your remote phone book. You should configure remote phone book in advance. For more information, refer to [Remote Phone Book](#) on page 61.

**Dependencies:** *Type (Key Event)*

**Key Type (XML Group)****PhoneBook** (the remote group name you want to access if remote phone book is configured)**Label** (key label displayed on the LCD screen)

**Usage:** Press the **XML Group** key to access the remote group specified in the **PhoneBook** field.

### XML Browser

You can use this key feature to quickly access an XML browser. The XML browser allows you to create custom services which meet your functional requirements on the server. You can customize practical applications, such as weather report, stock information, Google search, etc.

**Dependencies:** *Type (XML Browser)*

*Value (the access URL for XML browser)*

**Usage:** Press the **XML Browser** key to access the XML browser specified in the **Value** field.

### LDAP

You can use this key feature to quickly access a LDAP search screen.

**Dependencies:** *Type (Key Event)*

*Key Type (LDAP)*

*Label (key label displayed on the LCD screen)*

**Usage:**

1. Press the **LDAP** key to access the LDAP search screen.
2. Enter a few continuous characters of the contact name or continuous numbers of the contact number using the keypad.

### Conference

You can use this key feature to set up a conference call. For more information, refer to [Conference](#) on page 120.

**Dependencies:** *Type (Key Event)*

*Key Type (Conf)*

*Label (key label displayed on the LCD screen)*

*Value (the number you want to add to the conference)*

**Usage:** Press the **Conference** key during an active call to set up a conference with the number specified in the **Value** field.

#### Note

If the **Value** field is left blank, the **Conference** key performs the same as the **Conf** soft key during a call.

### Forward

You can use this key feature to forward an incoming call to someone else. For more information, refer to [Call Forward](#) on page 108.

**Dependencies:** *Type (Key Event)*

*Key Type (FWD)*

*Label (key label displayed on the LCD screen)*

*Value (the number you want to forward to)*

**Usage:** Press the **Forward** key to forward an incoming call to the number specified in the **Value** field.

**Note**

If the **Value** field is left blank, the **Forward** key performs the same as the **FWD** soft key when receiving an incoming call.

## Transfer

When there is an active call on the phone, you can use this key feature to handle the call differently depending on the transfer mode assigned to the DSS key.

**Dependencies:** *Type (Key Event)*

*Key Type (Tran)*

*Label (key label displayed on the LCD screen)*

*Value (the number you want to transfer to)*

**Usage:**

- When the transfer mode on DSS key is **Blind Transfer**, press the **Transfer** key to complete the blind transfer to the number specified in the **Value** field.
- When the transfer mode on DSS key is **Attended Transfer**, press the **Transfer** key to dial out the number specified in the **Value** field, and then perform the attended or semi-attended transfer.
- When the transfer mode on DSS key is **New Call**, press the **Transfer** key to place a new call to the number specified in the **Value** field.

**Note**

Transfer mode via DSS key is configurable via web user interface at the path **Features->Transfer->Transfer Mode Via Dsskey**.

If the **Value** field is left blank, the **Transfer** key performs the same as the **TRANSFER** key or the **Tran** soft key during a call. For more information, refer to [Call Transfer](#) on page 115.

## Hold

You can use this key feature to place an active call on hold or retrieve a held call.

**Dependencies:** *Type (Key Event)*

*Key Type (Hold)*

*Label (key label displayed on the LCD screen)*

**Usage:**

1. Press the **Hold** key during an active call to place the call on hold.
2. Press the **Hold** key again to retrieve the held call.

## DND

You can use this key feature to enable or disable DND. You can also use this key feature to access the custom DND screen. For more information, refer to [Do Not Disturb \(DND\)](#) on page

102.

**Dependencies:** *Type (Key Event)*

*Key Type (DND)*

*Label (key label displayed on the LCD screen)*

**Usage:**

When DND is in phone mode:

1. Press the **DND** key to enable DND.
2. Press the **DND** key again to disable DND.

When DND is in custom mode:

1. Press the **DND** key to access the custom DND screen. You can enable or disable DND for one or all accounts.

**Note**

When DND is enabled, the **DND** key LED will illuminate solid green, and the incoming calls will be rejected automatically.

## SMS

You can use this key feature to quickly access text message. For more information, refer to [Short Message Service \(SMS\)](#) on page 176.

**Dependencies:** *Type (Key Event)*

*Key Type (SMS)*

*Label (key label displayed on the LCD screen)*

**Usage:** Press the **SMS** key when the phone is idle to access text message.

## Group Listening

You can use this key feature to activate the Speakerphone and Handset/Headset mode at the same time. It is suitable for the group conversations which have more than one person present at one end. You are able to speak and listen through the handset/headset, while the others nearby can only listen through the speaker.

**Dependencies:** *Type (Key Event)*

*Key Type (Group Listening)*

*Label (key label displayed on the LCD screen)*

**Usage:**

1. During a call, press the **Group Listening** key to activate the group listening mode.  
You can then speak and listen through the handset/headset, while other people at your side can only listen through the speaker at the same time.
2. Press the **Group Listening** key again to deactivate the group listening mode.

## Zero Touch

You can use this key feature to quickly configure auto provision and network parameters.

**Dependencies: Type (Key Event)****Key Type (Zero Touch)****Label** (key label displayed on the LCD screen)**Usage:**

1. Press the **Zero Touch** key to access the zero touch screen.
2. Press the **OK** soft key within a few seconds.
3. Configure the network parameters in the corresponding fields.
4. Press the **Next** soft key.
5. Configure the auto provision parameters in the corresponding fields.
6. Press the **OK** soft key.

The phone will reboot to update configurations.

**URL**

You can use this key feature to trigger the phone to send an HTTP GET request containing a specific URL.

**Dependencies: Type (URL)****Value** (the URL contained in the HTTP GET request)**Label** (key label displayed on the LCD screen)

**Usage:** Press the **URL** key to trigger the phone to send an HTTP GET request containing the URL specified in the **Value** field.

**Phone Lock**

You can use this key feature to immediately lock your phone instead of long pressing . For more information, refer to [Phone Lock](#) on page 43.

**Dependencies: Type (Phone Lock)****Label** (key label displayed on the LCD screen)

**Usage:** When the phone lock feature is enabled, press the **Phone Lock** key to immediately lock your phone instead of long pressing .

**Retrieve Park**

You can use this key feature to retrieve a parked call.

**Dependencies: Type (Retrieve Park)****Account ID** (the account this feature will be applied to)**Label** (key label displayed on the LCD screen)**Value** (the park retrieve code)

**Usage:** Press the **Retrieve Park** key on your phone to retrieve a parked call.

**Directory**

You can use this key feature to easily access frequently used lists. For more information, refer to

[Directory](#) on page 49.

**Dependencies:** *Type (Dir)*

*Label (key label displayed on the LCD screen)*

**Usage:** Press the **Directory** key to immediately access frequently used lists.

#### Note

The **Directory** key performs the same function as the **Dir** soft key when the phone is idle.

## Programmable Keys

You can customize the soft keys, navigation keys and function keys.

**To customize soft keys via phone user interface:**

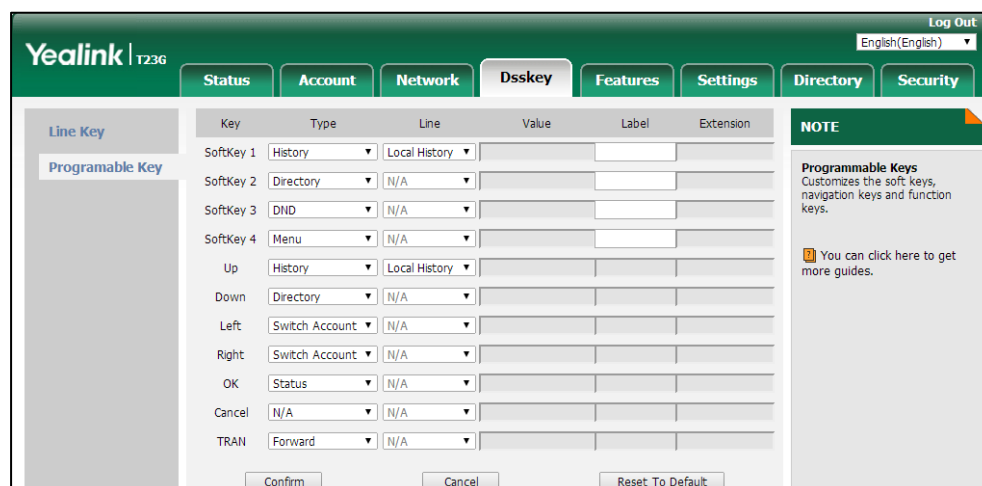

1. Press **Menu**->**Settings**->**Advanced Settings** (default password: admin) ->**Softkey Label**.
2. Select the desired soft key, and then press the **Enter** soft key.
3. Select the desired key type from the **Type** field.

4. (Optional.) Select the desired line from the **Account ID** field.
5. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
6. (Optional.) Enter the corresponding value in the **Value** field.
7. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

**To customize the programmable keys via web user interface:**

1. Click on **Dsskey**->**Programmable Key**.
2. Customize specific features for these keys.

3. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.  
Label is configurable only when customizing SoftKey (1-4).
4. Click **Confirm** to accept the change.

**Note**

Navigation keys and function keys are configurable via web user interface only.

The X key can be used as a Cancel key or mute key. It cannot be customized when keep mute feature is enabled. For more information, contact your system administrator.

You can click **Reset To Default** to reset custom settings to defaults.

Then you can press the keys on the phone to perform the features you configured.

For example:

**Switch Account Up**

You can use this key feature to change the default account.

**Dependencies:** *Type (Switch Account Up)*

**Usage:** Press the **Switch Account Up** key to scroll up the account list to select the desired default account.

**Switch Account Down**

You can use this key feature to change the default account.

**Dependencies:** *Type (Switch Account Down)*

**Usage:** Press the **Switch Account Down** key to scroll down the account list to select the desired default account.

## Account Management

You can register one or multiple accounts on the SIP-T23P/G IP phone. You can also configure each line key to associate with an account or configure multiple line keys to associate with an account.

### Account Registration

**To register an account via phone user interface:**

1. Press **Menu->Settings->Advanced Settings** (default password: admin) -> **Accounts**.
2. Select the desired account and then press the **Enter** soft key.

3. Select **Enabled** from the **Activation** field.

4. Enter the desired value in **Label**, **Display Name**, **Register Name**, **User Name**, **Password** and **SIP Server1/2** field respectively. Contact your system administrator for more information.
5. If you use the outbound proxy servers, do the following:
  - 1) Press or , or the **Switch** soft key to select **Enabled** from the **Outbound Status** field.
  - 2) Enter the desired value in the **Outbound Proxy1/2** and **Fallback Interval** field respectively. Contact your system administrator for more information.
6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.  
You can repeat steps 2 to 6 to register more accounts.

#### To disable an account via phone user interface:

1. Press **Menu**->**Settings**->**Advanced Settings** (default password: admin) ->**Accounts**.
2. Select the desired account and then press the **Enter** soft key.
3. Select **Disabled** from the **Activation** field.
4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Account registration is configurable via web user interface at the path **Account**->**Register**.

#### Note

Default account can be set by pressing or on the idle screen. It has priority when placing a call. The phone's default account cannot be changed after reboot.

## Multiple Line Keys per Account

You can configure multiple line keys to associate with an account. This enhances call visualization and simplifies call handling.

Key	Type	Value	Label	Line	Extension
Line Key1	Line	1001		Line 1	
Line Key2	Line	1001		Line 1	
Line Key3	Line			Line 3	

If this is the case, the LCD screen will resemble the following figure:

Incoming calls to this account will be distributed evenly among the available line keys. Outgoing calls will be distributed similarly.

Your phone can be configured to have a combination of accounts with a single line key and accounts with multiple line keys.

## Dial Plan

Dial plan is a string of characters that governs the way your SIP-T23P/G IP phone processes the inputs received from your phone keypad.

The SIP-T23P/G IP phone supports the following dial plan features:

- [Replace Rule](#)
- [Dial Now](#)
- [Area Code](#)
- [Block Out](#)

The basic expression syntax you need to know:

.	The dot "." can be used as a placeholder or multiple placeholders for any character. Example: "12." would match "123", "1234", "12345", "12abc", etc.
x	An "x" can be used as a placeholder for any character. Example: "12x" would match "121", "122", "123", "12a", etc.
-	Numeric ranges are allowed within the brackets: Digit "-" Digit. Example: "[5-7]" would match the number "5", "6" or "7".
[]	The square brackets "[]" can be used as a placeholder for a single character which matches any of a set of characters. Example: "91[5-7]1234" would match "9151234", "9161234", "9171234".
()	The parentheses "()" can be used to group together patterns, for instance, to logically combine two or more patterns. Example: "([1-9])([2-7])3" would match "923", "153", "773", etc.
\$	The "\$" should be followed by the sequence number of a parenthesis. The "\$" plus the sequence number means the whole character or characters placed in the parenthesis. The number directs to the right parenthesis when there are more than one. Example:

	<p>A replace rule configuration, Prefix: "001(xxx)45(xx)", Replace: "9001\$145\$2".</p> <p>When you dial out "0012354599" on your phone, the IP phone will replace the number with "9001<b>2354599</b>". "\$1" means 3 digits in the first parenthesis, that is, "235". "\$2" means 2 digits in the second parenthesis, that is, "99".</p>
--	--

**Note**

The IP phone supports a new dial plan mechanism – digit map. You can use one or more matching rules in one digit map string. If the new dial plan mechanism is enabled, old dial plan will be ignored. For more information, contact your system administrator.

## Replace Rule

You can configure one or more replace rules (up to 100) to remove the specified string and replace it with another string. You can configure a pattern with wildcards (refer to the expression syntax in the table above), so that any string that matches the pattern will be replaced. This feature is convenient for you to dial out a long number. For example, a replace rule is configured as "Prefix: 1" and "Replace: 1234". When trying to dial out the number "1234", you just need to enter "1" on the phone and then press the **Send** soft key.

### To add a replace rule via web user interface:

1. Click on **Settings->Dial Plan->Replace Rule**.
2. Enter the string (e.g., 1) in the **Prefix** field.
3. Enter the string (e.g., 1234) in the **Replace** field.
4. Enter the desired line ID in the **Account** field or leave it blank.

4				<input type="checkbox"/>
5				<input type="checkbox"/>
6				<input type="checkbox"/>
7				<input type="checkbox"/>
8				<input type="checkbox"/>
9				<input type="checkbox"/>
10				<input type="checkbox"/>

Prefix  Replace  Account

Add Edit Del

**NOTE**

**Replace Rule:** An alternative string that replaces the entered numbers.  
**Dial Now:** Automatically dial out the entered numbers.  
**Area Code:** Automatically add the area code before the numbers when dialing.  
**Block Out:** It prevents users from dialing out specific numbers.  
 " " represents any string.  
 "x" represents any character.  
 "[]" match a range of characters within the brackets.  
 "," a separator within the bracket.  
 "[\*]" a character matches any of character sets.  
 "()" combines two or more patterns.  
 "\$" followed by the sequence number of a parenthesis means the characters placed in the parenthesis.

You can click here to get more guides.

5. Click **Add** to add the replace rule.

When you enter the number "1" using the keypad and then press the **Send** soft key, the phone will dial out "1234" instead.

#### Note

The valid values of **Account** field can be one or more digits among 1-3. Every two digits must be separated by a comma. For example, when you enter the value "1, 2" in the **Account** field, this replace rule will apply to account 1 and account 2.

If you leave the **Account** field blank or enter 0, the replace rule will apply to all accounts.

#### To edit a replace rule via web user interface:

1. Click on **Settings->Dial Plan->Replace Rule**.
2. Select the desired replace rule by checking the check box.
3. Edit the values in the **Prefix** and **Replace** fields.
4. Enter the desired line ID in the **Account** field or leave it blank.
5. Click **Edit** to accept the change.

#### To delete one or more replace rules via web user interface:

1. Click on **Settings->Dial Plan->Replace Rule**.
2. Select one or more replace rules by checking the check box(es).
3. Click **Del** to delete the replace rule(s).

#### Note

Replace rule is configurable via web user interface only.

## Dial Now

You can configure one or more dial now rules (up to 100) on your phone. When the dialed number matches the dial now string, the number will be dialed out automatically. For example, a dial now rule is configured as "1xx", any entered three-digit string beginning with 1 will then be dialed out automatically on the phone.

#### To add a dial now rule via web user interface:

1. Click on **Settings->Dial Plan->Dial Now**.
2. Enter the desired value (e.g., 1xx) in the **Rule** field.
3. Enter the desired line ID in the **Account** field or leave it blank.

For more information on the valid values for the **Account** field, refer to [Replace Rule](#) on page 82.

The screenshot shows the Yealink T236 web interface. The top navigation bar includes 'Status', 'Account', 'Network', 'Dsskey', 'Features', 'Settings', 'Directory', and 'Security'. The 'Settings' tab is selected, and the 'Dial Now' sub-tab is active. A table with 10 rows (Index 1-10) is shown for configuring dial rules. Below the table, there are input fields for 'Rule 1xx' and 'Account', and buttons for 'Add', 'Edit', and 'Del'. A 'NOTE' section on the right explains the syntax for Replace Rule, Dial Now, Area Code, and Block Out, along with special characters like \*, x, ~, [], and ().

4. Click **Add** to add the dial now rule.

When you enter the number "123" using the keypad, the phone will dial out "123" automatically without pressing any key.

#### Note

You can also edit or delete the dial now rule, refer to [Replace Rule](#) on page 82 for more information.

Dial now rule is configurable via web user interface only.

### Time Out for Dial Now Rule

You can configure the delay time for dial now rules. That is, you can configure your phone to automatically dial out the phone number which matches a dial now rule, after the designated delay time.

#### To configure the time out for dial now rule via web user interface:

1. Click on **Features->General Information**.
2. Enter the time between 0 and 14 (seconds) in the **Time Out for Dial Now Rule** field.

The default value is "1".

The screenshot shows the Yealink T236 web interface. The 'Features' tab is selected. Under 'General Information', the 'Time Out for Dial Now Rule' is set to '1'. Other settings include Call Waiting (Enabled), Auto Redial (Disabled), and various delay and code settings. A 'NOTE' section on the right provides details for Call Waiting, Auto Redial, Key As Send, Hotline, and Call Completion features.

3. Click **Confirm** to accept the change.

#### Note

Time out for dial now rule is configurable via web user interface only.

## Area Code

Area codes are also known as Numbering Plan Areas (NPAs). They usually indicate geographical areas in a country. This feature is necessary when dialing a phone number outside the code area. For example, an area code is configured as "Code: 0592, Min Length: 1, Max Length: 15". When you dial out the number "56789" (the length of the number is between 1 and 15), the phone will add the area code and dial out the number "059256789". You can only configure one area code rule on your phone.

#### To configure the area code via web user interface:

1. Click on **Settings->Dial Plan->Area Code**.
2. Enter the desired values in the **Code**, **Min Length (1-15)** and **Max Length (1-15)** fields.
3. Enter the desired line ID in the **Account** field or leave it blank.

For more information on the valid values for the **Account** field, refer to [Replace Rule](#) on page 82.

- Click **Confirm** to accept the change.

### Note

The default value of minimum and maximum length is 1 and 15 respectively.  
 Area code is configurable via web user interface only.

## Block Out

You can block some specific numbers (up to 10) from being dialed on your phone. When you dial a block out number on your phone, the dialing will fail and the LCD screen will prompt "Forbidden Number".

**To add a block out number via web user interface:**

- Click on **Settings**->**Dial Plan**->**Block Out**.
- Enter the desired value in the **BlockOut NumberX** field.
- Enter the desired line ID in the **Account** field or leave it blank.

For more information on the valid values for the **Account** field, refer to [Replace Rule](#) on page 82.

4. Click **Confirm** to add the block out number.

**Note** Block out number is configurable via web user interface only.

## Emergency Number

Public telephone networks in countries around the world have a single emergency telephone number (emergency services number), that allows a caller to contact local emergency services for assistance when necessary. The emergency telephone number may differ from country to country. It is typically a three-digit number so that it can be easily remembered and dialed quickly. Some countries have a different emergency number for each of the different emergency services.

You can specify the emergency telephone numbers on the IP phone for contacting the emergency services in an emergency situation. You can dial these numbers when the phone is locked. For more information on phone lock, refer to [Phone Lock](#) on page 43.

**Note** Contact your local phone service provider for available emergency numbers in your area. The IP phone also supports the emergency dialplan. For more information, contact your system administrator.

### To specify emergency numbers via web user interface:

1. Click on **Features->Phone Lock**.
2. Enter the emergency number in the **Emergency** field.  
For multiple emergency numbers, enter a comma between every two emergency numbers.  
The default emergency numbers are 112, 911 and 110.

The screenshot shows the Yealink T236 web interface. The 'Features' tab is selected, and the 'Phone Lock' sub-tab is active. The 'Emergency' field is highlighted with a red border and contains the text '112,911,110'. Other fields include 'Phone Lock Enable' (Disabled), 'Phone Lock Type' (All Keys), 'Phone Unlock PIN' (000000), and 'Phone Lock Time Out' (0). A 'NOTE' box on the right states: 'Phone Lock It is used to lock the IP phone to prevent it from unauthorized use. Once the IP phone is locked, a user must enter the password to unlock it. IP phones offer three types of phone lock: Menu Key, Function Keys and All Keys. The IP phone will not be locked immediately after the phone lock type is configured.'

3. Click **Confirm** to accept the change.

**Note** Emergency number is configurable via web user interface only.

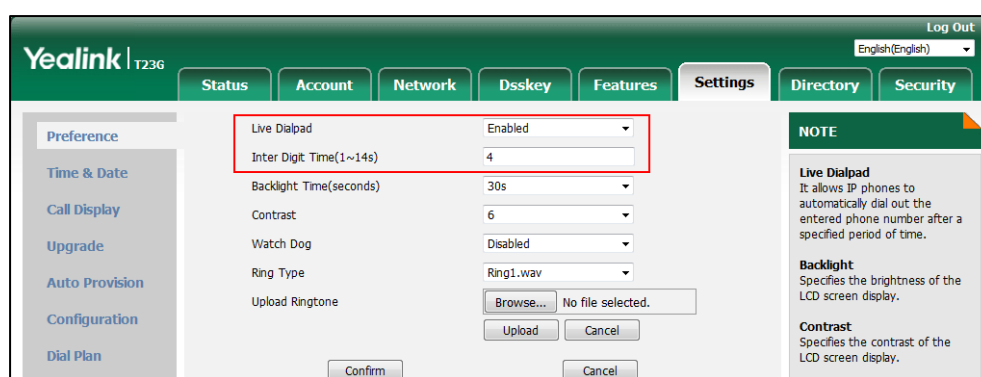

## Live Dialpad

You can enable live dialpad feature on the SIP-T23P/G IP phone, which enables the IP phone to automatically dial out a phone number without pressing the send key. You can also configure a delay, and then the phone will dial out the phone number automatically after the designated period of time.

**To enable live dialpad via web user interface:**

1. Click on **Settings->Preference**.
2. Select **Enabled** from the pull-down list of **Live Dialpad**.
3. Enter the desired delay time in the **Inter Digit Time(1~14s)** field.

The default delay time is 4 seconds.

4. Click **Confirm** to accept the change.

**Note** Live dialpad is configurable via web user interface only.

## Hotline

You can dial a hotline number immediately upon lifting the handset, pressing the Speakerphone key or the line key. You can also configure a delay, and then the phone will dial out the hotline number automatically after the designated period of time.

**To configure the hot line number via phone user interface:**

1. Press **Menu->Features->Hot Line**.
2. Enter the desired number in the **Hotline Number** field.

3. Enter the delay time in the **Hotline Delay** field.

The valid values range from 0 to 10 (seconds) and the default value is "4".

4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Hotline is configurable via web user interface at the path **Features->General Information**.

# Basic Call Features

---

The SIP-T23P/G IP phone is designed to be easily used like a regular phone on a public switched telephone network (PSTN). You can place calls, answer calls, transfer a call to someone else, or conduct a conference call.

This chapter provides basic operating instructions for the SIP-T23P/G IP phone. Topics include:

- [Placing Calls](#)
- [Answering Calls](#)
- [Ending Calls](#)
- [Redialing Numbers](#)
- [Recent Call In Dialing](#)
- [Auto Answer](#)
- [Auto Redial](#)
- [Call Completion](#)
- [ReCall](#)
- [Call Mute](#)
- [Call Hold/Resume](#)
- [Do Not Disturb \(DND\)](#)
- [Call Forward](#)
- [Call Transfer](#)
- [Call Waiting](#)
- [Conference](#)
- [Call Park](#)
- [Call Pickup](#)
- [Anonymous Call](#)
- [Anonymous Call Rejection](#)

If you require additional information or assistance with your new phone, contact your system administrator.

## Placing Calls

You can place a call in one of three ways using your SIP-T23P/G IP phone:

- Using the handset
- Using the speakerphone
- Using the headset

You can also dial the number first, and then choose the way you want to speak to the other party.

You can also search and dial a contact from call history, local directory or remote phone book. For more information, refer to [Contact Management](#) on page 49 and [Call History Management](#) on page 63.

During a call, you can alternate between Speakerphone, Headset and Handset modes by pressing the Speakerphone key, the HEADSET key, or by picking up the handset.

The call duration of the active call and far-site's information (name or phone number) are visible on the LCD screen. In the figure below, the call to "Alin" (the phone number: 1020) has lasted 5 seconds.

### To place a call using the handset:

1. Pick up the handset.
2. Enter the desired number using the keypad.
3. Press  ,  , or the **Send** soft key.

The # key is configured as a send key by default. You can also set the \* key as the send key, or set neither. For more information, refer to [Key As Send](#) on page 42.

### Note

You can also dial using the SIP URI or IP address. To obtain the IP address of a phone, press the **OK** key when the phone is idle. The maximum SIP URI or IP address length is 32 characters. For example, SIP URI: 2210@sip.com, IP: 192.168.1.15.

Your phone may not support direct IP dialing. Contact your system administrator for more information.

### To place a call using the hands-free speakerphone mode:

Do one of the following:

- With the handset on-hook, press  or the line key to obtain a dial tone.

Enter the desired number using the keypad.

Press , , or the **Send** soft key.

- With the handset on-hook, enter the desired number using the keypad.

Press , , , or the **Send** soft key.

### To place a call using the headset:

Do one of the following:

- With the optional headset connected, press  to activate the headset mode.

Press the line key to obtain a dial tone.

Enter the desired number using the keypad.

Press , , or the **Send** soft key.

- With the optional headset connected, press  to activate the headset mode.

Enter the desired number using the keypad.

Press , , or the **Send** soft key.

### Note

To permanently use the headset mode, refer to [Headset Prior](#) on page 68.

The SIP-T23P/G IP phone can handle multiple calls at a time. However, only one active call (the call that has audio associated with it) can be in progress at any time, other calls are placed on hold. The SIP-T23P/G IP phone can handle a maximum of 50 calls at one time.

### To place multiple calls:

You can have more than one call on your SIP-T23P/G IP phone. To place a new call during an active call, do one of the following:

- Press the line key. The active call is placed on hold.

Enter the desired number using the keypad.

Press , , or the **Send** soft key.

- Press the **Hold** soft key to place the original call on hold.

Press the **NewCall** soft key.

Enter the desired number using the keypad.

Press , , or the **Send** soft key.

You can press  or  to switch between calls, and then press the **Resume** soft key to retrieve the desired call.

### Note

If multiple accounts are registered on the phone, you can first press the desired line key on the idle screen or press the **Line** soft key on the dialing screen, and then you can use the selected account to place a call.

## Answering Calls

When you are not in another call, you can answer a call in one of three ways:

- Using the handset
- Using the speakerphone
- Using the headset

### Note

You can reject incoming calls by pressing the **Reject** soft key or the **X** key. You can also activate Do Not Disturb mode to ignore all incoming calls without ring on your phone. For more information, refer to [Do Not Disturb \(DND\)](#) on page 102.

You can forward incoming calls to someone else by pressing the **FWD** soft key. For more information, refer to [Call Forward](#) on page 107.

### Answering When Not in Another Call

Call duration and destination will always appear on the LCD screen for the active call.

#### To answer a call using the handset:

1. Pick up the handset.

#### To answer a call using the hands-free speakerphone mode:

Do one of the following:

- Press .
- With the handset on-hook and the headset mode deactivated, press the **Answer** soft key.
- With the handset on-hook and the headset mode deactivated, press the line key with the fast flashing green LED indicator.

#### To answer a call using the headset:

Do one of the following:

- Press .
- With the headset mode activated, press the **Answer** soft key.
- With the headset mode activated, press the line key with the fast flashing green LED indicator.

### Answering When in Another Call

If you have an active call, and an incoming call arrives on the phone, do one of the following:

- Press the **Answer** soft key.  
The incoming call is answered and the original call is placed on hold.
- Press  to access the new call.

Press  or the **Answer** soft key.

The incoming call is answered and the original call is placed on hold.

## Ending Calls

### To end a call:

Do one of the following:

- If you are using the handset, press the **EndCall** soft key or hang up the handset.
- If you are using the headset, press the **EndCall** soft key.
- If you are using the speakerphone, press  or the **EndCall** soft key.

## Redialing Numbers

### To redial the last dialed number from your phone:

1. Press  twice.

A call to your last dialed number is attempted.

### To redial a previously dialed number from your phone:

1. Press  when the phone is idle.
2. Press  or  to select the desired entry from the placed calls list, and then press  or the **Send** soft key.

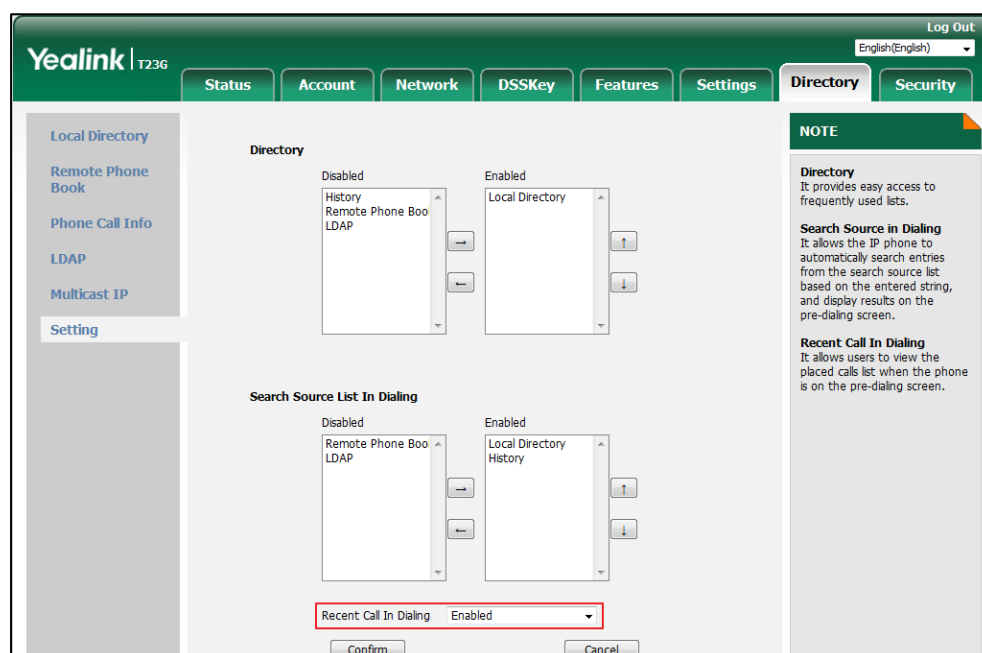

## Recent Call In Dialing

To view the placed calls list when the phone is on the dialing screen, you should enable recent call in dialing in advance.

### To enable recent call in dialing via web user interface:

1. Click on **Directory**->**Setting**.

2. Select **Enabled** from the pull-down list of **Recent Call In Dialing**.

3. Click **Confirm** to accept the change.

#### Note

Recent call in dialing is configurable via web user interface only.

#### To view placed calls list when the phone is on the dialing screen:

1. Pick up the handset, press the Speakerphone key or press the line key.  
The LCD screen displays the placed calls list.

You can also enter a few continuous characters of the contact name or continuous numbers of the contact number (office, mobile or other number) to search from placed calls list.

## Auto Answer

You can use auto answer feature to automatically answer an incoming call on a line. Auto answer is configurable on a per-line basis.

You can choose to mute the local microphone when an incoming call is answered automatically. For more information, refer to [Keep Mute](#) on page 101.

### To configure auto answer via phone user interface:

1. Press **Menu->Features->Auto Answer**.
2. Press  or , or the **Switch** soft key to select the desired account from the **Line ID** field.
3. Press  or , or the **Switch** soft key to select **Enabled** from the **Status** field.

4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

The icon  appears on the LCD screen.

Auto answer is configurable via web user interface at the path **Account->Basic**.

### Note

Auto answer is only applicable when there is no other call in progress on the phone.

## Auto Redial

You can enable auto redial to automatically redial a phone number when the called party is busy. You can also configure the number of auto redial attempts and the time to wait between redial attempts.

**To configure auto redial via phone user interface:**

1. Press **Menu->Features->Auto Redial**.
2. Press  or , or the **Switch** soft key to select **Enabled** from the **Auto Redial** field.

3. Enter the desired time (in seconds) in the **Redial Interval** field.  
The default value is "10".
4. Enter the desired number of redial attempts in the **Redial Times** field.  
The default value is "10".
5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Auto redial is configurable via web user interface at the path **Features->General Information**.

**To use auto redial:**

When the called party is busy, the following prompt will appear on the LCD screen of the phone:

1. Press the **OK** soft key to activate auto redial. The following prompt will appear on the LCD screen of the phone:

2. Wait for the designated period of time or press the **OK** soft key to redial the phone number.

The phone will retry as many times as configured until the called party is idle.

## Call Completion

You can use call completion to notify the caller who failed to reach a desired party when the

party becomes available to receive a call.

**To configure call completion via phone user interface:**

1. Press **Menu->Features->Call Completion**.
2. Press  or  , or the **Switch** soft key to select **Enabled** from the **Call Completion** field.

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Call completion is configurable via web user interface at the path **Features->General Information**.

**To use call completion:**

When the called party is busy, the following prompt will appear on the LCD screen of the phone:

1. Press the **OK** soft key, the phone returns to the idle screen and call completion is activated.

When the called party becomes idle, the following prompt will appear on the LCD screen of the phone:

1. Press the **OK** soft key to redial the number.

**Note**

Call completion is not available on all servers. For more information, contact your system administrator.

## ReCall

You can press a recall key to place a call back to the last incoming call.

### To configure a recall key via phone user interface:

1. Press **Menu->Features->DSS Keys**.
2. Select the desired DSS key.
3. Press  or , or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press  or , or the **Switch** soft key to select **ReCall** from the **Key Type** field.

5. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Recall key is configurable via web user interface at the path **Dsskey->Line Key**.

## Call Mute

You can mute the microphone of the active audio device during an active call so that the other party cannot hear you.

You can also mute the microphone while dialing so that the other party cannot hear you when the call is set up. It helps prevent the other party from hearing the informal discussion when auto answer is enabled on his/her phone. You have to enable keep mute feature in advance.

Call mute applies to all modes (Handset, Headset and Speakerphone).

## Mute a Call

### To mute a call:

1. Press  during an active call.

The LCD screen indicates that the call is now muted.

#### To un-mute a call:

1. Press  again to un-mute the call.

## Keep Mute

Normally, the mute state ends when the active call ends. If keep mute is enabled, you can mute the microphone on the idle/pre-dialing/dialing/ringing/calling/talking screen. The phone stays in the mute state until you un-mute the microphone or until the phone restarts. This feature should be pre-configured by your system administrator.

#### To mute the microphone:

1. Press  on the idle/pre-dialing/dialing/ringing/calling/talking screen.

The icon  appears on the status bar.

#### To un-mute the microphone:

1. Press  again on the idle/pre-dialing/dialing/ringing/calling/talking screen.

The icon  disappears from the status bar.

## Call Hold/Resume

You can place an active call on hold. Only one active call can be in progress at any time. Other calls can be made and received while placing the original call on hold. When you place a call on hold, your IP PBX may play music to the other party while waiting.

**To place a call on hold:**

1. Press the **Hold** soft key during a call.

The line key LED flashes green. The LCD screen indicates that the call is on hold.

**Note**

The phone will beep softly every 30 seconds to remind you that you still have a call on hold. The phone ignores engaged audio device (handset or headset) and switches to Speakerphone to play the hold tone by default.

**To resume a held call:**

1. Press the **Resume** soft key.

**Multiple Calls on Hold:**

If multiple calls are placed on hold, do one of the following:

- Press or to switch between the calls, and then press the **Resume** soft key to retrieve the desired call.
- Press the corresponding line key to retrieve the call.

If more than one call is placed on hold, a numbered prompt appears on the LCD screen, for example "2/3", indicating that this is the second call out of three calls.

## Do Not Disturb (DND)

You can use DND to reject incoming calls automatically on the phone. The prompt message "**n New Missed Call(s)**" ("n" indicates the number of missed calls, e.g., 1 New Missed Call(s)) will appear on the LCD screen, and callers will receive a busy message. All calls you receive while DND is enabled are logged to your missed calls list.

When DND feature is enabled, the IP phone supports displaying a large DND icon on the idle screen. For more information, contact your system administrator.

#### Note

The prompt message will display only if Missed Call Log for the line is enabled. Missed call log is configurable via web user interface at the path **Account->Basic**.

Do not disturb is local to the phone, and may be overridden by the server settings. For more information, contact your system administrator.

You can enable/disable DND for the phone system, or you can customize DND for each or all accounts. Two DND modes:

- **Phone** (default): DND is effective for the phone system.
- **Custom**: DND can be configured for each or all accounts.

You can receive incoming calls from authorized numbers when DND is enabled.

#### To configure the DND mode via web user interface:

1. Click on **Features->Forward&DND**.

- In the **DND** block, mark the desired radio box in the **Mode** field.

The screenshot shows the Yealink T236 web interface. The 'Features' tab is selected. Under the 'Forward' section, the 'DND' block is visible. The 'DND Status' is set to 'On', which is highlighted with a red rectangular box. Other settings include 'Forward Emergency' (Disabled), 'Forward Authorized Numbers' (1002, 1003), 'Mode' (Phone), 'Account' (1003), and 'DND Emergency' (Enabled).

- Click **Confirm** to accept the change.

**Note** DND mode is configurable via web user interface only.

#### To enable DND in phone mode:

- Press the **DND** soft key when the phone is idle.

The icon  appears on the status bar.

**Note** When DND and busy forward are enabled in phone mode, calls will be sent to the configured destination number. For more information on busy forward, refer to [Call Forward](#) on page 107.

**To enable DND in custom mode:**

1. Press the **DND** soft key when the phone is idle.

The LCD screen displays a list of accounts registered on the phone.

2. You can enable it for a specific account:

- 1) Press  or  to select the desired account and then press the **Enter** soft key.
- 2) Press  or , or the **Switch** soft key to select **Enabled** from the **DND Status** field.
- 3) (Optional.) Enter the DND on code or off code respectively in the **On Code** or **Off Code** field.

If the on code or off code is configured, the IP phone will send the corresponding code to activate or deactivate DND on the server. It is not available on all servers.

You can also enable DND for all accounts:

- 1) Do the following:
  - Press the **All On** soft key if DND on code and off code are not needed on your server.
  - After DND was enabled for a specific account on the step 2, press  or  to highlight the **DND Status** field.

Press the **All Lines** soft key. The LCD screen prompts "Copy to all lines?".

Press the **OK** soft key to accept the change or the **Cancel** soft key to cancel.

3. Press the **Save** soft key to accept the change.

If you enable DND for the default account, the associated line icon will change to , and the icon  will appear on the status bar.

If you enable DND for the non-default account, only the associated line icon will change to .

If you enable DND for all accounts, all line icons will change to , and the icon  will appear on the status bar.

#### Note

When DND and busy forward are both enabled for a specific account, calls to the specific account will be sent to the configured destination number. For more information on call forward, refer to [Call Forward](#) on page 107.

#### To configure the DND authorized numbers via web user interface:

1. Click on **Features->Forward&DND**.
2. Select **Enabled** from the pull-down list of **DND Emergency**.
3. Enter the numbers in the **DND Authorized Numbers** field.

For multiple numbers, enter a comma between every two numbers.

The screenshot shows the Yealink T236 web interface with the 'Features' tab selected. The 'Forward' section is expanded, showing various forwarding options. The 'DND' section is also expanded, and a red box highlights the 'DND Emergency' field (set to 'Enabled') and the 'DND Authorized Numbers' field (set to '1002,1003'). The 'NOTE' sidebar on the right contains information about Call Forward and DND features.

- Click **Confirm** to accept the change.

When DND is enabled on the phone, the phone can still receive incoming calls from the numbers specified in the **DND Authorized Numbers** field.

#### Note

DND authorized number is configurable via web user interface only.

When the phone misses a call, a prompt window will pop up by default. If you want to disable the feature, contact your system administrator for more information.

#### To disable DND in phone mode:

- Press the **DND** soft key when the phone is idle.

#### To disable DND in custom mode:

- Press the **DND** soft key when the phone is idle.
- Press  $\uparrow$  or  $\downarrow$  to select the desired account and then press the **Enter** soft key.
- Press  $\leftarrow$  or  $\rightarrow$ , or the **Switch** soft key to select **Disabled** from the **DND Status** field.

If you want to disable DND for all accounts, press the **All Lines** soft key.

- Press the **Save** soft key to accept the change.

## Call Forward

You can configure your phone to forward incoming calls to another party (static forwarding).

You can also forward calls while your phone is ringing (dynamic forwarding).

### Note

When the phone forwards a call, a prompt window will pop up by default. If you want to disable the feature, contact your system administrator for more information.

## Static Forwarding

Three types of static forwarding:

- **Always Forward:** Incoming calls are immediately forwarded.
- **Busy Forward:** Incoming calls are immediately forwarded if the phone is busy.
- **No Answer Forward:** Incoming calls are forwarded if not answered after a period of time.

You can enable/disable call forward for the phone system, or you can customize call forward for each or all accounts. Two call forward modes:

- **Phone** (default): Call forward is effective for the phone system.
- **Custom:** Call forward can be configured for each or all accounts.

**To configure the call forward mode via web user interface:**

1. Click on **Features**->**Forward&DND**.
2. In the **Forward** block, mark the desired radio box in the **Mode** field.

The screenshot shows the Yealink T236 web interface. The top navigation bar includes 'Status', 'Account', 'Network', 'DSSKey', 'Features', 'Settings', 'Directory', and 'Security'. The 'Features' tab is selected, and the 'Forward&DND' sub-tab is active. The 'Forward' section is highlighted with a red box, showing the 'Mode' field with 'Phone' selected. The 'Always Forward', 'Busy Forward', and 'No Answer Forward' sections are also visible.

Forward	
Forward Emergency	Enabled
Forward Authorized Numbers	1005,1006
<b>Mode</b>	<input checked="" type="radio"/> Phone <input type="radio"/> Custom
Account

**NOTE**

**Call Forward**  
It allows users to redirect an incoming call to a third party.

**Call Forward Mode**  
**Phone:** Call forward feature is effective for the IP phone.  
**Custom:** Call forward feature can be configured for each or all accounts.

**Do Not Disturb (DND)**  
It allows IP phones to ignore incoming calls.

**DND Mode**  
**Phone:** DND feature is effective for the IP phone.  
**Custom:** DND feature can be configured for each or all accounts.

3. Click **Confirm** to accept the change.

**Note**

Call forward mode is configurable via web user interface only.

**To enable call forward in phone mode:**

1. Press **Menu->Features->Call Forward**.
2. Press  or  to select the desired forwarding type, and then press the **Enter** soft key.
3. Depending on your selection:
  - a) If you select **Always Forward**:
    - 1) Press  or  , or the **Switch** soft key to select **Enabled** from the **Always Forward** field.

- 2) Enter the destination number you want to forward all incoming calls to in the **Forward to** field.
- 3) (Optional.) Enter the always forward on code or off code respectively in the **On Code** or **Off Code** field.
- b) If you select **Busy Forward**:
  - 1) Press  or  , or the **Switch** soft key to select **Enabled** from the **Busy Forward** field.

- 2) Enter the destination number you want to forward incoming calls to when the phone is busy in the **Forward to** field.
- 3) (Optional.) Enter the busy forward on code or off code respectively in the **On Code** or **Off Code** field.

c) If you select **No Answer Forward**:

- 1) Press  or , or the **Switch** soft key to select **Enabled** from the **No Answer Forward** field.

- 2) Enter the destination number you want to forward unanswered incoming calls to in the **Forward to** field.
- 3) Press  or , or the **Switch** soft key to select the ring time to wait before forwarding from the **After Ring Time** field.

The default ring time is 12 seconds.

- 4) (Optional.) Enter the no answer forward on code or off code respectively in the **On Code** or **Off Code** field.

4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

The icon  on the status bar indicates that the call forward is enabled.

**To enable call forward in custom mode:**

1. Press **Menu->Features->Call Forward**.
2. Press  or  to select the desired account, and then press the **Enter** soft key.

3. Press  or  to select the desired forwarding type, and then press the **Enter** soft key.
4. Depending on your selection:

a) If you select **Always Forward**, you can enable it for a specific account.

- 1) Press  or , or the **Switch** soft key to select **Enabled** from the **Always Forward** field.

- 2) Enter the destination number you want to forward all incoming calls to in the **Forward to** field.
- 3) (Optional.) Enter the always forward on code or off code respectively in the **On Code** or **Off Code** field.

You can also enable always forward for all accounts. After always forward was enabled for a specific account, do the following:

- 1) Press  or  to highlight the **Always Forward** field.
- 2) Press the **All Lines** soft key.

The LCD screen prompts "Copy to all lines?".

- 3) Press the **OK** soft key to accept the change or the **Cancel** soft key to cancel.
- b) If you select **Busy Forward**, you can enable it for a specific account.
- 1) Press  or , or the **Switch** soft key to select **Enabled** from the **Busy Forward** field.

- 2) Enter the destination number you want to forward all incoming calls to when the phone is busy in the **Forward to** field.
- 3) (Optional.) Enter the busy forward on code or off code respectively in the **On Code** or **Off Code** field.

You can also enable busy forward for all accounts. After busy forward was enabled for a specific account, do the following:

- 1) Press  or  to highlight the **Busy Forward** field.
- 2) Press the **All Lines** soft key.

The LCD screen prompts "Copy to all lines?".

- 3) Press the **OK** soft key to accept the change or the **Cancel** soft key to cancel.
- c) If you select **No Answer Forward**, you can enable it for a specific account.
- 1) Press or , or the **Switch** soft key to select **Enabled** from the **No Answer Forward** field.

- 2) Enter the destination number you want to forward all unanswered incoming calls to in the **Forward to** field.
- 3) Press or , or the **Switch** soft key to select the ring time to wait before forwarding from the **After Ring Time** field.  
The default ring time is 12 seconds.
- 4) (Optional.) Enter the no answer forward on code or off code respectively in the **On Code** or **Off Code** field.

You can also enable no answer forward for all accounts. After no answer forward was enabled for a specific account, do the following:

- 1) Press or to highlight the **No Answer Forward** field.
- 2) Press the **All Lines** soft key.

The LCD screen prompts "Copy to all lines?".

- 3) Press the **OK** soft key to accept the change or the **Cancel** soft key to cancel.
5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

If you enable call forward for the default account, the associated line icon will change to , and the icon  will appear on the status bar.

If you enable call forward for the non-default account, only the associated line icon will change to .

If you enable call forward for all accounts, all line icons will change to , and the icon will  appear on the status bar.

If the forward on code or off code is configured, the IP phone sends the corresponding code to the server when a certain action takes place. For example, if you set the Always Forward on code to be \*71 (may vary on different servers), and the target number to be 1234. When you enable Always Forward on the IP phone, the IP phone sends \*711234 to the server, and then the server will enable Always Forward feature on the server side, hence being able to get the right status of the extension.

Call forward is configurable via web user interface at the path **Features->Forward&DND**.

#### Note

You can also enter the SIP URI or IP address in the **Forward to** field. For more information on using the SIP URI or IP address, refer to [Placing Calls](#) on page 92.

Call forward is local to the phone, and may be overridden by the server settings. Call forward on code or off code may be different between servers. For more information, contact your system administrator.

**To configure the forward authorized numbers via web user interface:**

1. Click on **Features->Forward&DND**.
2. Select **Enabled** from the pull-down list of **Forward Emergency**.
3. Enter the numbers in the **Forward Authorized Numbers** field.  
For multiple numbers, enter a comma between every two numbers.

The screenshot shows the Yealink T236 web interface. The 'Features' tab is selected, and the 'Forward&DND' sub-tab is active. In the 'Forward' section, 'Forward Emergency' is set to 'Enabled' and 'Forward Authorized Numbers' is '1005,1006'. Below this, there are sections for 'Mode' (Phone/Custom), 'Account', 'Always Forward' (On/Off), 'Busy Forward' (On/Off), and 'No Answer Forward' (On/Off), each with associated input fields for Target, On Code, and Off Code. A 'NOTE' box on the right provides details about the 'Call Forward' and 'Do Not Disturb (DND)' features.

4. Click **Confirm** to accept the change.

When call forward is enabled on the phone, the phone cannot forward incoming calls from the numbers specified in the **Forward Authorized Numbers** field.

**Note**

Forward authorized number is configurable via web user interface only.

**To disable call forward in phone mode:**

Do one of the following:

- Press  when the phone is idle.
- Press **Menu->Features->Call Forward**.  
Press  or  to select the desired forwarding type and then press the **Enter** soft key.  
Press  or , or the **Switch** soft key to select **Disabled** to disable the call forward.  
Press the **Save** soft key to accept the change.

**To disable call forward in custom mode:**

1. Press **Menu->Features->Call Forward** or press  when the phone is idle.
2. Press  or  to select the desired account and then press the **Enter** soft key.
3. Press  or  to select the desired forwarding type and then press the **Enter** soft key.

4. Press  or , or the **Switch** soft key to select **Disabled** to disable the call forward.  
If you want to disable call forward for all accounts, press the **All Lines** soft key.
5. Press the **Save** soft key to accept the change.

## Dynamic Forwarding

You can manually forward a call to another number while your phone rings.

### To forward an incoming call to another party:

1. When the phone is ringing, press the **FWD** soft key.
2. Enter the number you want to forward the incoming call to.

3. Press , , or the **Send** soft key.  
The LCD screen prompts a call forward message.

### Note

When the phone forwards a call, a prompt window will pop up by default, if you want to disable the feature, contact your system administrator for more information.

## Call Transfer

You can transfer a call to another party during a call in one of three ways:

- **Blind Transfer:** Transfer a call directly to another party without consulting.
- **Semi-Attended Transfer:** Transfer a call when the target phone is ringing.
- **Attended Transfer (Consultative Transfer):** Transfer a call with prior consulting.

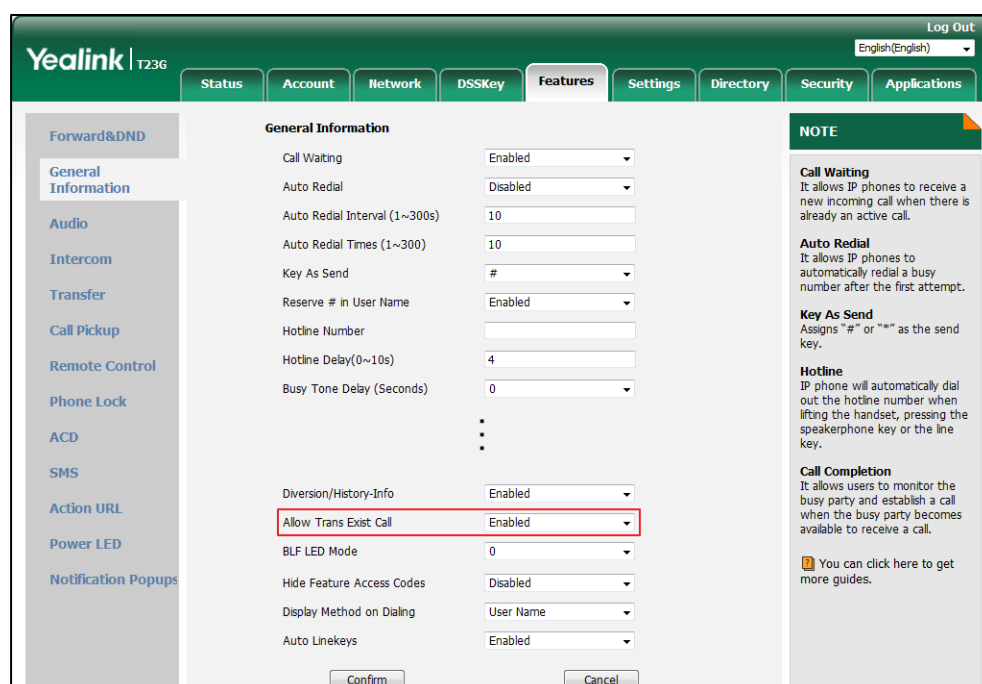

### Allow Trans Exist Call

You can also perform a blind transfer to the exist call that is held.

### To enable allow trans exist call via web user interface:

1. Click on **Features->General Information**.

2. Select **Enabled** from the pull-down list of **Allow Trans Exist Call**.

3. Click **Confirm** to accept the change.

## Blind Transfer

Before performing a blind transfer (except you use dial number method), make sure that the transfer mode on DSS key is configured as **Blind Transfer**. For more information on how to configure it, refer to [Configuring Transfer Mode on DSS Key](#) on page 137.

### To perform a blind transfer during a call:

1. Press  or the **Tran** soft key during a call.
2. You can do one of the following:
  - Enter the number you want to transfer the call to.

Press  or the **Tran** soft key to complete the transfer.

If you are using a handset, the transfer can be completed by hanging up the handset.

- Press the **Dir** soft key, and then select **Local Directory**. Select the desired group and

search for the contact (Directory should be configured in advance. Refer to [Directory](#) on page 49 for more information).

Press ,  or the **Send** soft key to complete the transfer.

- Press the **Dir** soft key, and then select **History**. Select the desired list and then press  or  to select the entry (Directory should be configured in advance. Refer to [Directory](#) on page 49 for more information).

Press ,  or the **Send** soft key to complete the transfer.

- Press the **Dir** soft key, and then select **Remote Phone Book**. Select the desired group and search for the contact (Directory should be configured in advance. Refer to [Directory](#) on page 49 and [Remote Phone Book](#) on page 61 for more information).

Press ,  or the **Send** soft key to complete the transfer.

If you are using a handset, the transfer can be completed by hanging up the handset.

You can also perform a blind transfer to another existing call when there are multiple calls.

Before performing a blind transfer to another existing call, make sure that the Allow Trans Exist Call is enabled. For more information, refer to [Allow Trans Exist Call](#) on page 115.

#### To perform a blind transfer during multiple calls:

1. Press  or the **Tran** soft key during a call.
2. You can do one of the following:
  - Press  or  to select the desired hold call you want to transfer the call to.

- Select **NewCall**, you can do one of the following:
  - Enter the number you want to transfer the call to.

Press  or the **Tran** soft key to complete the transfer.

If you are using a handset, the transfer can be completed by hanging up the handset.

- Press the **Dir** soft key, and then select **Local Directory**. Select the desired group and search for the contact (Directory should be configured in advance. Refer to

[Directory](#) on page 49 for more information).

Press  ,  or the **Send** soft key to complete the transfer.

- Press the **Dir** soft key, and then select **History**. Select the desired list and then press  or  to select the entry (Directory should be configured in advance. Refer to [Directory](#) on page 49 for more information).

Press  ,  or the **Send** soft key to complete the transfer.

- Press the **Dir** soft key, and then select **Remote Phone Book**. Select the desired group and search for the contact (Directory should be configured in advance. Refer to [Directory](#) on page 49 and [Remote Phone Book](#) on page 61 for more information).

Press  ,  or the **Send** soft key to complete the transfer.

If you are using a handset, the transfer can be completed by hanging up the handset.

## Semi-attended Transfer

Before performing a semi-attended transfer (except you use dial number method), make sure that the transfer mode on DSS key is configured as **New Call** or **Attended Transfer**. For more information on how to configure it, refer to [Configuring Transfer Mode on DSS Key](#) on page 137.

### To perform a semi-attended transfer:

1. Press  or the **Tran** soft key during a call.
2. Do one of the following:
  - Enter the number you want to transfer the call to.

Press  or  to dial out.

- Press the **Dir** soft key, and then select **Local Directory**. Select the desired group and search for the contact (Directory should be configured in advance. Refer to [Directory](#) on page 49 for more information).

Press  ,  or the **Send** soft key to dial out.

- Press the **Dir** soft key, and then select **History**. Select the desired list and then press  or  to select the entry (Directory should be configured in advance. Refer to [Directory](#) on page 49 for more information).

Press  ,  or the **Send** soft key to dial out.

- Press the **Dir** soft key, and then select **Remote Phone Book**. Select the desired group and search for the contact (Directory should be configured in advance. Refer to [Directory](#) on page 49 and [Remote Phone Book](#) on page 61 for more information).  
Press ,  or the **Send** soft key to dial out.
  - If **Allow Trans Exist Call** (refer to [Allow Trans Exist Call](#) on page 115) is enabled, you can select the **NewCall** and repeat steps mentioned above to complete transfer.
3. Press  or the **Tran** soft key to complete the transfer when receiving ringback.  
If you are using a handset, the transfer can be completed by hanging up the handset.

## Attended Transfer

Before performing an attended transfer (except you use dial number method), make sure that the transfer mode on DSS key is configured as **New Call** or **Attended Transfer**. For more information on how to configure it, refer to [Configuring Transfer Mode on DSS Key](#) on page 137.

### To perform an attended transfer:

1. Press  or the **Tran** soft key during a call.
2. Do one of the following:
  - Enter the number you want to transfer the call to.  
Press  or  to dial out.
  - Press the **Dir** soft key, and then select **Local Directory**. Select the desired group and search for the contact (Directory should be configured in advance. Refer to [Directory](#) on page 49 for more information).  
Press ,  or the **Send** soft key to dial out.
  - Press the **Dir** soft key, and then select **History**. Select the desired list and then press  or  to select the entry (Directory should be configured in advance. Refer to [Directory](#) on page 49 for more information).  
Press ,  or the **Send** soft key to dial out.
  - Press the **Dir** soft key, and then select **Remote Phone Book**. Select the desired group and search for the contact (Directory should be configured in advance. Refer to [Directory](#) on page 49 and [Remote Phone Book](#) on page 61 for more information).  
Press ,  or the **Send** soft key to dial out.
  - If **Allow Trans Exist Call** (refer to [Allow Trans Exist Call](#) on page 115) is enabled, you can select the **NewCall** and repeat steps mentioned above to complete transfer.
3. After the party answers the call, press  or the **Tran** soft key to complete the transfer.  
If you are using a handset, the transfer can be completed by hanging up the handset.  
You can cancel the transfer before the call is connected by pressing the **Cancel** soft key.

## Call Waiting

You can enable or disable call waiting on the phone. If call waiting is enabled, you can receive another call while there is already an active call on the phone. Otherwise, another incoming call is automatically rejected by the phone with a busy message when there is an active call on the phone. You can also enable or disable the phone to play a warning tone when receiving another call.

**To configure call waiting via phone user interface:**

1. Press **Menu->Features->Call Waiting**.
2. Press ◀ or ▶, or the **Switch** soft key to select **Enabled** from the **Call Waiting** field.

3. Press ◀ or ▶, or the **Switch** soft key to select **Enabled** from the **Play Tone** field.
4. (Optional.) Enter the call waiting on code or off code respectively in the **On Code** or **Off Code** field.

If on code or off code is configured, the IP phone will send the corresponding code to activate or deactivate call waiting on the server. It is not available on all servers.

5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Call waiting is configurable via web user interface at the path **Features->General Information**.

### Note

If on code or off code is not configured, the call waiting may not take effect. It depends on your server. Contact your server administrator for more information.

## Conference

You can create a conference with other two parties using the phone's local conference. You can create a conference between an active call and a call on hold by pressing the **Conf** soft key. The SIP-T23P/G IP phone also supports network conference.

### Note

Network conference is not available on all servers. For more information, contact your system administrator.

## Local Conference

The SIP-T23P/G IP phone supports up to 3 parties (including yourself) in a conference call. This

is the default method of conference called Local Conference.

### Note

To set up a local conference call, make sure local conference feature is enabled. For more information, contact your system administrator.

### To set up a local conference call:

1. Place a call to the first party.
2. When the first party answers the call, press the **Conf** soft key to place a new call.  
The active call is placed on hold.
3. Enter the number of the second party and then press , , or the **Send** soft key.
4. When the second party answers the call, press the **Conf** soft key again to join all parties in the conference.

You can press  or  to see all parties in the conference.

### To join two calls in a conference:

1. Place two calls using two different accounts on the phone (for example, place the first call using account 1, and then place the second call using account 2).
2. Press  or  to select the call for conference and ensure that the call is active (for example, select the call on account 1).
3. Press the **Conf** soft key to join the two calls in the conference on the selected account.

### During the conference call, you can do the following actions:

- Press the **Hold** soft key to place the conference on hold.
- Press the **Split** soft key to split the conference call into two individual calls on hold.
- Press the **Manage** soft key, and then press  or  to select the desired party:
  - Press the **FarMute** soft key to mute the party. The muted party can hear everyone, but no one can hear the muted party.
  - Press the **Remove** soft key to remove the party from the conference call.
  - Press the **NewCall** soft key to place a new call.
  - Press the **Back** soft key to return to the previous screen.
- Press  to mute the conference call, all other participants can hear each other, but they cannot hear you.

- Press the **EndCall** soft key to drop the conference call.

## Network Conference

You can use network conference feature on the SIP-T23P/G IP phone to conduct a conference with multiple participants.

This feature allows you to perform the following:

- Join two calls together into a conference call.
- Invite another party into an active conference call.

To use this feature, contact your system administrator for the network conference URI in advance.

### To configure network conference via web user interface:

1. Click on **Account->Advanced**.
2. Select the desired account from the pull-down list of **Account**.
3. Select **Network Conference** from the pull-down list of **Conference Type**.
4. Enter the conference URI (e.g., conference@example.com) in the **Conference URI** field.

The screenshot shows the Yealink T23G web interface. The top navigation bar includes 'Status', 'Account', 'Network', 'DSSKey', 'Features', 'Settings', 'Directory', and 'Security'. The 'Account' tab is active, and the 'Advanced' sub-tab is selected. The 'Account' dropdown is set to 'Account 1'. The 'Conference Type' dropdown is set to 'Network Conference', and the 'Conference URI' text field contains 'conference@example.com'. The 'SIP Registration Retry Timer' is set to 30. The 'Confirm' button is highlighted with a red box. On the right, a 'NOTE' section contains information about DTMF, Session Timer, Busy Lamp Field/BLF List, Shared Call Appearance (SCA)/ Bridge Line Appearance (BLA), and Network Conference.

5. Click **Confirm** to accept the change.

### To set up a network conference call:

1. Place a call to the first party.
2. Press the **Conf** soft key to place a new call.  
The active call is placed on hold.
3. Enter the number of the second party and then press **OK** , **#SEND** , or the **Send** soft key.

4. When the second party answers the call, press the **Conf** soft key to add the second party to the conference.
5. Press the **Conf** soft key to place a new call.  
The conference is placed on hold.
6. Enter the number of the new party and then press , , or the **Send** soft key.
7. When the new party answers the call, press the **Conf** soft key to add the new party to the conference.
8. Repeat steps 5 to 7 until you have added all intended parties.

The procedures to set up a network conference call on specific servers may be different from introduced above. Contact your system administrator for more information.

## Call Park

You can use call park feature to place a call on hold, and then retrieve the call from another phone in the system (for example, a phone in another office or conference room). You can park an active call by pressing the **Park** soft key or call park key (if configured) on the phone. If the call is parked successfully, there is a voice prompt confirming that the call was parked. You can retrieve the parked call by pressing the **Retrieve** soft key or the retrieve park key (if configured). If the parked call is not retrieved within a period of time defined by the system, the phone performing call park will receive the call back.

### Note

Call park is not available on all servers. Contact your system administrator for more information.

The IP phone supports call park feature under the following modes:

- **FAC mode:** park the call to the local extension or a desired extension through dialing the park code, and retrieve the parked call from the local extension or desired extension through dialing the park retrieve code.
- **Transfer mode:** park the call to shared parking lot through performing a blind transfer to a call park number (call park code), and retrieve the parked call from the shared parking lot through dialing the park retrieve code.

You need to configure the call park code and park retrieve code before using call park feature. You can also configure a call park key and retrieve park key. For more information, refer to [DSS Keys](#) on page 69.

### Note

The call park code and park retrieve code are predefined on the system server. Contact your system administrator for more information.

## FAC Mode

To configure call park feature in FAC mode via web user interface:

1. Click on **Features->Call Pickup**.
2. Select **FAC** from the pull-down list of **Call Park Mode**.
3. Select **Enabled** from the pull-down list of **Call Park**.
4. If **Enabled** is selected, the **Park** soft key will display on the LCD screen during a call, and the **Retrieve** soft key will display on the dialing screen.
5. (Optional.) Enter the call park code in the **Call Park Code** field.  
It is configured for the **Park** soft key. This call park code will also apply to the call park key.
6. (Optional.) Enter the park retrieve code in the **Park Retrieve Code** field.  
It is configured for the **Retrieve** soft key. This park retrieve code will also apply to the retrieve park key.

The screenshot shows the Yealink T236 web interface. The 'Features' tab is selected, and the 'Call Pickup' sub-tab is active. The 'Call Park' section is highlighted with a red box. The settings for 'Call Park' are: 'Call Park Mode' (FAC), 'Call Park' (Enabled), 'Call Park Code' (\*68), and 'Park Retrieve Code' (\*88). The 'Call Pickup' section above it has settings: 'Directed Call Pickup' (Disabled), 'Directed Call Pickup Code' (\*97), 'Group Call Pickup' (Disabled), 'Group Call Pickup Code' (empty), 'Visual Alert for BLF Pickup' (Disabled), 'Audio Alert for BLF Pickup' (Disabled), and 'Ring Type for BLF Pickup' (Ring5.wav). A 'NOTE' section on the right explains the features.

7. Click **Confirm** to accept the change.

**Note** If the **Park** or **Retrieve** soft key doesn't appear on the LCD screen, please select **Disabled** from the pull-down list of **Custom Softkey** via web user interface at path **Settings->Softkey Layout**.

To park a call in FAC mode:

1. During a call, press the **Park** soft key (You may need to press the **More** soft key to see the **Park** soft key) or the call park key (if configured).

- If the call park code is not configured, you need to enter the call park code.

Press ,  or the **Park** soft key.

- If the call park code is configured, the phone will dial the configured call park code shown as below:

2. Do one of the following:

- a) If you want to park the call against the local extension.

- 1) Press .

If the call is parked successfully, you will hear a voice prompt confirming that the call is parked.

- b) If you want to park the call against desired extension.

- 1) Enter an extension (e.g., 4606) where you want to park the call.

- 2) Press  or .

If the call is parked successfully, you will hear a voice prompt confirming that the call is parked. The call is parked against the extension you entered.

**To retrieve a parked call in FAC mode:**

1. Do one of the following:

- If the park retrieve code is not configured, dial the park retrieve code (e.g., \*88).
- If the park retrieve code is configured, press the **Retrieve** soft key on the dialing screen or retrieve park key (if configured) on the IP phone.

The phone will dial the configured park retrieve code and the Retrieve screen appears as below:

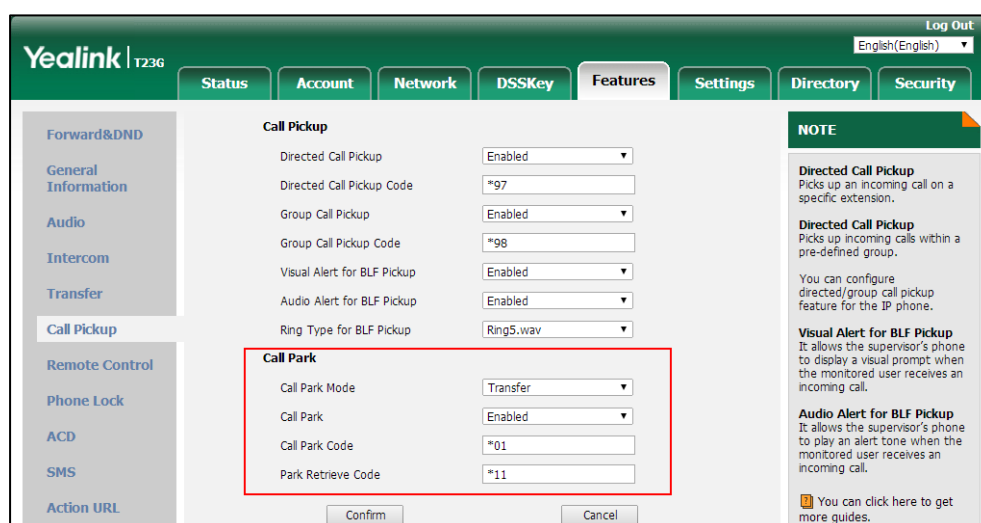

2. Follow the voice prompt, do one of the following:
  - Press  on the phone where the call is parked.
  - Enter the desired extension followed by # (e.g., 4606#) on any phone.

## Transfer Mode

To configure call park feature in transfer mode via web user interface:

1. Click on **Features->Call Pickup**.
2. Select **Transfer** from the pull-down list of **Call Park Mode**.
3. Select **Enabled** from the pull-down list of **Call Park**.  
If **Enabled** is selected, the **Park** soft key will display on the LCD screen during a call, and the **Retrieve** soft key will display on the dialing screen.
4. (Optional.) Enter the call park code in the **Call Park Code** field.  
It is configured for the **Park** soft key. This call park code will also apply to the call park key.
5. (Optional.) Enter the park retrieve code in the **Park Retrieve Code** field.  
It is configured for the **Retrieve** soft key. This park retrieve code will also apply to the retrieve park key.

6. Click **Confirm** to accept the change.

**Note**

If the **Park** or **Retrieve** soft key doesn't appear on the LCD screen, please select **Disabled** from the pull-down list of **Custom Softkey** via web user interface at path **Settings->Softkey Layout**.

**To park a call in Transfer mode:**

1. During a call, press the **Park** soft key (You may need to press the **More** soft key to see the **Park** soft key) or the call park key (if configured).
  - If the call park code is not configured, you need to enter the call park code (e.g., \*01).

Press , , or the **Park** soft key. The call will be transferred to the directional shared parking lot.

- If the call park code is configured, the call will be directly transferred to the shared parking lot.

**Note**

For some servers, the system will return a specific call park retrieve number (park retrieve code) from which the call can be retrieved after parking successfully.

**To retrieve a parked call in Transfer mode:**

1. Do one of the following:
  - If the park retrieve code is not configured, dial the park retrieve code (e.g., \*11).

- If the park retrieve code is configured, press the **Retrieve** soft key on the dialing screen or retrieve park key (if configured) on the IP phone.  
The phone will retrieve the parked call from the shared parking lot.

## Call Pickup

You can use call pickup to answer someone else's incoming call on your phone. The SIP-T23P/G IP phone supports directed call pickup and group call pickup. Directed call pickup is used for picking up a call that is ringing at a target phone number. Group call pickup is used for picking up a call that is ringing at any phone number in a certain group. The pickup group should be predefined, contact your system administrator for more information.

You can pick up an incoming call by using the **DPickup/GPickup** soft key. To use call pickup, you need to configure the call pickup code beforehand on a global or per-line basis via web user interface.

### Note

If there are many incoming calls at the same time, pressing the **GPickup** soft key on the phone will pick up the call that rings first.

## Directed Call Pickup

**To enable directed call pickup and configure the directed call pickup code on a global basis via web user interface:**

1. Click on **Features->Call Pickup**.
2. Select **Enabled** from the pull-down list of **Directed Call Pickup**.
3. Enter the directed call pickup code in the **Directed Call Pickup Code** field.

The screenshot shows the Yealink T23P web interface. The top navigation bar includes 'Status', 'Account', 'Network', 'DSSKey', 'Features', 'Settings', 'Directory', and 'Security'. The 'Features' tab is active. On the left, the 'Forward&DND' menu is expanded, and 'Call Pickup' is selected. The main content area is titled 'Call Pickup' and contains several configuration options:
 

- Directed Call Pickup**: A dropdown menu currently set to 'Enabled'.
- Directed Call Pickup Code**: A text input field containing '\*97'.
- Group Call Pickup**: A dropdown menu set to 'Disabled'.
- Group Call Pickup Code**: An empty text input field.
- Visual Alert for BLF Pickup**: A dropdown menu set to 'Disabled'.
- Audio Alert for BLF Pickup**: A dropdown menu set to 'Disabled'.
- Ring Type for BLF Pickup**: A dropdown menu set to 'Ring5.wav'.

 A red rectangular box highlights the 'Directed Call Pickup' dropdown and the 'Directed Call Pickup Code' field. On the right side, a 'NOTE' section provides additional information:
 

- Directed Call Pickup**: Picks up an incoming call on a specific extension.
- Directed Call Pickup**: Picks up incoming calls within a pre-defined group.
- A note states: 'You can configure directed/group call pickup feature for the IP phone.'
- Visual Alert for BLF Pickup**: It allows the supervisor's phone.

4. Click **Confirm** to accept the change.

**To configure the directed call pickup code on a per-line basis via web user interface:**

1. Click on **Account->Advanced**.
2. Select the desired account from the pull-down list of **Account**.

- Enter the directed call pickup code in the **Directed Call Pickup Code** field.

The screenshot shows the Yealink T236 web interface. The 'Account' tab is selected. The 'Directed Call Pickup Code' field is highlighted with a red box and contains the value '\*97'. Other fields include Keep Alive Type, Keep Alive Interval, RPort, Subscribe Period, DTMF Type, DTMF Info Type, Music Server URI, Group Call Pickup Code, Distinctive Ring Tones, Unregister When Reboot, Out Dialog BLF, VQ RTPC-XR Collector name, VQ RTPC-XR Collector address, and VQ RTPC-XR Collector port. A 'NOTE' section on the right provides information about DTMF, Session Timer, Busy Lamp Field/BLF List, Shared Call Appearance (SCA)/ Bridge Line Appearance (BLA), and Network Conference.

- Click **Confirm** to accept the change.

#### To pick up a call directly:

- Pick up the handset, press the Speakerphone key or press the line key (You may need to press the **More** soft key to see the **DPickup** soft key).

The **DPickup** soft key appears on the LCD screen.

- Press the **DPickup** soft key on your phone when the target phone receives an incoming call.
- Enter the phone number which is receiving an incoming call.
- Press the **DPickup** soft key again.

The call is answered on your phone.

You can also configure a DSS key as a direct pickup key via phone user interface or web user interface. Once configured, you can pick up a call by pressing the direct pickup key directly. For more information, refer to [DSS Keys](#) on page 69.

## Group Call Pickup

To enable group call pickup and configure the group call pickup code on a global basis via web user interface:

1. Click on **Features->Call Pickup**.
2. Select **Enabled** from the pull-down list of **Group Call Pickup**.
3. Enter the group call pickup code in the **Group Call Pickup Code** field.

The screenshot shows the 'Call Pickup' configuration page in the Yealink T23G web interface. The 'Group Call Pickup' dropdown is set to 'Enabled' and the 'Group Call Pickup Code' is set to '\*98'. A red box highlights these two fields. The 'NOTE' section on the right explains the features.

Field	Value
Directed Call Pickup	Enabled
Directed Call Pickup Code	*97
Group Call Pickup	Enabled
Group Call Pickup Code	*98
Visual Alert for BLF Pickup	Disabled
Audio Alert for BLF Pickup	Disabled
Ring Type for BLF Pickup	Ring5.wav

**NOTE**

**Directed Call Pickup**  
Picks up an incoming call on a specific extension.

**Directed Call Pickup**  
Picks up incoming calls within a pre-defined group.

You can configure directed/group call pickup feature for the IP phone.

**Visual Alert for BLF Pickup**  
It allows the supervisor's phone

4. Click **Confirm** to accept the change.

To configure the group call pickup code on a per-line basis via web user interface:

1. Click on **Account->Advanced**.
2. Select the desired account from the pull-down list of **Account**.
3. Enter the group call pickup code in the **Group Call Pickup Code** field.

The screenshot shows the 'Advanced' configuration page for Account 1 in the Yealink T23G web interface. The 'Group Call Pickup Code' field is highlighted with a red box and set to '\*98'. The 'NOTE' section on the right explains various features.

Field	Value
Account	Account 1
Keep Alive Type	Default
Keep Alive Interval(Seconds)	30
RPort	Disabled
Subscribe Period(Seconds)	1800
DTMF Type	RFC2833
DTMF Info Type	DTMF-Relay
Music Server URI	
Directed Call Pickup Code	*97
Group Call Pickup Code	*98
Distinctive Ring Tones	Enabled
Unregister When Reboot	Disabled
Out Dialog BLF	Disabled
VQ RTPC-XR Collector name	
VQ RTPC-XR Collector address	
VQ RTPC-XR Collector port	5060

**NOTE**

**DTMF**  
It is the signal sent from the IP phone to the network, which is generated when pressing the IP phone's keypad during a call.

**Session Timer**  
It allows a periodic refresh of SIP sessions through a re-INVITE request, to determine whether a SIP session is still active.

**Busy Lamp Field/BLF List**  
Monitors a specific extension/a list of extensions for status changes on IP phones.

**Shared Call Appearance (SCA)/ Bridge Line Appearance (BLA)**  
It allows users to share a SIP line on several IP phones. Any IP phone can be used to originate or receive calls on the shared line.

**Network Conference**  
It allows multiple participants (more than three) to join in a call.

4. Click **Confirm** to accept the change.

**To pick up a call in the group:**

1. Pick up the handset, press the Speakerphone key or press the line key.

The **GPickup** soft key appears on the LCD screen.

2. Press the **GPickup** soft key on your phone when a phone in the group receives an incoming call.

The call is answered on your phone.

You can also configure a DSS key as group pickup key via phone user interface or web user interface. Once configured, you can pick up a call by pressing the group pickup key directly. For more information, refer to [DSS Keys](#) on page 69.

**Note**

The directed call pickup code and group call pickup code are predefined on the system server. Contact your system administrator for more information.

The call pickup code configured on a per-line basis takes precedence over that configured on a global basis.

## Anonymous Call

You can use anonymous call to block your identify and phone number from appearing to the called party when you call someone. For example, you want to call to consult some services, but don't want to be harassed. Anonymous call is configurable on a per-line basis. You can also configure the phone to send anonymous call on/off code to the server to activate/deactivate anonymous call on the server side.

**Note**

Anonymous call is not available on all servers. Contact your system administrator for the anonymous call on code and off code.

**To configure anonymous call via phone user interface:**

1. Press **Menu->Features->Anonymous Call**.
2. Press  or , or the **Switch** soft key to select the desired line from the **Line ID** field.

3. Press  or , or the **Switch** soft key to select **Enabled** from the **Local Anonymous** field.

4. (Optional.) Press  or , or the **Switch** soft key to select the desired value from the **Send Anony Code** field.

The phone will send the configured on code or off code depending on your selection when you enable or disable anonymous call feature on the phone.

5. (Optional.) Enter the anonymous call on code in the **On Code** field.
6. (Optional.) Enter the anonymous call off code in the **Off Code** field.
7. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Anonymous call is configurable via web user interface at the path **Account->Basic**.

#### To place an anonymous call:

1. Using the specific line on the phone to place a call to phone B.  
The LCD screen of phone B prompts an incoming call from anonymity.

## Anonymous Call Rejection

You can use anonymous call rejection to reject incoming calls from anonymous callers. Anonymous call rejection automatically rejects incoming calls from callers who deliberately block their identities and numbers from being displayed. Anonymous call rejection is configurable on a per-line basis. You can also configure the phone to send anonymous call rejection on/off code to the server to activate/deactivate anonymous call rejection on the server side.

#### To configure anonymous call rejection via phone user interface:

1. Press **Menu->Features->Anonymous Call**.
2. Press  or , or the **Switch** soft key to select the desired line from the **Line ID** field.
3. Press  or  to scroll to the **Anony Rejection** field.

4. Press ◀ or ▶, or the **Switch** soft key to select **Enabled** from the **Anony Rejection** field.

5. (Optional.) Press ◀ or ▶, or the **Switch** soft key to select the desired value from the **Send Reject Code** field.

The phone will send the configured on code or off code depending on your selection when you enable or disable anonymous call rejection feature on the phone.

6. (Optional.) Enter the anonymous call rejection on code in the **On Code** field.
7. (Optional.) Enter the anonymous call rejection off code in the **Off Code** field.
8. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Anonymous call rejection is configurable via web user interface at the path **Account->Basic**.

# Advanced Phone Features

---

This chapter provides operating instructions for the advanced features of the SIP-T23P/G IP phone. Topics include:

- [Busy Lamp Field \(BLF\)](#)
- [BLF List](#)
- [Call Recording](#)
- [Hot Desking](#)
- [Intercom](#)
- [Multicast Paging](#)
- [Music on Hold \(MoH\)](#)
- [Automatic Call Distribution \(ACD\)](#)
- [Shared Call Appearance \(SCA\)](#)
- [Bridged Line Appearance \(BLA\)](#)
- [Messages](#)

If you require additional information or assistance with your new phone, contact your system administrator.

## Busy Lamp Field (BLF)

You can use BLF to monitor a specific line for status changes on the phone. For example, you can configure a BLF key on the phone to monitor the status of a friend's line (busy or idle). The BLF key LED illuminates solid red when the friend's line is in use. For more information on BLF key LED indicators, refer to [LED Instructions](#) on page 17.

## Configuring the BLF Feature on the IP Phone

You need to configure the IP phone to perform BLF monitoring. IP phones being monitored do not require any configuration.

### Configuring a BLF Key

**To configure a BLF key via phone user interface:**

1. Press **Menu->Features->DSS Keys**.
2. Select the desired DSS key.

- Press  or , or the **Switch** soft key to select **BLF** from the **Type** field.

- Press  or , or the **Switch** soft key to select the desired line from the **Account ID** field.
- (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
- Enter the phone number or extension you want to monitor in the **Value** field.
- (Optional.) Enter the directed call pickup code in the **Extension** field.

If it is configured, when the monitored user receives an incoming call, the supervisor can press the BLF key to pick up the call directly. Contact your system administrator for more information.

- Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

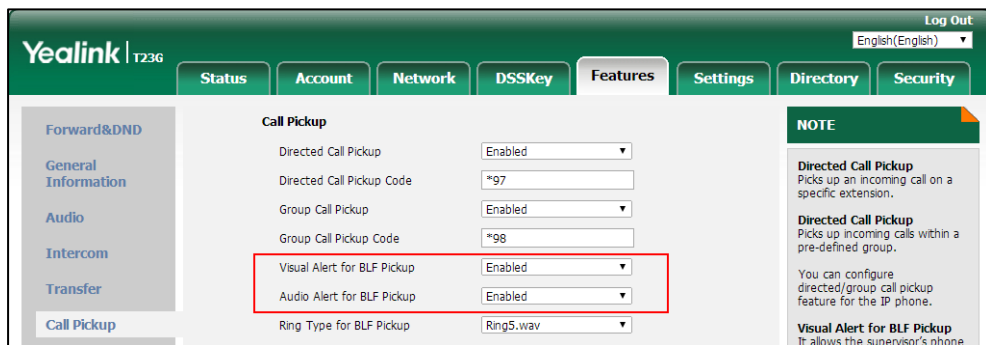

BLF key is configurable via web user interface at the path **Dsskey->Line Key**.

## Configuring Visual and Audio Alert for BLF pickup

You can enable visual alert feature for BLF pickup on the phone. This allows the LCD screen of the monitoring phone to display the caller ID when the monitored line receives an incoming call. You can also enable audio alert feature for BLF pickup on the phone. If both of them are enabled, the monitoring phone will play a specific ring tone (refer to [BLF Ring Type](#)) when the monitored line receives an incoming call.

**To enable visual and audio alert features via web user interface:**

- Click on **Features->Call Pickup**.
- Select **Enabled** from the pull-down list of **Visual Alert for BLF Pickup**.
- Select **Enabled** from the pull-down list of **Audio Alert for BLF Pickup**.

4. Click **Confirm** to accept the change.

**Note**

Visual and audio alert features are configurable via web user interface only.

When the monitored line receives an incoming call, the following occurs on your phone:

- The phone plays a specific ring tone (if enabled).
- The BLF key LED flashes red.
- The caller ID appears on the LCD screen (if enabled).

In the following figure, the LCD screen shows an incoming call from 2500 on the monitored line.

**You can do the following actions:**

- Press the **DPickup** soft key to pick up the call.
- Press the **Send** soft key to dial out the monitored phone number.
- Press the **NewCall** soft key to place a new call.
- Press the **Cancel** soft key to exit the screen.

**Note**

If your phone is locked and the type of the phone lock is configured as **Function Keys** or **All Keys**, you cannot use the **DPickup**, **Send**, **NewCall** and **Cancel** soft keys until unlocked. For more information, refer to [Phone Lock](#) on page 43.

## Configuring Directed Call Pickup Code

If you configure the directed call pickup code in advanced, you can pick up the monitored user's incoming call by pressing the BLF key. You can configure the directed call pickup code when configuring a BLF key. For more information, refer to [Configuring a BLF Key](#) on page 135. You can also configure the directed call pickup code on a global or per-line basis via web user interface.

If you enable visual alert feature, you can also pick up the monitored user's incoming call by pressing **DPickup** soft key. To use **DPickup** soft key to pick up the call, the call pickup code can only be configured on a global or per-line basis via web user interface.

**Note**

The pickup code is used in the following order of preference: Extension (**Dsskey->Line Key**)>Directed Call Pickup Code (**Account->Advanced**)>Directed Call Pickup Code (**Features->Call Pickup**). If pickup code is not configured, pressing the BLF key/**DPickup** soft key will directly call the monitored user when he/she receives an incoming call.

### To configure the directed call pickup code on a global basis via web user interface:

1. Click on **Features->Call Pickup**.
2. Enter the desired pickup code in the **Directed Call Pickup Code** field.

The screenshot shows the 'Call Pickup' configuration page in the Yealink T236 web interface. The 'Directed Call Pickup Code' field is highlighted with a red box and contains the value '\*97'. Other fields include 'Directed Call Pickup' (Disabled), 'Group Call Pickup' (Disabled), 'Group Call Pickup Code', 'Visual Alert for BLF Pickup' (Disabled), 'Audio Alert for BLF Pickup' (Disabled), and 'Ring Type for BLF Pickup' (Ring5.wav). A 'NOTE' section on the right explains the 'Directed Call Pickup' feature.

3. Click **Confirm** to accept the change.

### To configure the directed call pickup code on a per-line basis via web user interface:

1. Click on **Account->Advanced**.
2. Select the desired account from the pull-down list of **Account**.
3. Enter the desired pickup code in the **Directed Call Pickup Code** field.

The screenshot shows the 'Advanced' configuration page for an account in the Yealink T236 web interface. The 'Directed Call Pickup Code' field is highlighted with a red box and contains the value '\*97'. Other fields include 'Keep Alive Type' (Default), 'Keep Alive Interval(Seconds)' (30), 'RPort' (Disabled), 'Subscribe Period(Seconds)' (1800), 'DTMF Type' (RFC2833), 'DTMF Info Type' (DTMF-Relay), 'Music Server URI', 'Group Call Pickup Code' (\*98), 'Distinctive Ring Tones' (Enabled), 'Unregister When Reboot' (Disabled), 'Out Dialog BLF' (Disabled), 'VQ RTPC-XR Collector name', 'VQ RTPC-XR Collector address', and 'VQ RTPC-XR Collector port' (5060). A 'NOTE' section on the right explains various features like DTMF, Session Timer, Busy Lamp Field/BLF List, Shared Call Appearance (SCA)/ Bridge Line Appearance (BLA), and Network Conference.

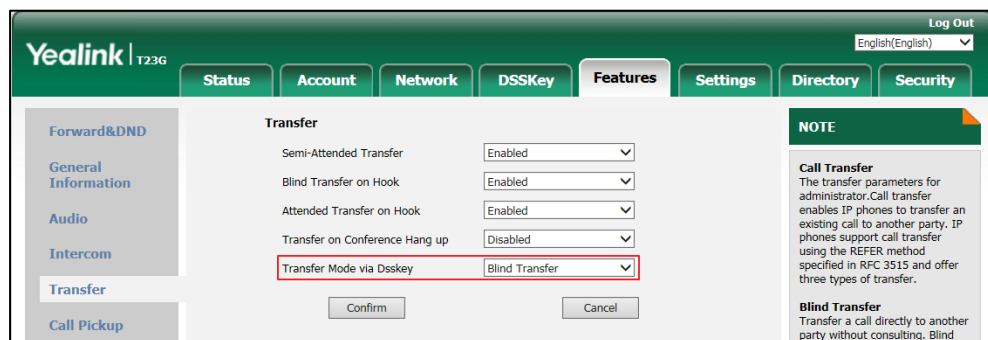

4. Click **Confirm** to accept the change.

## Configuring Transfer Mode on DSS Key

When there is an active call on the IP phone, you can handle the active call differently depending on the transfer mode on DSS key.

**To configure the transfer mode on DSS key via web user interface:**

1. Click on **Features->Transfer**.
2. Select the desired transfer mode from the pull-down list of **Transfer Mode via Dsskey**.
  - If you select **Blind Transfer**, press the BLF key to blind transfer the call to the monitored user.
  - If you select **Attended Transfer**, press the BLF key to dial out the monitored phone number and then perform an attended or a semi-attended transfer.
  - If you select **New Call**, press the BLF key to place a new call to the monitored user.

3. Click **Confirm** to accept the change.

## Using BLF Feature on the Phone

You can use the BLF key in the following ways:

- Place a call to the monitored user.
- Transfer a call to the monitored user.
- Pick up an incoming call of the monitored user.

## Placing a Call to the Monitored User

You can press a BLF key to dial out the monitored phone number when the monitored line is idle.

**To place a call to the monitored user when the IP phone is idle:**

1. Press the BLF key.

The IP phone dials out the phone number of the monitored user.

## Transferring a Call to the Monitored User

When there is already an active call on the IP phone, you can transfer the active call to the monitored user by pressing the BLF key. The phone handles the active call differently depending on the transfer mode on DSS key (refer to [Configuring Transfer Mode on DSS Key](#)). The transfer mode on DSS key has the following modes:

- Blind Transfer
- Attended Transfer
- New Call

When the transfer mode on DSS key is set to **Blind Transfer** and there is already an active call on the IP phone, you can do the following:

**To perform a blind transfer:**

1. Press the BLF key of the monitored user which you want to transfer this call to.  
Then the active call is connected to the number of the monitored user.

When the transfer mode on DSS key is set to **Attended Transfer** and there is already an active call on the IP phone, you can do the following:

**To perform a semi-attended transfer:**

1. Press the BLF key of the monitored user which you want to transfer this call to. The phone will dial the number of the monitored user.
2. Press the BLF key of the monitored user again or the **Tran** soft key to complete the transfer when receiving ringback.

**To perform an attended transfer:**

1. Press the BLF key of the monitored user which you want to transfer this call to. The phone will dial the number of the monitored user.
2. Press the BLF key of the monitored user again or the **Tran** soft key to complete the transfer after the monitored user answers the call.

When the transfer mode on DSS key is set to **New Call** and there is already an active call on the IP phone, you can do the following:

**To perform a new call:**

1. Press the BLF key of the monitored user you want to call.  
The phone will dial the number of the monitored user.

## Picking up an Incoming Call of the Monitored User

When the monitored user receives an incoming call, the BLF key indicator of the monitored user will flash red. If you enable visual and audio alert features on the phone, the phone will play a specific ring tone (refer to [BLF Ring Type](#)) and display the incoming call information on the screen. You can use the BLF key to pick up an incoming call of the monitored user. Before picking up an incoming call, ensure that the directed call pickup code has been configured in advance.

**To pick up an incoming call when the IP phone is idle:**

1. Press the BLF key.

The incoming call of the monitored user is answered on the IP phone.

**Note**

If the directed call pickup code is not configured, the phone will place a call to the monitored user instead of picking up an incoming call of the monitored user when you press the BLF key.

## BLF List

You can use the BLF List feature to monitor a list of users defined by your system administrator. For example, your system administrator enables BLF List, and creates a BLF List URI (e.g., BLFList@example.com) including a list of user1, user2 on the server. The BLF List keys on the IP phone can present the status of user1 and user2. The key LEDs illuminate either flashing or solid depending on the status of those users. For more BLF List key LED indicators, refer to [LED Instructions](#) on page 17.

You can use the BLF List keys in the following ways:

- When the monitored user is idle, press the BLF list key to dial out the phone number.
- When there is already an active call on the IP phone, you can transfer the active call to the monitored user by pressing the BLF List key. The phone handles the active call differently depending on the transfer mode on DSS key. For more information on the transfer mode on DSS key, refer to [Configuring Transfer Mode on DSS Key](#) on page 137.
- When the monitored user receives an incoming call, press the BLF list key to pick up the call directly. Before picking up an incoming call, ensure that the BLF List Pickup Code has been configured in advance. If the code is not configured, the phone will place a call to the monitored user instead of picking up the incoming call of the monitored user when you press the BLF List key.
- When there is a conversation on the monitored user, press the BLF list key to barge in and set up a conference call. Before barging in an active call, ensure that the BLF List Barge In Code has been configured in advance. If the code is not configured, the phone will place a call to the monitored user instead of barging in an active call of the monitored user when you press the BLF List key.
- When a call is being parked against the monitored phone, press the BLF List key to retrieve the parked call from the monitored user. Before retrieving the parked call, ensure that the BLF List Retrieve Call Parked Code has been configured in advance. If the code is not configured, the phone will place a call to the monitored user instead of retrieving the parked call when you press the BLF List key.

**To configure BLF List settings via web user interface:**

1. Click on **Account->Advanced**.
2. Select the desired account from the pull-down list of **Account**.
3. Enter the BLF List URI in the **BLF List URI** field.
4. (Optional.) Enter the directed call pickup code in the **BLF List Pickup Code** field.

5. (Optional.) Enter the barge-in code in the **BLF List Barge In Code** field.
6. (Optional.) Enter the park retrieve code in the **BLF List Retrieve Call Parked Code** field.

The screenshot shows the Yealink T236 web interface with the 'Account' tab selected. The 'Account' dropdown is set to 'Account 1'. The following fields are visible:

- Keep Alive Type: Default
- Keep Alive Interval(Seconds): 30
- RPort: Disabled
- Subscribe Period(Seconds): 1800
- DTMF Type: RFC2833
- DTMF Info Type: DTMF-Relay
- PTIME(ms): 20
- BLF List URI**: 4609@pbx.yealink.com
- BLF List Pickup Code**: \*97
- BLF List Barge In Code**: \*33
- BLF List Retrieve Call Parked Code**: \*98
- Shared Line: Disabled
- VQ RTPC-XR Collector name:
- VQ RTPC-XR Collector address:
- VQ RTPC-XR Collector port: 5060

Buttons for 'Confirm' and 'Cancel' are at the bottom. A 'NOTE' section on the right contains information about DTMF, Session Timer, Busy Lamp Field/BLF List, Shared Call Appearance (SCA)/ Bridge Line Appearance (BLA), and Network Conference.

7. Click **Confirm** to accept the change.

#### Note

For more information on BLF List URI/BLF List Pickup Code/BLF List Barge In Code/BLF List Retrieve Call Parked Code, contact your system administrator.

According to the response message from the server, the IP phone will automatically configure the BLF List keys beginning from the first unused Line key. Once any Line key is seized, the IP phone will skip to configure the next Line key.

You can receive a visual or/and an audio alert (if enabled) on your phone when the monitored user receives an incoming call. For more information, refer to [Configuring Visual and Audio Alert for BLF pickup](#) on page 136.

#### Note

The pickup code is used in the following order of preference:  
 BLF List Pickup Code (**Account->Advanced**)>Directed Call Pickup Code (**Account->Advanced**)>Directed Call Pickup Code (**Features->Call Pickup**). If all of them are not configured, pressing the BLF List key will directly call the monitored user when he/she receives an incoming call. For more information on pickup code, refer to [Call Pickup](#) on page 128.

## Call Recording

You can record calls by pressing a record key on the phone. The SIP-T23P/G IP phone supports record and URL record.

Two ways of call recording:

- **Record:** The phone sends SIP INFO message containing a specific header "Record: on/off" to trigger a recording.
- **URL Record:** The phone sends HTTP URL request to trigger a recording. Contact your system administrator for the predefined URL.

#### Note

Server recording is not available on all servers. Contact your system administrator for more information.

**The Record and URL Record keys control the recording function, and are available:**

- During an active call
- When calls are on hold or mute
- During a blind or attended transfer
- During a conference call
- When the phone prompts you to answer an incoming call

**The Record and URL Record keys are not available when:**

- There are no connected calls on your phone
- You place a new call

## Configuring a Record Key

**To configure a record key via phone user interface:**

1. Press **Menu->Features->DSS Keys**.
2. Select the desired DSS key.
3. Press  or , or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press  or , or the **Switch** soft key to select **Record** from the **Key Type** field.

5. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Record key is configurable via web user interface at the path **Dsskey->Line Key**.

## Configuring a URL Record Key

To configure a URL record key via phone user interface:

1. Press **Menu->Features->DSS Keys**.
2. Select the desired DSS key.
3. Press  or , or the **Switch** soft key to select **URL Record** from the **Type** field.

4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Enter the URL (e.g., <http://10.1.2.224/phonerecording.cgi>) in the **Value** field.
6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

URL record key is configurable via web user interface at the path **Dsskey->Line Key**.

## Recording a Call

To record a call:

1. Press the Record or URL Record key during a call.  
If the recording starts successfully, the recording icon will appear on the LCD screen and the Record or URL Record key LED will flash green.
2. Press the Record or URL Record key again to stop recording.  
The recording icon disappears from the LCD screen and the Record or URL Record key LED goes out.

Recording status indicators you need to know:

Circumstance	Icons on the LCD screen
A recording is started	● appears on the LCD screen
A recording cannot be started	⊗ appears for 1 second
A recording cannot be stopped	⊘ appears for 1 second, then goes back
The recording box is full	⌫ appears for 1 second
The call cannot be recorded	⊗ appears for 1 second

You can listen to the recordings stored on your server system. For example, you can dial an access code to listen to the recordings.

**Note**

The way in which you listen to the recordings may be different depending on the server. Contact your system administrator for more information.

## Hot Desking

Hot desking originates from the definition of being the temporary physical occupant of a work station or surface by a particular employee. A primary motivation for hot desking is cost reduction. This feature is regularly used in places where not all the employees are in the office at the same time, or not in the office for very long, which means that actual personal offices would be often vacant, consuming valuable space and resources.

You can use hot desking on the SIP-T23P/G IP phone to log out of the existing accounts and then log into a new account. As a result, many users can share the phone resource at different times. To use this feature, you need to configure a hot desking key in advance.

**Note**

Hot desking is not available on all servers. Contact your system administrator for more information.

### To configure a hot desking key via phone user interface:

1. Press **Menu->Features->DSS Keys**.
2. Select the desired DSS key.
3. Press  or , or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press  or , or the **Switch** soft key to select **Hot Desking** from the **Key Type** field.

5. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Hot desking key is configurable via web user interface at the path **Dsskey->Line Key**.

### To use hot desking:

1. Press the hot desking key when the phone is idle.

The LCD screen prompts the following warning:

2. Press the **OK** soft key, registration configurations of all accounts on the phone will be cleared immediately.

The login wizard will be displayed as below:

3. Enter the login information in each field.
4. Press the **Save** soft key to login or the **Cancel** soft key to cancel.

## Intercom

Intercom is a useful feature in an office environment to quickly connect with the operator or the secretary. You can press the intercom key to automatically connect with a preconfigured target extension for outgoing intercom calls, and the target extension will automatically answer incoming intercom calls by default. You can also use intercom key to monitor a specific line for status changes on the phone.

**Note** Intercom is not available on all servers. Contact your system administrator for more information.

## Configuring the Intercom Feature on the IP Phone

### Configuring an Intercom Key

**To configure an intercom key via phone user interface:**

1. Press **Menu->Features->DSS Keys**.
2. Select the desired DSS key.

3. Press ◀ or ▶, or the **Switch** soft key to select **Intercom** from the **Type** field.

4. Select the desired line from the **Account ID** field.
5. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
6. Enter the target extension number in the **Value** field.
7. (Optional.) Enter the directed call pickup code in the **Extension** field.

If it is configured, when the target extension receives an incoming call, the supervisor can press the intercom key to pick up the call directly. Contact your system administrator for more information.

8. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Intercom key is configurable via web user interface at the path **Dsskey->Line Key**.

## Incoming Intercom Calls

The SIP-T23P/G IP phone supports automatically to answer an incoming intercom call by default. The phone automatically plays a warning tone when it receives an incoming intercom call. In addition, you can enable the phone to mute the microphone when it automatically answers an incoming intercom call. You can also enable the phone to automatically answer an incoming intercom call while there is already an active call on the phone. The active call is then placed on hold.

Intercom features you need to know:

Intercom Feature	Description
Intercom Allow	Enable or disable the IP phone to answer an incoming intercom call.
Intercom Mute	Enable or disable the IP phone's microphone for intercom calls.
Intercom Tone	Enable or disable the IP phone to play a warning tone when it receives an incoming intercom call.
Intercom Barge	Enable or disable the IP phone to automatically answer an incoming intercom call while there is already an active call on the phone.

### Intercom Allow

You can enable or disable the phone to answer an incoming intercom call. If Intercom Allow is enabled, the phone will automatically answer an incoming intercom call. If Intercom Allow is

disabled, the phone will handle an incoming intercom call like a normal call instead of directly rejecting it. Intercom Allow is enabled by default.

#### Note

Your administrator can set a period of delay time before the phone automatically answers intercom calls. Contact your system administrator for more information.

### Intercom Mute

You can mute or un-mute the phone's microphone for intercom calls automatically. If Intercom Mute is enabled, the microphone will be muted for intercom calls. If Intercom Mute is disabled, the microphone will work for intercom calls. Intercom Mute is disabled by default.

### Intercom Tone

You can enable or disable the phone to play a warning tone when receiving an intercom call. If Intercom Tone is enabled, the phone will play a warning tone before answering the intercom call. If Intercom Tone is disabled, the phone will automatically answer the intercom call without warning. Intercom Tone is enabled by default.

### Intercom Barge

You can enable or disable the phone to automatically answer an incoming intercom call while there is already an active call on the phone. If Intercom Barge is enabled, the phone will automatically answer the intercom call and place the active call on hold. If Intercom Barge is disabled, the phone will handle an incoming intercom call like a waiting call. Intercom Barge is disabled by default.

#### Note

To enable the phone to receive a new incoming call when it has an active call, make sure that call waiting feature is enabled on the phone in advance. For more information, refer to [Call Waiting](#) on page 120.

### To configure intercom features via phone user interface:

1. Press **Menu->Features->Intercom**.
2. Make the desired changes.

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Intercom features are configurable via web user interface at the path **Features->Intercom**.

## Using Intercom

You can use the intercom key in the following ways:

- Place a call to the target extension
- Pick up an incoming call of the target extension

### Note

To use the intercom key to pick up an incoming call, make sure the intercom subscription feature is enabled. For more information, contact your system administrator.

## Placing an Intercom Call to the Target Extension

**To place an intercom call when the target phone is idle:**

1. Press the intercom key when the phone is idle.

The target extension plays a warning tone and automatically answers the call in the speakerphone mode by default.

## Picking up an Incoming Call of the Target Extension

When the target extension receives an incoming call, the intercom key LED of the target extension will flash green. If you configure the directed call pickup code in advance, you can pick up the target extension's incoming call by pressing the intercom key. You can configure the directed call pickup code when configuring an intercom key. For more information, refer to [Configuring an Intercom Key](#) on page 146.

If you enable visual alert feature, you can also pick up the target extension's incoming call by pressing the **DPickup** soft key. To use the **DPickup** soft key to pick up the call, the call pickup code can only be configured on a global or per-line basis via web user interface. For more information, refer to [Configuring Visual and Audio Alert for BLF pickup](#) on page 136 and [Configuring Directed Call Pickup Code](#) on page 137.

**To pick up an incoming call when the monitored phone is ringing:**

1. Press the intercom key.

The incoming call of the target extension is answered on the IP phone.

### Note

If the directed call pickup code is not configured, the phone will place a call to the target extension instead of picking up an incoming call of the target extension when you press the intercom key.

## Multicast Paging

You can use multicast paging to quickly and easily broadcast time sensitive announcements to users who are listening to a specific multicast group. You can configure a multicast paging key

or the paging list key on the phone, which allows you to send a Real Time Transport Protocol (RTP) stream to the pre-configured multicast address(es) without involving SIP signaling. You can configure the phone to receive an RTP stream from pre-configured multicast listening address(es) without involving SIP signaling. You can specify up to 31 multicast listening addresses.

Yealink IP phone supports the following 31 channels:

- **0:** It is the default channel. This channel is for compatibility with the Yealink IP phones running firmware version 80 or prior and third-party devices.
- **1 to 25:** These channels are for compatibility with the Polycom IP phones.
- **26 to 30:** These channels are used for separate communication among the Yealink IP phones running firmware version 81 or later.

The IP phones will automatically ignore all incoming multicast paging calls on the different channel.

## Sending RTP Stream

**To configure a multicast paging key via phone user interface:**

1. Press **Menu**->**Features**->**DSS Keys**.
2. Select the desired DSS key.
3. Press ◀ or ▶, or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press ◀ or ▶, or the **Switch** soft key to select **Multicast Paging** from the **Key Type** field.

5. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
6. Enter the multicast IP address and port number (e.g., 224.5.6.20:10008) in the **Value** field.  
The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.
7. Enter the desired channel in the **Channel** field.  
The valid channel ranges from 0 to 30.
8. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Multicast paging key is configurable via web user interface at the path **Dsskey**->**Line Key**.

**To configure a paging list key via phone user interface:**

1. Press **Menu**->**Features**->**DSS Keys**.

2. Select the desired DSS key.
3. Press  or , or the Switch soft key to select **Key Event** from the **Type** field.
4. Press  or , or the Switch soft key to select **Paging List** from the **Key Type** field.

5. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Paging list key is configurable via web user interface at the path **Dsskey->Line Key**.

#### To configure paging list via phone user interface:

1. Press the paging list key when the phone is idle.  
If the paging list key is not configured, you can also press **Menu->Features->Paging List** to configure the paging list.
2. Press  or  to select a desired paging group.  
The default tag is Empty if it is not configured before.

3. Press the **Option** soft key and then press the **Edit** soft key.
4. Enter the multicast IP address and port number (e.g., 224.5.6.20:10008) in the **Address** field.

The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.

5. Enter the group name in the **Label** field.
6. Enter the desired channel in the **Channel** field.  
The valid channel ranges from 0 to 30.
7. Press the **Save** soft key to accept the change.

- Repeat steps 2 to 7, you can add more paging groups.

Paging list is configurable via web user interface at the path **Directory->Multicast IP**.

**To delete a paging group via phone user interface:**

- Press the paging list key when the phone is idle.
- Press  or  to select a desired paging group.
- Press the **Option** soft key and then select **Delete**.

The LCD screen prompts "Delete selected paging group?".

- Press the **OK** soft key to accept the change or the **Cancel** soft key to cancel.

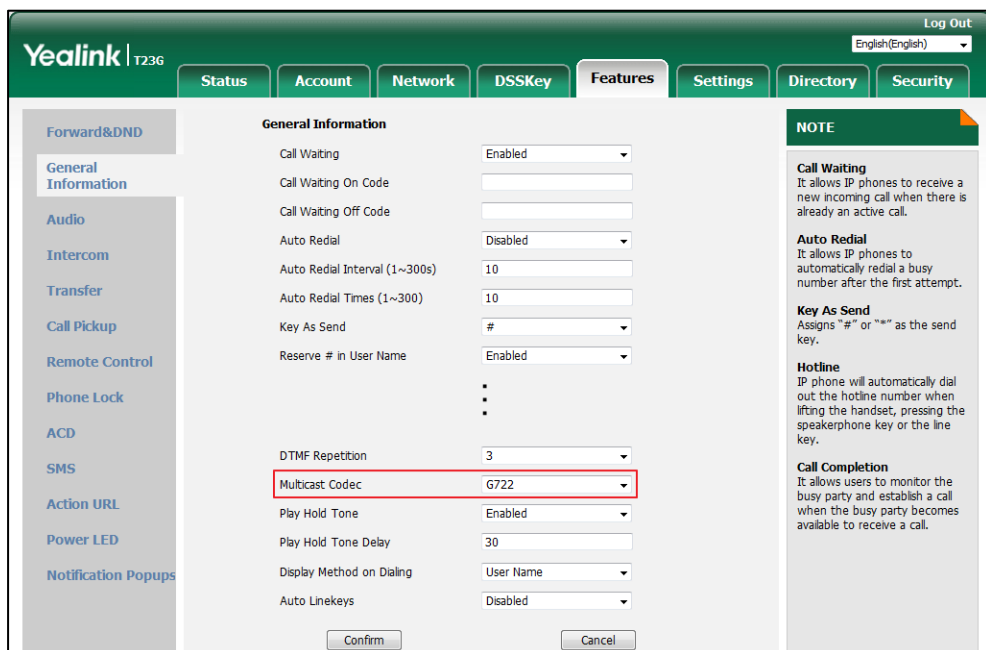

If you want to delete all paging groups, you can press the **Del All** soft key.

You can also configure the phone to use a default codec for sending multicast RTP stream via web user interface.

**To configure a default codec for multicast paging via web user interface:**

- Click on **Features->General Information**.
- Select the desired codec from the pull-down list of **Multicast Codec**.

The default codec is G722.

3. Click **Confirm** to accept the change.

**Note**

If G722 codec is used for multicast paging, the LCD screen will display the icon  to indicate that it is providing high definition voice.

Default codec for multicast paging is configurable via web user interface only.

## Receiving RTP Stream

You can configure the phone to receive a Real Time Transport Protocol (RTP) stream from the pre-configured multicast address(es) without involving SIP signaling. You can specify up to 31 multicast addresses that the phone listens to on the network.

**Note**

RTP stream is listened in the speakerphone mode by default. If you want to listen the RTP stream using the engaged audio device (speakerphone, handset or headset), contact your system administrator for more information.

Fixed volume to play RTP stream for specified paging group is configurable by your system administrator.

How the phone handles incoming multicast paging calls depends on Paging Barge and Paging Priority Active parameters configured via web user interface.

### Paging Barge

The paging barge parameter defines the priority of the voice call in progress. If the priority of an incoming multicast paging call is lower than that of the active call, it will be ignored automatically. If Disabled is selected from the pull-down list of Paging Barge, the voice call in progress will take precedence over all incoming multicast paging calls. Valid values in the Paging Barge field:

- **1 to 31:** Define the priority of the active call, 1 with the highest priority, 31 with the lowest.
- **Disabled:** The voice call in progress will take precedence over all incoming paging calls.

### Paging Priority Active

The paging priority active parameter decides how the phone handles incoming multicast paging calls when there is already a multicast paging call on the phone. If enabled, the phone will ignore incoming multicast paging calls with lower priorities, otherwise, the phone will answer incoming multicast paging calls automatically and place the previous multicast paging call on hold. If disabled, the phone will automatically ignore all incoming multicast paging calls.

#### To configure multicast listening addresses via web user interface:

1. Click on **Directory->Multicast IP**.
2. Select the desired value from the pull-down list of **Paging Barge**.
3. Select the desired value from the pull-down list of **Paging Priority Active**.

- Enter the multicast IP address(es) and port number (e.g., 224.5.6.20:10008) which the phone listens to for incoming RTP multicast in the **Listening Address** field.
- (Optional.) Enter the label in the **Label** field.  
Label will appear on the LCD screen when receiving the multicast RTP stream.
- Select the desired channel to listen from the pull-down list of **Channel**.  
The default channel is 0.

IP Address	Listening Address	Label	Channel	Priority
1 IP Address	224.5.6.20:10008	paging one	0	1
2 IP Address			0	2
3 IP Address			0	3
4 IP Address			0	4
5 IP Address			0	5
6 IP Address			0	6
7 IP Address			0	7
8 IP Address			0	8
9 IP Address			0	9
10 IP Address			0	10

- Click **Confirm** to accept the change.

**Note** The priorities of listening addresses are predefined: 1 with the highest priority, 31 with the lowest. Multicast listening addresses are configurable via web user interface only.

## Using Multicast Paging

**To send RTP stream via a multicast paging key when the receiver's phone is idle:**

- Press the multicast paging key when the phone is idle.  
The phone sends RTP to a preconfigured multicast address (IP: Port).  
Both the sender's and receiver's phones play a warning tone and the receiver automatically answers the multicast RTP session in the speakerphone mode.  
The multicast paging key LED illuminates solid green.  
The following figure shows a multicast RTP session on the phone:

2. You can do the following:

- To place the current multicast RTP session on hold, press the **Hold** soft key.  
The sender's phone places the multicast RTP session on hold and receiver's phone releases the session.  
To resume the held multicast RTP session, press the **Resume** soft key.  
The multicast RTP session is established again.
- To end the multicast RTP session, press the **EndCall** soft key.

**Note**

Multicast RTP is one way only from the sender to the multicast address(es) (receiver). For outgoing RTP multicasts, all other existing calls on the phone will be placed on hold.

**To send RTP stream via a paging key list when the receiver's phone is idle:**

1. Press the paging list key when the phone is idle.
2. Press  or  to select the desired paging group.

3. Press  or the **Paging** soft key to send RTP.
4. You can do the following:
  - To place the current multicast RTP session on hold, press the **Hold** soft key.  
The sender's phone places the multicast RTP session on hold and receiver's phone releases the session.  
To resume the held multicast RTP session, press the **Resume** soft key.  
The multicast RTP session is established again.
  - To end the multicast RTP session, press the **EndCall** soft key.

## Music on Hold (MoH)

Music on hold (MoH) is the business practice of playing recorded music to fill the silence that would be heard by the party placed on hold. To use this feature, you should specify a SIP URI pointing to a Music on Hold Server account. When a call is placed on hold, the phone will send a SIP INVITE message to the Music on Hold Server account. The Music on Hold Server account automatically answers the SIP INVITE messages and immediately plays audio from some source located anywhere (LAN, Internet) to the held party. Contact your system administrator for the SIP URI.

### Note

If your server supports the MOH feature, you can also upload the custom music file into it directly. For more information, contact your service provider.

**To configure music on hold server via web user interface:**

1. Click on **Account->Advanced**.
2. Select the desired account from the pull-down list of **Account**.
3. Enter the SIP URI (e.g., sip:moh@sip.com) in the **Music Server URI** field.

The screenshot shows the Yealink T236 web interface. The top navigation bar includes 'Status', 'Account', 'Network', 'DSSKey', 'Features', 'Settings', 'Directory', and 'Security'. The 'Account' tab is active, and the 'Advanced' sub-tab is selected. The 'Account' dropdown menu shows 'Account 1'. The 'Music Server URI' field is highlighted with a red rectangle and contains the text 'sip:moh@sip.com'. Other configuration options include 'Keep Alive Type' (Default), 'Keep Alive Interval(Seconds)' (30), 'RPort' (Disabled), 'Subscribe Period(Seconds)' (1800), 'DTMF Type' (RFC2833), 'Early Media' (Disabled), 'SIP Server Type' (Default), 'Directed Call Pickup Code', 'Group Call Pickup Code', 'VQ RTPC-XR Collector address', and 'VQ RTPC-XR Collector port' (5060). A 'NOTE' section on the right contains information about DTMF, Session Timer, Busy Lamp Field/BLF List, and Shared Call Appearance (SCA)/ Bridge Line Appearance (BLA).

4. Click **Confirm** to accept the change.

When you have placed a call on hold, the held party can hear the music.

### Note

For this feature to function, all involved parties cannot use encrypted RTP (SRTP).

Music on hold server is configurable via web user interface only.

## Automatic Call Distribution (ACD)

ACD is often used in offices for customer service, such as call center. The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of multiple persons at the earliest opportunity. ACD on the SIP-T23P/G IP phone allows the ACD system to distribute large volumes of incoming calls to the registered ACD users. To use this feature, you should configure an ACD key in advance.

### Note

Make sure ACD is enabled on your IP phone. For more information on enabling ACD, contact your system administrator.

### To configure an ACD key via phone user interface:

1. Press **Menu->Features->DSS Keys**.
2. Select the desired DSS key.
3. Press  or , or the **Switch** soft key to select **ACD** from the **Type** field.

4. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

ACD key is configurable via web user interface at the path **Dsskey->Line Key**.

### To log into the ACD system:

1. Press the ACD key when the phone is idle.

The LCD screen prompts you the following information:

**User ID:** the identity used to log into the queue.

**Password:** the password used to log into the queue.

2. Press the **Login** soft key to log in.

### Note

Contact your system administrator for the User ID and Password to access the ACD system.

After configuring an ACD key, you can press the ACD key to log into the ACD system. After logging in, you are ready to receive calls from the ACD system. You can press the ACD key to show your current ACD user status. You can press the **Avail/Unavail** soft key to change your ACD user status. ACD user status synchronizes on both IP phone and ACD system.

When you set the ACD user status to be available, the ACD key LED illuminates solid green, and then the server begins distributing calls to your IP phone. When you set the ACD user status to be unavailable, the ACD key LED flashes green, and then the server temporarily stops distributing calls to your IP phone. To log out of the ACD system, press the **Logout** soft key.

#### Note

It is recommended you configure no more than one ACD key per phone. At any time, at most one ACD key can be in progress on your phone.

## Shared Call Appearance (SCA)

You can use SCA feature to share an extension which can be registered on two or more IP phones at the same time. The shared line is indicated by a different line icon.

In the following figure, the first line is private and the second line is shared:

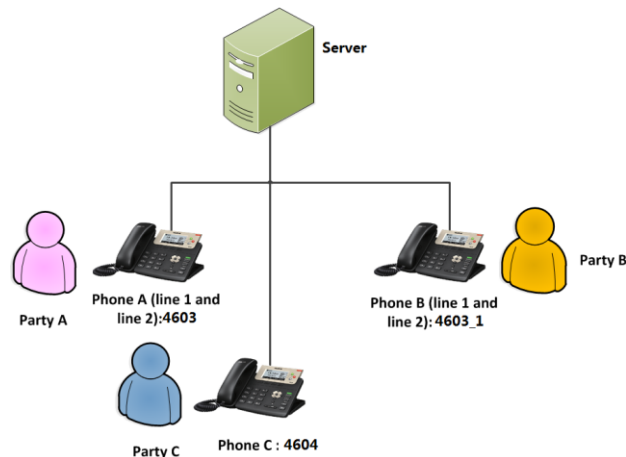

If two phones share a line, an incoming call to this extension will cause both phones to ring simultaneously. The incoming call can be answered on either phone but not both.

This feature is very useful in the boss and secretary scenario. For example, the secretary can share the boss's extension on her phone. When there is an incoming call to the extension of the boss, both the phones of the boss and the secretary will ring simultaneously. Either the boss or the secretary can answer the call. Calls on the shared line can be placed on hold, barged in or retrieved from another shared phone.

## Configuring SCA Feature on the IP Phone

You can configure a primary account on the IP phone and other alternate accounts on the other IP phones. In a SCA Hybrid Key System scenario, you can automatically assign multiple DSS keys with Line type for a registered shared line on the phone (If auto linekeys feature is enabled). For example, party A, party B share the account 4603, phone A registers the primary account 4603 and assigns line key 1 and line key 2 for the account 4603, phone B registers the alternate account 4603\_1 and assigns line key 1 and line key 2 for the account 4603\_1, phone C registers the account 4604.

To configure the auto linekeys feature via web user interface:

1. Click on **Features->General Information**.
2. Select **Enabled** from the pull-down list of **Auto LineKeys**.

If **Auto LineKeys** is enabled, you can automatically assign multiple DSS keys with Line type for a registered shared line on the phone.

<b>Auto LineKeys</b>	<b>Enabled</b>

Confirm Cancel

**NOTE**

**Call Waiting**  
It allows IP phones to receive a new incoming call when there is already an active call.

**Auto Redial**  
It allows IP phones to automatically redial a busy number after the first attempt.

**Key As Send**  
Assigns "#" or "\*" as the send key.

**Hotline**  
IP phone will automatically dial out the hotline number when lifting the handset, pressing the speakerphone key or the line key.

**Call Completion**  
It allows users to monitor the busy party and establish a call when the busy party becomes available to receive a call.

3. Click **Confirm** to accept the change.

**To configure the shared line settings and the number of line key on phone A via web user interface:**

1. Register the primary account 4603.

The screenshot shows the Yealink T23G web interface. The top navigation bar includes tabs for Status, Account, Network, DSSKey, Features, Settings, Directory, and Security. The 'Account' tab is selected. On the left, there is a sidebar with 'Register', 'Basic', 'Codec', and 'Advanced' options. The main content area is titled 'Account' and shows 'Account 1' selected. The 'Register Status' is 'Registered'. The 'Line Active' is set to 'Enabled'. The 'Label', 'Display Name', 'Register Name', 'User Name', and 'Password' fields are all set to '4603'. The 'SIP Server 1' section shows 'Server Host' as 'pbx.yealink.com' and 'Port' as '5060'. The 'SIP Server 2' section is empty. The 'Outbound Proxy Server' section shows 'Enable Outbound Proxy Server' as 'Enabled', 'Outbound Proxy Server 1' as '10.1.8.11' and 'Port' as '5060', 'Outbound Proxy Server 2' as empty and 'Port' as '5060', 'Proxy Fallback Interval' as '3600', and 'NAT' as 'Disabled'. At the bottom, there are 'Confirm' and 'Cancel' buttons. On the right, a 'NOTE' section contains information about 'Account Registration', 'Server Redundancy', and 'NAT Traversal'.

2. Click on **Advanced**, and then select **Shared Call Appearance** from the pull-down list of **Shared Line**.
3. Enter the desired number in the **Number of line key** field.  
This field appears only if **Auto Linekeys** is enabled.

The default value is 1. In this example, the value is set to 2.

The screenshot shows the Yealink T23G web interface with the 'Account' tab selected. The 'Number of line key' field is highlighted with a red box and set to 2. Other fields include 'Keep Alive Type' (Default), 'Keep Alive Interval(Seconds)' (30), 'RPort' (Disabled), 'Subscribe Period(Seconds)' (1800), 'DTMF Type' (RFC2833), 'DTMF Info Type' (DTMF-Relay), 'DTMF Payload Type(96~127)' (101), 'PTime(ms)' (20), 'Shared Line' (Shared Call Appearance), 'BLA Number' (empty), 'BLA Subscription Period' (300), 'SIP Send MAC' (Disabled), 'VQ RTPC-XR Collector port' (5060), and 'Number of line key' (2). A 'Confirm' button is at the bottom.

4. Click **Confirm** to accept the change.

The phone A will automatically configure the line keys from the first unused DSS key, according to the configured number in the **Number of line key** field.

**To configure the shared line settings and the number of line key on phone B via web user interface:**

1. Register the alternate account 4603\_1.

(Enter the primary account 4603 in the **Register Name** field.)

The screenshot shows the Yealink T23G web interface. The top navigation bar includes 'Status', 'Account', 'Network', 'DSSKey', 'Features', 'Settings', 'Directory', and 'Security'. The 'Account' tab is selected, and the 'Register' sub-tab is active. The 'Account' section shows 'Account 1' selected. The 'Register Status' is 'Registered'. The 'Line Active' is 'Enabled'. The 'Label' is '4603\_1'. The 'Display Name' is '4603\_1'. The 'Register Name' is '4603'. The 'User Name' is '4603\_1'. The 'Password' is masked with dots. The 'SIP Server 1' section shows 'Server Host' as 'pbx.yealink.com' and 'Port' as '5060'. The 'Transport' is 'UDP'. The 'Server Expires' is '3600'. The 'Server Retry Counts' is '3'. The 'SIP Server 2' section shows 'Server Host' as an empty field and 'Port' as '5060'. The 'Transport' is 'UDP'. The 'Server Expires' is '3600'. The 'Server Retry Counts' is '3'. The 'Enable Outbound Proxy Server' is 'Enabled'. The 'Outbound Proxy Server 1' is '10.1.8.11' and 'Port' is '5060'. The 'Outbound Proxy Server 2' is an empty field and 'Port' is '5060'. The 'Proxy Fallback Interval' is '3600'. The 'NAT' is 'Disabled'. The 'NOTE' section on the right contains information about Account Registration, Server Redundancy, and NAT Traversal.

2. Click on **Advanced**, and then select **Shared Call Appearance** from the pull-down list of **Shared Line**.
3. Enter the desired number in the **Number of line key** field.  
This field appears only if **Auto Linekeys** is enabled.

The default value is 1. In this example, the value is set to 2.

The screenshot shows the Yealink T23G web interface with the 'Account' tab selected. The 'Account' section is expanded, showing various configuration fields. The 'Number of line key' field is highlighted with a red box and set to 2. Other fields include 'Keep Alive Type' (Default), 'Keep Alive Interval(Seconds)' (30), 'RPort' (Disabled), 'Subscribe Period(Seconds)' (1800), 'DTMF Type' (RFC2833), 'DTMF Info Type' (DTMF-Relay), 'DTMF Payload Type(96~127)' (101), 'PTime(ms)' (20), 'Shared Line' (Shared Call Appearance), 'BLA Number' (empty), 'BLA Subscription Period' (300), 'SIP Send MAC' (Disabled), and 'VQ RTPC-XR Collector port' (5060). A 'Confirm' button and a 'Cancel' button are at the bottom. A 'NOTE' section on the right provides information about DTMF, Session Timer, Busy Lamp Field/BLF List, Shared Call Appearance (SCA)/ Bridge Line Appearance (BLA), and Network Conference.

4. Click **Confirm** to accept the change.

The phone B will automatically configure the line keys from the first unused DSS key, according to the configured number in the **Number of line key** field.

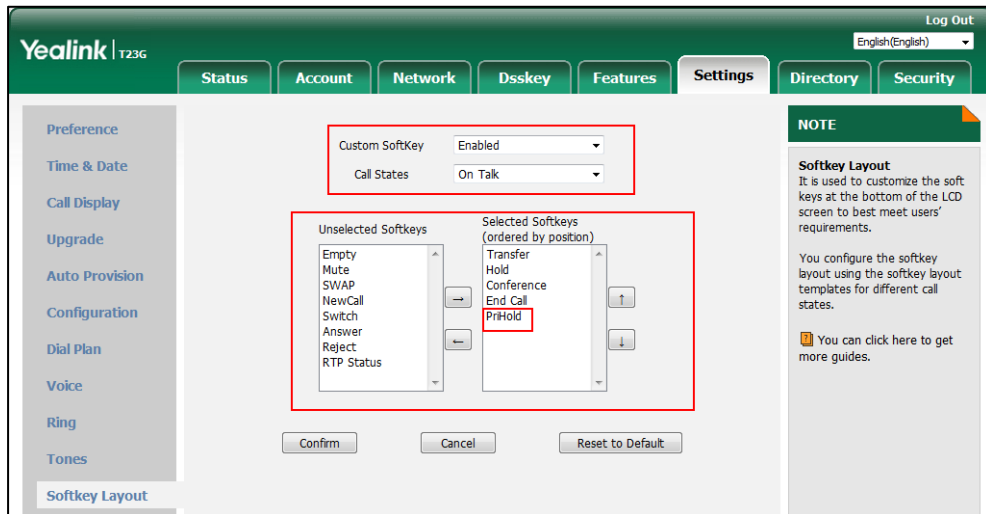

## Configuring private hold soft key or private hold key

Public hold allows any shared line to retrieve the held call. Private hold only allows the hold party to retrieve the held call. For example, you can retrieve the held call on either phone A or phone B when you place a call on public hold; you can retrieve the held call only on phone A when you place a call on private hold on phone A. By default, the private hold soft key isn't displayed on the LCD screen. You need to configure either the private hold soft key or a private hold key before you place the call on private hold.

**To configure the private hold soft key via web user interface:**

1. Click on **Settings->Softkey Layout**.
2. Select **Enabled** from the pull-down list of **Custom Softkey**.
3. Select **On Talk** from the pull-down list of **Call States**.

4. Select **PriHold** from the **Unselected Softkeys** column and then click  .  
The **PriHold** appears in the **Selected Softkeys** column.

5. Click **Confirm** to accept the change.

#### Note

Configuring the private hold soft key may affect the softkey layout in the Talking state. Contact your administrator for more information.

#### To configure a private hold key via phone user interface:

1. Press **Menu->Features->DSS Keys**.
2. Select the desired DSS key.
3. Press  or  , or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press  or  , or the **Switch** soft key to select **Private Hold** from the **Key Type** field.

5. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

### Configuring call pull feature

Call pull feature allows users to retrieve an existing call from another shared phone that is in active or public hold status.

**To configure the call pull feature access code via web user interface:**

1. Click on **Account->Advanced**.
2. Select the desired account from the pull-down list of **Account**.
3. Enter the call pull feature access code (e.g., \*11) in the **Call Pull Feature Access Code** field.

The screenshot shows the Yealink T23G web interface. The 'Account' tab is selected, and the 'Advanced' sub-tab is active. The 'Account' dropdown is set to 'Account 1'. The 'Call Pull Feature Access Code' field is highlighted with a red box and contains the value '\*11'. Other settings include 'Keep Alive Type' (Default), 'Keep Alive Interval(Seconds)' (30), 'RPort' (Disabled), 'Subscribe Period(Seconds)' (1800), 'DTMF Type' (RFC2833), 'BLF List Retrieve Call Parked Code', 'Shared Line' (Shared Call Appearance), 'Dialog Info Call Pickup' (Disabled), 'BLA Number', 'VQ RTPC-XR Collector name', 'VQ RTPC-XR Collector address', and 'VQ RTPC-XR Collector port' (5060). A 'NOTE' section on the right explains features like DTMF, Session Timer, Busy Lamp Field/BLF List, Shared Call Appearance (SCA)/Bridge Line Appearance (BLA), and Network Conference.

4. Click **Confirm** to accept the change.

The phone will dial out “\*11” automatically when you press the **CallPull** soft key.

## Using SCA Feature on the IP Phone

This section provides you with detailed information on using the SIP-T23P/G IP phone in a SCA Hybrid Key System scenario. In a SCA Hybrid Key System scenario, the status of the line key LED which associates with a shared line will change. For more information on line key LED indicators, refer to [LED Instructions](#) on page 17.

You can do the following using the IP phone in a SCA Hybrid Key System scenario:

- Placing calls
- Answering calls
- Placing a call on hold
- Retrieving a held call
- Barging in an active call
- Call Pull

## Placing Calls

You can have one call or multiple calls on the shared line.

### To place a call on the shared line:

Do one of following:

- Enter the desired number using the keypad when the phone is idle. Press  ,  , or the **Send** soft key.

The phone will dial the entered number using the first line key.

- Press the line key when the phone is idle to enter the dialing screen.

Enter the desired number using the keypad and then press  ,  , or the **Send** soft key.

The phone will dial the entered number using the selected line key.

### To place multiple calls on the shared line:

You can have more than one call on the shared line. To place a new call when there is an active call on the line key 1 of phone A, do one of the following on phone A:

- Press the **Hold** soft key. The original call is placed on hold.

Press the **NewCall** soft key to enter the dialing screen.

Enter the desired number using the keypad.

Press  ,  , or the **Send** soft key.

Phone A will dial the entered number using the line key 2 automatically.

- Press the line key. The original call is placed on hold.

Enter the desired number using the keypad.

Press  ,  , or the **Send** soft key.

Phone A will dial the entered number using the selected line key.

## Answering Calls

You can have one call or multiple calls on the shared line. Incoming calls will be distributed evenly among the available line keys.

### To answer a call on the shared line:

When an incoming call arrives on the shared line, the phone A and phone B will ring simultaneously, and the LED indicators of the line key 1 on both phone A and phone B will flash green. You can answer the incoming call on either phone A or phone B but not both.

Do one of the following on phone A or phone B:

- Press the line key 1,  ,  or the **Answer** soft key on phone A.

The LED indicators of the line key 1 on phone A will illuminate solid green and phone B will illuminate solid red.

- Press the line key 1, ,  or the **Answer** soft key on phone B.

The LED indicators of the line key 1 on phone A will illuminate solid red and phone B will illuminate solid green.

#### To answer multiple calls on the shared line:

An incoming call arrives on the shared line when there is an active call on phone A's line key 1. The LED indicators of the line key 2 on both phone A and phone B will fast flash green. You can answer the incoming call on either phone A or phone B. The LCD screen of phone A displays the information of the incoming call (e.g., "Incoming call: 4604 Yealink").

**Note** Make sure call waiting feature is enabled on phone A. For more information, refer to [Call Waiting](#) on page 120.

Do one of the following on phone A:

- Press the line key 2. Phone B stops ringing.
- Press the **Answer** soft key. Phone B stops ringing.
- Press  to access the new call.

Press  or the **Answer** soft key. Phone B stops ringing.

The incoming call is answered and the original call is placed on hold. The LED indicators of the line key 1 on phone A will slowly flash green and phone B will slowly flash red indicating that there is the held call on the line key 1. The LED indicators of the line key 2 on phone A will illuminate solid green and phone B will illuminate solid red indicating that there is an active call on the line key 2.

You can also answer the call on phone B. Do one of the following on phone B:

- Press the line key 2. Phone A stops ringing.
- Press  or the **Answer** soft key. Phone A stops ringing.

The LED indicators of the line key 2 on phone A will illuminate solid red and phone B will illuminate solid green indicating that there is an active call on the line key 2. Meanwhile, The LED indicators of the line key 1 phone A will illuminate solid green and phone B will illuminate solid red indicating that there is an active call on the line key 1.

**Note** If the number of incoming calls is greater than the configured line keys, the line keys will be used by sequence circulation.

## Placing a Call on Hold

### To place a call on public hold:

1. Press the **Hold** soft key on phone A when party A and party C are talking.

The line key LEDs on phone A slowly flash green and phone B slowly flash red when the shared line call is placed on hold.

### To place a call on private hold:

1. Press the **PriHold** soft key or private hold key on phone A when there is an active call on the shared line (You may need to press the **More** soft key to see the **PriHold** soft key).

The line key LED slowly flashes green on phone A when the shared line call is placed on private hold.

The line key LED illuminates solid red on phone B when the shared line call is placed on private hold.

## Retrieving a Held Call

### To retrieve a call placed on public hold:

You can retrieve the public held call on either phone A or phone B.

#### To retrieve the call on phone A:

1. Press the line key with the slowly flashing green LED indicator or the **Resume** soft key.  
The conversation between phone A and phone C is retrieved.

#### To retrieve the call on phone B:

Do one of the following:

- Press the line key with the slowly flashing red LED indicator.
- Long press the desired line key.

The **Cancel**, **CallPull**, **NewCall** and **Retrieve** soft keys appear on the LCD screen.

Press the **Retrieve** soft key to retrieve the call.

The conversation is established between phone B and phone C, phone A disconnects the call. And the line key LEDs on phone A illuminate solid red and phone B illuminate solid green.

#### To retrieve a call placed on private hold:

The private held call can be only retrieved by the hold party (party A).

Do one of the following:

- Press the line key with the slowly flashing green LED indicator.
- Press the **Resume** soft key on phone A.

## Barging In an Active Call

#### To interrupt the active call on the shared line:

If phone A has only one active call, do the following:

1. Long press the desired line key on phone B.  
The **Cancel**, **CallPull**, **NewCall** and **BargeIn** soft keys appear on the LCD screen of phone B.
2. Press the **BargeIn** soft key to interrupt the active call of phone A.  
Party B will set up a conference call with the other parties in the active call.
3. Press the **Hold** or the **EndCall** soft key.
  - If any party in the conference call presses the **Hold** soft key, two-way voice can be heard between the remaining parties.
  - If party A or party B presses the **EndCall** soft key, the remaining parties are still connected. If the other party (not the shared line party) presses the **EndCall** soft key, the conference call is ended.

You can also press the line key with the solid red LED indicator on phone B to set up a conference call with the other parties in the active call.

If phone A has more than one call, do the following:

1. Long press the desired line key on phone B.

The list of calls appears on the LCD screen of phone B.

2. Press or to select the active call.  
The **Cancel**, **CallPull**, **NewCall** and **BargeIn** soft keys appear when the active call is highlighted.
3. Press the **BargeIn** soft key to interrupt the active call of phone A.  
Party B may hear a warning tone and then set up a conference call with the other parties of the active call.
4. Press the **Hold** or the **EndCall** soft key.
  - If any party in the conference call presses the **Hold** soft key, two-way voice can be heard between the remaining parties.
  - If party A or party B presses the **EndCall** soft key, the remaining parties are still connected. If the other party (not the shared line party) presses the **EndCall** soft key, the conference call is ended.

## Call Pull

Call pull feature allows users to retrieve an existing call from another shared phone that is in active or hold status. For example, when there is a call between phone A and phone C, you can use call pull feature on phone B to retrieve this call from phone A. Then the call is established between phone B and phone C.

### To retrieve a call from another shared phone:

If there is an active call between phone A and phone C, do the following:

1. Long press the desired line key on phone B.  
The **Cancel**, **CallPull**, **NewCall** and **BargeIn** soft keys appear on the LCD screen of phone B.
2. Press the **CallPull** soft key.  
The active call has been retrieved from the phone A successfully.

If there is a held call between phone A and phone C, do the following:

1. Long press the desired line key on phone B.

The **Cancel**, **CallPull**, **NewCall** and **Retrieve** soft keys appear on the LCD screen of phone B.

2. Press the **CallPull** soft key.

The held call has been retrieved from the phone A successfully.

## Bridged Line Appearance (BLA)

BLA allows users to share a SIP line on two or more IP phones. Users can monitor the specific extension (BLA number) for status changes on each IP phone. To use this feature, a BLA group should be pre-configured on the server and one of them is specified as a BLA number. BLA depends on support from a SIP server.

In the following figure, the first line is private and the second line is shared:

Any IP phone can be used to originate or receive calls on the bridged line. An incoming call to the BLA number can be presented to multiple phones in the group simultaneously. The incoming call can be answered on any IP phone of the group but not all.

## Configuring BLA Feature on the IP Phone

You can share a BLA number on two or more phones. For example, phone A registers the account 14019833020 and assigns BLA number, phone B registers the account 10462190020 and assigns BLA number, phone C registers the account 14755608020. Phone A and phone B share the BLA number 14084588327.

To register an account and configure BLA feature on phone A via web user interface:

1. Register the account 14019833020.

- Click on **Advanced**, and then select **Draft BLA** from the pull-down list of **Shared Line**.
- Enter the desired number in the **BLA Number** field.

The screenshot shows the Yealink T23G web interface. The 'Account' tab is active, and the 'Advanced' sub-tab is selected. The 'Shared Line' dropdown is set to 'Draft BLA' and the 'BLA Number' field contains '14084588327'. The 'Confirm' button is highlighted.

- Click **Confirm** to accept the change.

**To register an account and configure BLA feature on phone B via web user interface:**

- Register the account 10462190020.

The screenshot shows the Yealink T23G web interface. The 'Account' tab is active, and the 'Register' sub-tab is selected. The 'Line Active' dropdown is set to 'Enabled' and the 'Outbound Proxy Server 1' field contains 'sip214.ringcentral.com'. The 'Confirm' button is highlighted.

2. Click on **Advanced**, and then select **Draft BLA** from the pull-down list of **Shared Line**.
3. Enter the desired number in the **BLA Number** field.

The screenshot shows the Yealink T23G web interface. The 'Account' tab is active, and the 'Advanced' sub-tab is selected. The 'Shared Line' dropdown menu is open, showing 'Draft BLA' as the selected option. The 'BLA Number' field is filled with '14084588327'. The 'Confirm' button is highlighted with a red box.

4. Click **Confirm** to accept the change.

## Using BLA Feature on the IP Phone

This section provides you with detailed information on using the SIP-T23P/G IP phone in a BLA scenario. In a BLA scenario, the status of the line key LED which associates with a bridged line will change. For more information on line key LED indicators, refer to [LED Instructions](#) on page 17.

You can do the following using the IP phone in a BLA scenario:

- Placing calls
- Answering calls
- Place a call on hold
- Retrieving a held call

## Placing Calls

You can have one call or multiple calls on the bridged line.

### To place a call on the bridged line:

Do one of following:

- Enter the desired number using the keypad when the phone is idle. Press , , or the **Send** soft key.

The phone will dial the entered number.

- Press the line key when the phone is idle to enter the dialing screen.

Enter the desired number using the keypad and then press , , or the **Send** soft key.

The phone will dial the entered number.

#### To place multiple calls on the bridged line:

You can have more than one call on the bridged line. To place a new call when there is an active call on phone A, do one of the following on the phone A:

- Press the **Hold** soft key. The original call is placed on hold.

Press the **NewCall** soft key to enter the dialing screen.

Enter the desired number using the keypad.

Press , , or the **Send** soft key.

Phone A will dial the entered number.

- Press the line key. The original call is placed on hold.

Enter the desired number using the keypad.

Press , , or the **Send** soft key.

Phone A will dial the entered number.

## Answering Calls

When the phone C dials the BLA number "14084588327", an incoming call will arrive on the bridged line. The phone A and phone B ring simultaneously and the LED indicators of the line key on both phone A and phone B will flash green. You can answer the incoming call on either phone A or phone B but not both.

Do one of the following on phone A or phone B:

- Press , , or the **Answer** soft key on phone A.

Phone B stops ringing. The LED indicator of the line key on the phone A will illuminate solid green. At the meanwhile, the LED indicator of the line key on the phone B will illuminate solid red indicating that there is an active call on the phone A.

- Press , , or the **Answer** soft key on phone B.

Phone A stops ringing. The LED indicator of the line key on the phone B will illuminate solid green. At the meanwhile, the LED indicator of the line key on the phone A will illuminate solid red indicating that there is an active call on the phone B.

## Placing a Call on Hold

#### To place a call on hold:

1. Press the **Hold** soft key on phone A when party A and party C are talking.

The line key LEDs on phone A slowly flash green and phone B slowly flash red when the

bridged line call is placed on hold.

## Retrieving a Held Call

If there is a held call between phone A and phone C, you can retrieve a held call on either phone A or phone B.

### To retrieve the held call on phone A:

1. Press the line key with the slowly flashing green LED indicator or the **Resume** soft key on phone A.

The conversation between phone A and phone C is retrieved.

### To retrieve the held call on phone B:

1. Press the line key with the slowly flashing red LED indicator on phone B.

The conversation is established between phone B and phone C, phone A disconnects the call.

## Messages

### Short Message Service (SMS)

You can send and receive text messages using the SIP-T23P/G IP phone. New text messages can be indicated both acoustically and visually. When receiving a new text message, the phone will play a warning tone. The power indicator LED will slowly flash red, and the LCD screen will prompt "n New Text Message(s)" ("n" indicates the number of unread text messages. e.g., 1 New Text Message(s)) and a flashing icon .

#### Note

When the phone receives a text message, the text message prompt window will pop up by default. If you want to disable this feature, contact your system administrator for more information.

You can store text messages in your phone's Inbox, Sentbox, Outbox or Draftbox. Each of the boxes can store up to 100 text messages. If the number of the text messages in one box is more than 100, the phone will directly delete the oldest text message in the box.

#### Note

SMS is not available on all servers. Contact your system administrator for more information.

**To read a text message:**

1. Press **Menu->Message->Text Message->Inbox**.

2. Select the desired message and then press the **View** soft key.

**Note**

If the phone prompts receiving new text messages, you can also press the **View** soft key to read the new messages directly.

**To send a text message:**

1. Press **Menu->Message->Text Message->New Message**.
2. Compose the new text message. You can press the **abc** soft key to change the input mode.

3. Press the **Send** soft key after completing the content.
4. (Optional.) Press ◀ or ▶, or the **Switch** soft key to select the desired account from the **From** field.
5. Enter the number you want to send the message to in the **To** field.
6. Press the **Send** soft key to send the message or the **Back** soft key to cancel.

Sending a text message is configurable via web user interface at the path **Features->SMS**.

**To reply a text message:**

1. Press **Menu->Message->Text Message->Inbox**.
2. Select the desired message and then press the **Reply** soft key.
3. Compose the new text message. You can press the **abc** soft key to change the input mode.

4. Press the **Send** soft key after completing the content.
5. Check the **From** and **To** fields, and then press the **Send** soft key.

**To delete a text message:**

1. Press **Menu->Message->Text Message->Inbox (Sentbox, Outbox or Draftbox)**.
2. Select the desired message and then press the **Delete** soft key.

3. Select **Delete** to delete the desired message, and then press the **OK** soft key.  
The LCD screen prompts "Delete the selected message?".

4. Press the **OK** soft key to delete this message or the **Cancel** soft key to cancel.

You can also delete all text messages by pressing the **Delete** soft key and then select **Delete All**. For more information, refer to the above steps.

**Note**

You can also delete a specific message by pressing the **Delete** soft key after viewing.

## Voice Mail

You can leave voice mails for someone else using the SIP-T23P/G IP phone. You can also listen to voice mails that are stored in a voice mailbox. This feature is set up on the server side. It is not available on all servers.

When receiving a new voice mail, the phone will play a warning tone. The power indicator LED will slowly flash red, and the LCD screen will prompt "n New Voice Mail(s)" ("n" indicates the number of unread voice messages, e.g., 4 New Voice Mail(s)) and a flashing icon .

If the voice mail pop-up message box disappears, it won't pop up again unless the user receives a new voice mail or the user re-registers the account that has unread voice mail(s).

**Note**

You can configure the phone not to display the pop-up prompt, contact your system administrator for more information.

**To leave a voice mail:**

You can leave a voice mail for someone else when he/she is busy or inconvenient to answer the call. Follow the voice prompt from the system server to leave a voice mail, and then hang up.

**To configure voice mail access codes via phone user interface:**

1. Press **Menu->Message->Voice Mail->Set Voice Mail Code**.
2. If there are multiple accounts registered on the phone, press  or  to select the desired account which you want to set.
3. Press the **123** soft key to select the proper input mode and then enter the voice mail access code (e.g., \*97).

4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

**Note**

Voice mail access codes must be predefined on the system server. Contact your system administrator for the more information.

**To listen to voice mails:**

1. When the LCD screen prompts that the phone receives a new voice mail and the power indicator LED slowly flashes red, you can press  or the **Connect** soft key to dial out the voice mail access code.
2. Follow the voice prompt to listen to your voice mails.

**Note**

Before listening to voice mails, make sure the voice mail access code has been configured. When all new voice mails are retrieved, the power indicator LED will go out.

**To view the voice mail via phone user interface:**

1. Press **Menu->Message->Voice Mail->View Voice Mail**.

The LCD screen displays the amount of new and old voice mails.

2. Select an account and then press the **Connect** soft key to listen to voice mails.

## Message Waiting Indicator (MWI)

The SIP-T23P/G IP phone supports MWI when receiving a new voice message. If someone leaves you a voice mail, you will receive a message waiting indicator. MWI will be indicated in three ways: a warning tone, an indicator message (including a voice mail icon) on the LCD screen, and the power indicator LED slowly flashes red. This will be cleared when you retrieve all voice mails or delete them.

The MWI service is unsolicited for some servers, so the SIP-T23P/G IP phone only handles the MWI messages sent from the server. But for other servers, the MWI service is solicited, so the SIP-T23P/G IP phone must enable subscription for MWI.

### Note

MWI service is not available on all servers. Contact your system administrator for more information.

The MWI subscription parameters you need to know:

Options	Description
<b>Subscribe for MWI</b>	Enable or disable a subscription for MWI service.
<b>MWI Subscription Period</b>	Period of MWI subscription. The IP phone sends a refresh SUBSCRIBE request before initial SUBSCRIBE expiration.
<b>Subscribe MWI To Voice Mail</b>	<p>Enable or disable a subscription to the voice mail number for MWI service.</p> <p>To use this feature, you should also configure the voice mail number.</p>

### Note

The phone will send SUBSCRIBE messages for the MWI service to the account or the voice number MWI service depending on the server. Contact your system administrator for more information.

**To configure subscribe for MWI via web user interface:**

1. Click on **Account->Advanced**.

2. Select the desired account from the pull-down list of **Account**.
3. Select **Enabled** from the pull-down list of **Subscribe for MWI** field.
4. Enter the period time in the **MWI Subscription Period(Seconds)** field.

The screenshot shows the Yealink T23G web interface. The 'Account' tab is selected. The 'Account' section is expanded, showing various settings. The 'Subscribe for MWI' field is highlighted with a red box, showing it is set to 'Enabled'. The 'MWI Subscription Period(Seconds)' field is set to '3600'. Other settings include 'Keep Alive Type' (Default), 'Keep Alive Interval(Seconds)' (30), 'RPort' (Disabled), 'Subscribe Period(Seconds)' (1800), 'DTMF Type' (RFC2833), 'DTMF Info Type' (DTMF-Relay), 'DTMF Payload Type(96~127)' (101), 'BLF Send DTMF' (Disabled), 'BLF DTMF Code' (empty), 'Retransmission' (Disabled), 'Subscribe Register' (Disabled), 'Subscribe MWI To Voice Mail' (Enabled), 'Voice Mail' (\*4), 'Voice Mail Display' (Enabled), and 'Caller ID Source' (FROM). A 'NOTE' section on the right provides information about DTMF, Session Timer, Busy Lamp Field/BLF List, Shared Call Appearance (SCA)/ Bridge Line Appearance (BLA), and Network Conference.

5. Click **Confirm** to accept the change.  
The IP phone will subscribe to the account number for MWI service by default.

**To enable subscribe MWI to voice mail via web user interface:**

1. Click on **Account->Advanced**.
2. Select the desired account from the pull-down list of **Account**.
3. Select **Enabled** from the pull-down list of **Subscribe for MWI**.
4. Select **Enabled** from the pull-down list of **Subscribe MWI To Voice Mail**.

5. Enter the desired voice mail number in the **Voice Mail** field.

The screenshot shows the Yealink T23G web interface. The 'Account' tab is selected. The 'Voice Mail' field is highlighted with a red box, showing the value '\*4'. Other fields like 'Subscribe for MWI' and 'Subscribe MWI To Voice Mail' are also highlighted with red boxes. The 'Voice Mail Display' field is set to 'Enabled'.

Field	Value
Account	Account 1
Keep Alive Type	Default
Keep Alive Interval(Seconds)	30
RPort	Disabled
Subscribe Period(Seconds)	1800
DTMF Type	RFC2833
DTMF Info Type	DTMF-Relay
DTMF Payload Type(96~127)	101
BLF Send DTMF	Disabled
BLF DTMF Code	
Retransmission	Disabled
Subscribe Register	Disabled
Subscribe for MWI	Enabled
MWI Subscription Period(Seconds)	3600
Subscribe MWI To Voice Mail	Enabled
Voice Mail	*4
Voice Mail Display	Enabled
Caller ID Source	FROM

**NOTE**

**DTMF**  
It is the signal sent from the IP phone to the network, which is generated when pressing the IP phone's keypad during a call.

**Session Timer**  
It allows a periodic refresh of SIP sessions through a re-INVITE request, to determine whether a SIP session is still active.

**Busy Lamp Field/BLF List**  
Monitors a specific extension/a list of extensions for status changes on IP phones.

**Shared Call Appearance (SCA)/ Bridge Line Appearance (BLA)**  
It allows users to share a SIP line on several IP phones. Any IP phone can be used to originate or receive calls on the shared line.

**Network Conference**

6. Click **Confirm** to accept the change.

The IP phone will subscribe to the voice mail number for MWI service using Subscribe MWI To Voice Mail.

**Note**

MWI subscription is configurable via web user interface only.

# Regulatory Notices

## Service Agreements

Contact your Yealink Authorized Reseller for information about service agreements applicable to your product.

## Limitations of Liability

TO THE FULL EXTENT ALLOWED BY LAW, YEALINK EXCLUDES FOR ITSELF AND ITS SUPPLIERS ANY LIABILITY, WHETHER BASED IN CONTRACT OR TORT (INCLUDING NEGLIGENCE), FOR INCIDENTAL, CONSEQUENTIAL, INDIRECT, SPECIAL, OR PUNITIVE DAMAGES OF ANY KIND, OR FOR LOSS OF REVENUE OR PROFITS, LOSS OF BUSINESS, LOSS OF INFORMATION OR DATA, OR OTHER FINANCIAL LOSS ARISING OUT OF OR IN CONNECTION WITH THE SALE, INSTALLATION, MAINTENANCE, USE, PERFORMANCE, FAILURE, OR INTERRUPTION OF ITS PRODUCTS, EVEN IF YEALINK OR ITS AUTHORIZED RESELLER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, AND LIMITS ITS LIABILITY TO REPAIR, REPLACEMENT, OR REFUND OF THE PURCHASE PRICE PAID, AT YEALINK'S OPTION. THIS DISCLAIMER OF LIABILITY FOR DAMAGES WILL NOT BE AFFECTED IF ANY REMEDY PROVIDED HEREIN SHALL FAIL OF ITS ESSENTIAL PURPOSE.

## Safety Instructions

**Save these instructions. Read these safety instructions before use!**

The following basic safety precautions should always be followed to reduce risk of fire, electrical shock, and other personal injury.

### General Requirements

- Before you install and use the device, read the safety instructions carefully and observe the situation during operation.
- During the process of storage, transportation, and operation, please always keep the device dry and clean.
- During the process of storage, transportation, and operation, please avoid collision and crash of the device.
- Please attempt not to dismantle the device by yourself. In case of any discrepancy, please contact the appointed maintenance center for repair.
- Without prior written consent, no organization or individual is permitted to make any change to the structure or the safety design of the device. Yealink is under no circumstance liable to consequences or legal issues caused by such changes.
- Please refer to the relevant laws and statutes while using the device. Legal rights of others should be respected as well.

### Environmental Requirements

- Place the device at a well-ventilated place. Do not expose the device under direct sunlight.
- Keep the device dry and free of dusts.
- Place the device on a stable and level platform.

- Please place no heavy objects on the device in case of damage and deformation caused by the heavy load.
- Keep at least 10 cm between the device and the closest object for heat dissipation.
- Do not place the device on or near any inflammable or fire-vulnerable object, such as rubber-made materials.
- Keep the device away from any heat source or bare fire, such as a candle or an electric heater.
- Keep the device away from any household appliance with strong magnetic field or electromagnetic field, such as a microwave oven or a refrigerator.

#### **Operating Requirements**

- Do not let a child operate the device without guidance.
- Do not let a child play with the device or any accessory in case of accidental swallowing.
- Please use the accessories provided or authorized by the manufacturer only.
- The power supply of the device shall meet the requirements of the input voltage of the device. Please use the provided surge protection power socket only.
- Before plugging or unplugging any cable, make sure that your hands are completely dry.
- Do not spill liquid of any kind on the product or use the equipment near water, for example, near a bathtub, washbowl, kitchen sink, wet basement or near a swimming pool.
- Do not tread on, pull, or over-bend any cable in case of malfunction of the device.
- During a thunderstorm, stop using the device and disconnect it from the power supply. Unplug the power plug and the Asymmetric Digital Subscriber Line (ADSL) twisted pair (the radio frequency cable) to avoid lightning strike.
- If the device is left unused for a rather long time, disconnect it from the power supply and unplug the power plug.
- When there is smoke emitted from the device, or some abnormal noise or smell, disconnect the device from the power supply, and unplug the power plug immediately. Contact the specified maintenance center for repair.
- Do not insert any object into equipment slots that is not part of the product or auxiliary product.
- Before connecting a cable, connect the grounding cable of the device first. Do not disconnect the grounding cable until you disconnect all other cables.

#### **Cleaning Requirements**

- Before cleaning the device, stop using it and disconnect it from the power supply.
- Use a piece of soft, dry and anti-static cloth to clean the device.
- Keep the power plug clean and dry. Using a dirty or wet power plug may lead to electric shock or other perils.
