- Applicable Models: W60B, W56H, W52H
- Release Date: Feb 28th, 2018.

2. New Features

3. Added the feature of Number of Active Handsets.

3. Optimization

None

4. Bug Fixes

1. Enhanced the compatibility and improved the stability while working with RT20 and RT20U.

5. New Features Descriptions

1. Added the feature of Number of Active Handsets.

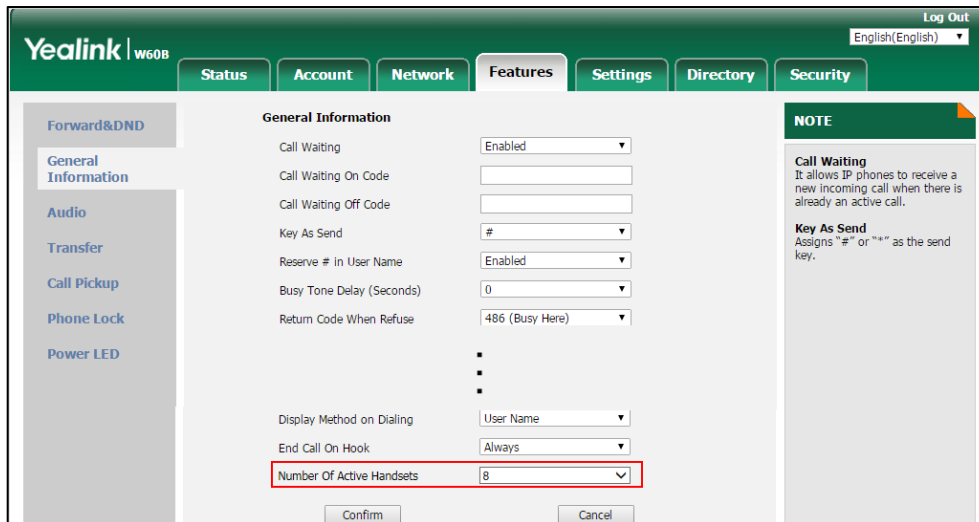

Description: The base station supports up to 8 handsets, and you can limit the max number of active handsets (4 or 8). The active handsets are free to communicate, access menu, configure features and so on. While the operation of the inactive handsets is limited, and the idle screen of the handset prompts “Path Busy”.

The number of active handsets will also affect the number of simultaneous active calls on the base station.

Number of Active Handsets	Number of Simultaneous Active Calls
4	4
8	8

To configure the multicast paging via web user interface:

Click on **Features** -> **General Information**.

The parameters in the auto provision template are described as follows:

base.active_handset.number =

6. Configuration Parameters Enhancements

Auto Provision Template Flies Change Log							
Firmware Version: [77.81.0.10]-[77.81.0.30]							
Feature	Provisioning syntax Comparison		Permitted Values	Default Value	Action	Description	File
	77.81.0.10	77.81.0.30					
Active Handset Restriction		base.active_handset.number =	4 or 8	4	Add	It configures the max number of active handsets.	common.cfg
Security		static.security.default_ssl_method =	0, 3, 4 or 5	3	Add	It configures the TLS version the DECT IP phone uses to authenticate with the server. 0-TLS 1.0 only	common.cfg

						<p>3-SSL V23 (automatic negotiation with server. The phone starts with TLS1.2 for negotiation.</p> <p>4-TLS 1.1 only</p> <p>5-TLS 1.2 only</p>	
Handset Restriction		phone_setting.max_number_of_handset =	5 or 8	5	Delete	It configures the the number of handsets registered to one base.	common.cfg
